

Economic Collapse Prepping For Tomorrow Book 2

There is no such thing as your 'average' Prepper within the UK. We come in many shapes and sizes, many different backgrounds, races, religions and creeds, and we certainly can't be put into any social media group. There is only one defining factor that unites us all – the simple fact that – Preppers are people who are ready for emergencies that may occur. This could be due to no fault of their own. These emergencies can bring a very abrupt halt to the type of life and lifestyle as we know it. Don't be fooled by the over the top TV programs that are going around at the moment showing how you have to have a secret underground bunker, fortified and filled with every imaginable item to ward off herds of crazy people hell bent on doing you harm! You can be prepped at home without an issue, knowing what you need is half the battle. Knowing how to use it, is the other half. Some people are preppers without even knowing it! A prepper is someone that has a plan, just in case – planning a strategy to ensure they have an emergency supply of ALL essential items that will last for days, weeks, months or even years. Along with stocking up with essentials they will plan for various survival situations and also have a full disaster plan for when SHTF. Quite often this will include emergency equipment if they decide to leave their home - this is commonly known in the prepper community as Bugging Out. Having a plan and being ready to implement that plan is a major art of being a UK Prepper. This book is full of useful information help, tips and advice, as well as offering you a host of equipment consider – Start your Prepping now.

The ultimate guide to personal preparedness. No scare tactics. Just a 10-step guide to practical preparedness for every family. You don't like to think about it, but deep down you know it can happen. Disaster can strike without warning, leaving your family without water, food, or electricity, and without medical or police support. How will you survive when that happens? How will you protect your family from threats of violence? Buying insurance, writing wills, getting our teeth cleaned, and saving for retirement are just a few of the precautions we routinely take to mitigate risks, but most people fail to prepare for what's most important. They fail to prepare for their own survival. With 91% of Americans living in places at a moderate-to-high risk of disasters and with all of us dependent on a very fragile life-support system, it's time for you to take preparedness seriously. After reading this book you will:

- understand the 27 disasters you're likely to face, - know why some people survive when others don't, and how to ensure your family survives. - master situational awareness and the survival mindset you need to avoid becoming a victim of violence. - know when to stay, when to bug out, and how to implement an evacuation plan. - learn the best non-firearm options for self-defense. - discover the best ways to generate electricity, store water and food, and handle sanitation and medical care on your own

Start Prepping! is the most actionable, common sense guide to personal preparedness. It will help your family comfortably survive everything from pandemics to manmade and natural disasters. And it will help you stay safe from civil unrest and everyday violence. We can't hide from the risks we face, but we can prepare for them. Read Start Prepping! now and give yourself some peace of mind. Because the day after disaster strikes is too late.

Disaster preparedness is no longer something that should solely be the concern of someone living on the coast who could be at risk of hurricanes or someone in the Midwest who has to live under constant fear of tornadoes. Rather, preparedness needs to account for all kinds of different disasters, including ones that are manmade such as an economic collapse, power grid down, or a nuclear power plant accident. A disaster can be something that's only untimely and inconvenient, but it can also be something that is destructive and life threatening. Regardless of the type of disaster you expect to face or will face, when it does strike you should only have one goal in mind: your family's survival. The good news for you is there are preparedness steps that you can take to minimize the effect a disaster has on your family and increase your chances of survival, and following those steps is what this book is about. Why should you bother to prepare for a disaster? The reason why is because the world is simply not as safe as you would want it to be or even believe it might be. On the contrary, we live in a chaotic and unpredictable world where literally anything can happen. When disaster does strike, it does so quickly and when you least expect it. It could force you to bug in at your home to outlast the chaos going on outside, or it could force you to evacuate your home entirely and hit it out on the open road. In an instant, all of the luxuries and services that you are used to such as running water, food, power and electricity, gas, and communications could become cut off and remain cut off for a long time. Ask yourself an honest question: in the event of a large scale and long term disaster where the world as you know it has suddenly changed in the blink of an eye, would you be able to guarantee your family's safety? Even if you answer with 'no,' the good news for you is that by working together as a team in advance of the disaster, the chances of survival for you and your family skyrocket dramatically. In this book, I'm going to walk you through a series of seven critical steps that you must follow in order to make your family more prepared for whatever disaster comes your way. These steps are:- Getting your spouse or partner onboard with prepping - Teaching your children about survival and disaster preparedness- Building a complete bug out bag for each of your children - Stockpiling enough supplies to sustain your family over the long term- Bugging in with your family at home in the midst of a crisis - Writing an effective evacuation plan with your family to prepare you for the possibility of abandoning your home- Bugging out with your family should you indeed be forced to abandon your home and possessions Knowing what you need to do in a disaster situation and instructing your family on what to do is a massive responsibility that you have as a parent, and it will ensure that all of you remain prepared and protected when a massive catastrophe happens.

When faced with the possibility of a disaster ever happening in their life, most people respond with something along the lines of, "It won't ever happen to me" or "it can't ever happen to me." But the truth is you or anyone else cannot foretell the future. You can't honestly say that there will never be a food shortage or a cash shortage in the future. To prepare for such a scenario, you always have a choice to make: you can either prepare and be frugal now, or you can do nothing and have frugality forced upon you and your family. Frugal living is easily one of the best disaster preparations a true survivalist can make. For one thing, it enables you to spend additional resources towards your survival plan, but it also greatly lessens the surprise or the shock when a disaster scenario comes our way. A financial collapse or recession is just one of the many disasters that can and will be forced upon us. We already had one major recession back in 2008, but a future economic collapse will be far worse than that. Economic collapses and recessions are both noted for their high unemployment levels, bankruptcies of major businesses and companies, a significant lowering of consumer spending, and even hyperinflation which can lead to a multitude of other problems such as civil unrest. Can you honestly say you are prepared for an economic collapse? If not, then this book will be perfect for you. In this book, we are going to discuss how to begin preparing financially for a major disaster such as an economic collapse from a beginner's perspective. The specific subjects that we are going to cover include each of the following: * Why A Complete Financial Collapse Is Coming * The Benefits Of Preparing Financially Now * Setting A Budget and Getting Out Of Debt * Easy Ways To Make More

Money * Living Frugally* Making A Survival Emergency Fund When people think about preparing for disaster, they often think about hoarding food and water and other necessities, putting together a bug out bag, finding a suitable bug out location, and so on. That's all great, but at the same time, you have to adequately prepare your finances for disaster as well. It's one of the most overlooked aspects of prepping, but at the same time, it's also one of the most critical.

BEFORE, DURING, AND BEYOND A MARKETPLACE MELTDOWN You're prepared for hurricanes, tornadoes, blizzards, earthquakes and other natural disasters, but are you ready for the inevitable man-made disasters to come? This book teaches you the other half of disaster planning—how to survive the economic turmoil that hits regions and nations after the storm has passed. Prepper's Financial Guide will teach you how to:

- Become self-sufficient
- Purchase precious metals
- Safeguard your valuable possessions
- Invest in foreign and alternate currencies
- Barter and trade for needed supplies
- Build an off-grid marketplace
- Reduce debt so you can save for the future
- And much more

Reviews life-saving steps for keeping alive in the event of a catastrophic disaster, covering such topics as acquiring and storing water, building a shelf-stable food supply, strengthening home security, and treating illnesses.

The book makes a real connection for circumstances where cash has been rendered useless. The author covers all the major points of an inevitable economical collapse. This book takes you through the whole timeline of a collapse. This book is useful for someone who is wanting to put together a plan or at least have an idea so they are not blindsided. Also, useful for someone who is not a beginner at prepping that wants to double-check their plans in this particular situation. In this book, you will find: - Learn About The Global Fiat Currency Paradigm And Why Most Fiat Currency's Eventually End Up At Their True Worth - The possible causes of a financial collapse, including some of the historical precedents - What you can expect if your money becomes worthless - How to live in a world where money is of little or no value - About cash-free economics Much, Much More

THE U.S. ECONOMY IS A TICKING TIME BOMB! America's Economy is quickly reaching a point of no return. When the U.S. Economic collapse happens it will happen fast and with little or no warning. The few that are wisely prepared will survive while millions of others will face an uncertain future of poverty, war and daily stress and chaos. Chief Economist, Investor and Financial Author, Dr. Soloman Greenburg paints a shocking, yet very realistic picture of what many experts agree could happen in only a few mere months from now. Dr. Greenburg continues by laying out a simple, easy to follow battle plan you can use to build your own financial fortress using a mix of brilliant insight and actionable real world advice that every American citizen needs to know to be financially secure during the coming collapse. search this title economy economic trump banks bankers banking war international collapse failure bankruptcy bankrupt credit prepping prepper survival barter trade jp morgan chase bailout the fed

There are plenty of signs that indicate our world is headed towards financial collapse. We have become dependent on paper money that is quickly losing value. What will you do when paper money is completely worthless? Will you be able to feed the family or provide shelter? How will you manage basic problems like finding clean drinking water and obtaining the things you need? These are all problems that you will be confronted with in the aftermath of the stock market crashing or a war that kills the economy. This book will take you by the hand and lead you down the road to prepping for a major economic collapse. You will have to learn a lot of new skills. When grocery store shelves are empty and the malls are closed, you have to find food and make your own clothes. When money isn't good for anything more than starting a fire, you will have to learn how to operate on a barter system. To use the bartering system, you need to know what to store today that will have high value in a world where paper money is useless. Don't get caught empty handed when the economy tanks. Get started with your prepping today.

Shit Hits the Fan (SHTF). The End of the World As We Know It (TEOTWAWKI). A World without Rule or Law (WROL). This is what Preppers prepare for. Bug-out Vehicle (BOV), Bug-out Bag (BOB), Bug-out Location (BOL), Bug-out Directions (BOD). This is the language of the Prepper. This handbook will provide individuals, families, or groups access to the unique mindset of those survivalists called Preppers. Preppers prepare for unknown circumstances, such as economic collapse, natural events, manmade catastrophes, and even the end of the world. Preppers come from all walks of life, ranging from blue-collar workers to white-collar executives running multimillion-dollar companies. The reality is that we're all Preppers in one way or another. When we go to the grocery store, we buy and store food for future meals. That's Prepping. When we save five hundred dollars in the bank for a rainy day, that's Prepping. When we buy first-aid supplies because they're on sale, that's Prepping. Preppers take those actions to a different level. They don't look out one week or even four weeks from now. Preppers look out months and even years from now. Preppers tend to store items in bulk and some in tons (e.g., wheat, beans, corn, etcetera). They preserve their food so it lasts for up to thirty years. They have multiple weapons, ranging from knives, bows, and guns all the way to homemade devices. Some Preppers have predetermined locations to Bug Out (BO) to should a catastrophe happen, while others have Bug-out Vehicles (BOV) to get them there. Preppers find peace of mind knowing that they have food, water, rifles, pistols, ammunition, shelter, heat, energy, and the experience to survive. They have knowledge and relationships that provide skills to construct, engineer, grow, preserve, forge, hunt, provide electricity, teach, and balance the requirements of the survival triangle. Preppers act alone as well as become part of a larger Prepper community. To help better understand Preppers, I present the survival triangle, which most Preppers use as a guide. The survival triangle demonstrates the basic foundation of Prepping, and as such I've labeled it the first tenet of Prepping. As a Prepper, I allow you to look through my eyes and share what I've learned and applied to my life. I provide numerous examples and methods of how you can become a Prepper, though not all are always practical. The point is to expose the reader to the Prepper and the many options a Prepper has. The word Prepper or Preppers does not signify or imply a formal organization or title to any person or group. In its simplest form Preppers are individuals, families, or groups that are prepared BEFORE a significant event occurs. Individuals I have talked with associate Preppers with doomsdayers, militants, lunatics, or outsiders. Because of this stigma many Preppers tend to remain silent or selective about their communications. They provide limited if any information on what they store, the quantities they store, and how they store their preps. Yet within the Prepper community there is significantly more freedom and sharing of knowledge and experiences. There is a feeling of community amongst Preppers, and many but not all are welcome. In this community you will learn and be exposed to a tremendous amount of information. . It's often difficult to understand what a Prepper is because there is no common mold or practice other than the survival triangle. What you prep and how you prep depends on your experience, finances, network, and knowledge. You and I may prepare differently, but the goal is the same, which is to be prepared before a significant event occurs. Whether you like it or not, we all prepare for something, but are you ready to be called a Prepper?

Getting Your FREE Bonus Download this book, read it to the end and see "BONUS: Your FREE Gift" chapter after the conclusion. Survival Guide: (FREE Bonus Included) 20 Tips How To Live Without Electricity And Survive A Blackout We are all plugged into an aging and increasingly vulnerable grid that can collapse on us at any tie. Meanwhile are electric bills are going through the roof while electric companies struggle to keep up with demand. What you really need is a way to break free from your bill and your dependence, and learn to live without grid based electricity. Because if push comes to shove, and the electric grid collapses, you need to be prepared for it, and this book leads the way to the preparation of that endeavor in some truly amazing ways. In this field guide for the plucky survivalist, you will learn how to find alternative sources of heat, fuel and electricity. Study an in depth walk through of how to build your own Solar Panel, as well as several alternative power through the rarely mentioned (but powerful) means of the fuel cell power generator. This book also discusses at great length how you can find water in your home when the lights go out, so you don't have to face drinking water shortages, or contaminated H2O. Everything you could ever need during a power outage is contained within this book. So what are you waiting for? Pay the small price to buy this guide and you will not be disappointed! In this book we will learn: Alternative Energy Source Safe Water Acquisition and Storage Emergency Communication And a whole lot more! If you've been told it's too late to start prepping ... If you've been told it's too expensive to start prepping ... If you think most prepping guides are too complicated ... If you have little ones, not just yourself to think of ... If you think most preppers seem, well-a little obsessive ... THIS is the prepping guide for you! PREPPER PARENTS! is a brief, easy-to-understand guide designed to walk you through preparedness for everything from short-term natural disasters to long-term economic collapse. This guide uses flagged action items as well as common sense tips to help you decide on a plan for you and your family. You'll see checklists to follow for getting a bug-out bag stocked on a budget, defense, heat and shelter, medical and dental supplies, personal hygiene, finance and bartering and much more! Chapters on food and water will teach you quickly how to achieve a clean, drinkable water supply and which food items taste best, carry lightest and store longest. Filled with special ideas for parents with children, this guide is your starting place for common sense readiness.

A Beginners Guide To Christian Prepping: Learn How to Prepare for SHTF, Natural Disasters, Civil Unrest, Economic Collapse, an EMP Strike, and other Apocalyptic Events of the End Times This book,

Disaster preparedness is a major responsibility that you can undertake take for yourself and your family. All this means is that you take steps to ensure you and your family's safety and survival in the event of a major disaster or catastrophe, such as a natural disaster, an economic collapse, an EMP grid down disaster, a terrorist attack, a nuclear power plant accident, or whatever else you feel will strike. Being prepared will make you caught less off guard and put you at a distinctive advantage over the millions of other people who have not taken any preparation steps whatsoever. At the same time, it's also important that you are aware of simple yet potentially fatal mistakes that you can make while prepping and learn how you can avoid these mistakes. That's what this book is all about. The specific mistakes that we are going to discuss how to avoid in detail are the following: * Mistake #1: You Only Prepare For One Kind of Disaster * Mistake #2: You Store All Of Your Eggs In One Basket* Mistake #3: You Don't Build A Bug Out Bag* Mistake #4: You Don't Prepare Your Family* Mistake #5: You Procrastinate * Mistake #6: You Focus On Gear and Supplies More Than Skills* Mistake #7: You Tell Everyone About Your Preparations * Mistake #8: You Don't Inspect and Rotate Your Food and Water * Mistake #9: You Don't Take Personal Hygiene and Sanitation Into Account* Mistake #10: You Don't Have a Backup Plan (and a Backup Plan to Your Backup Plan) For each of these mistakes, we'll establish why it's a mistake to begin with, the disastrous consequences that exist if you make it, and solutions for how you can avoid it. This knowledge alone will serve you well and increase your chances of survival in a disaster scenario. Note that thousands if not millions of people have recognized the need to prep and have taken the necessary steps, but a sizable percentage of those people have also unfortunately made these mistakes and the result is they will be at greater risk when disaster strikes. You cannot allow yourself or your family to become victims in a catastrophe, which is why I cannot enunciate enough about how knowledge of these mistakes and how to avoid them is imperative.

Entertainment, Bartering For Supplies

The prepper's pantry is a very important part of their survival kit. It usually consists of a large refrigerator that stores a lot of perishables and canned goods, a small stove with stoves, some utensils such as knives, large pots, pans, baking pans and the most important, a collection of freeze dried foods. They have a variety of different foods to provide for different needs for example, if someone in the family is diabetic they may need a special type of diabetic food or they may just need something to keep them warm during severe weather. This guide will give you some tips on what foods you should have on hand. This guide will also give you information on what foods you should avoid having in your preppers pantry. This will help ensure that you are providing for your family's needs instead of just going off half-cocked when disaster strikes. You want to be prepared so that you do not have to rely on others to feed you. Following this guide will ensure that you have enough food storage to last you through at least two weeks without any problems. If you have a prepper in your family, it is very important to talk to him or her about the type of pantry they have. In fact, many preppers are starting to do their own grocery shopping so that they know where to buy the best foods at all times. This will save them a lot of money. Some families even go so far as to buy freeze dried foods that are packed in cans. It saves them time, because it can get overwhelming to sort through all of the different brands. Another thing you should have in your hidden preppers pantry bed are multiple cans of powdered drinking water. Many preppers depend on canned foods for their survival food supply. However, most people that live in an area where there is no running water do not know how to properly store the canned foods. With the proper pantry and a good storage system, you can easily prepare healthy meals for your family.

Economic Collapse Prepping for Tomorrow Createspace Independent Publishing Platform

A comprehensive guide to surviving Man-Made and Natural Disasters Everything you need to know to prepare for the worst. Whether fire, flood, hurricane or tornado, or whether terrorist attack, biological threat, or economic collapse, The Illustrated Encyclopedia of Survival is a must-have resource for saving you and your family. Readers learn about: Survival Prepping Emergency Supplies & Kits First Aid Communications Edible Wild Plants Food Storage Building Shelters Hunting & Fishing Basic Fighting Skills Psychology of Survival And much more...

Plan . Prepare . Survive! A practical low-cost prepping blueprint that will teach you how to survive the end of the world, as we know it, with easy to follow step-by-step instructions to guide you every step of the way. It should be common knowledge, to anyone with a brain and common sense that the world that we live in can be thrown into chaos at any moment by natural disaster, economic collapse, electromagnetic pulse, viral pandemic, or any number of other disasters... Even the federal government suggests everyone have a "survival kit" on hand at all times, however, they only recommend a three-day to a one-week supply of essential items, which is not sufficient to protect you and your family after an end of the world as we know it event strikes. But, where do you start? You start With The Prepper's Guide to Surviving the End of the World as We Know It - this must read 176-page paperback prepper book teaches you how to survive even if things never return to normal.

Imagine a world where you have a medical emergency and "911" is no longer accessible at your fingertips via your smart phone. There is no more Apple's Siri available to connect you to police. Electricity, landlines, cell phones, and the next echelon of emergency care, e.g. a hospital emergency room staffed with dozens of trained medical professionals, no longer exist. These situations may occur during a collapse situation, a moment you may find yourself, and your loved ones, essentially alone. Survival medicine, or collapse medicine, may be the only option in a variety of situations, including civil unrest, economic collapse, a pandemic, radiation events, natural disasters, or even when out on the trail for the weekend. It is imperative that you have the vital medical knowledge you need for multiple medical emergencies in this time of global unrest; from climate change to spasmodic economic rises and declines. This book covers: Introduction to Survival Emergency Medicine Why Always Living Prepared is Not

Such a Bad Plan Keep Survival Simple ABCDE and 3 Common Emergencies Stress Management & Mental Wellness in Survival Physical Preventive Actions & Survival Maintenance Environmental Survival Injuries & Illnesses Your Survival Emergency Medical Kit Treating Open Wounds During Survival Surviving Survival Skin Ailments Gut Health During Survival Bone & Joint Injuries Insect Bites & Stings Preparing & Surviving Natural Disasters Surviving Flooding Surviving a Meteor Strike And Much More! Will you know what to do during a medical emergency when there is no one left to call for help? In August 2005, the United States witnessed an isolated collapse scenario along the southeast of America after Hurricane Katrina swept over land. Twenty-five percent of all deaths in Louisiana were due to injury or trauma, according to statistics compiled by the Data Center. Hurricane Katrina also displaced more than a million residents. A large-scale displacement of people after a disaster or collapse scenario is what often triggers epidemics, according to a study published in *Emerging Infectious Diseases* (2007). The 2007 study states: "Communicable diseases are common in displaced populations that have poor access to basic needs such as safe water and sanitation, adequate shelter, and primary healthcare services." Communicable diseases, such as hepatitis A, leptospirosis, and meningitis, can be treated relatively easily in a functioning system of care, but are often deadly in an hospital-less environment. Focusing on what to do in the wake of a collapse scenario or major natural disaster is almost as important as surviving the initial event itself. Think long-term survival over short-term luck. Many people know first aid, CPR, and what to do when someone is choking at the neighborhood Chinese buffet. However, medical emergencies during survival can range from simple cuts or burns, to severe infections or life-threatening wounds that you may need to stitch up with fishing line with no local anesthetic available. Survival and your ability to do so in any emergency situation is not solely about the physical emergencies you may face. The mental toughness and intestinal fortitude you will need to survive are far more important. The stressors during any survival situation and medical emergency can either affect you negatively, or they can be harnessed to push you through any given emergency situation.

A necessary addition to any prepper's or survivalists's shelf! A one-year food supply means freedom. It means that you are less subject to the whims of the economy or personal financial emergencies. You can handle small disasters with aplomb. You aren't reliant on the government if a crisis strikes. You can't be manipulated because your family is hungry. This edition provides to a detailed compendium of all things food storage. Geared towards preppers, it teaches you: Why everyone needs a food supply in their homes How much food you need How your pantry is directly related to your health The components of a perfect pantry Prepping for those with dietary restrictions A thrifty new way of shopping so you can afford to build your pantry How to store the food you purchase to extend the shelf life for as long as possible A week-by-week plan, complete with shopping lists and menu ideas How to save money by making items most people purchase ready-made at the store Pantry inventory and maintenance Where to store all of that food Bonus: 25 frugal and delicious recipes If you're new at this, you can take the most important step today--the step of getting started. You'll have a year's supply of food in no time at all! *This is the most updated and revised version of Daisy Luther's *The Pantry Primer**

Whether you believe an economic collapse is imminent, the power grid is doomed to fail or you preparing because you see how unsustainable this system really is we need to be prepared for anything. We can't afford to get blindsided by something because we were looking in a totally different direction. Preparedness should be a mindset, not a fad. To become a seasoned prepper we need to start from ground zero and work our way up, and we need to do it in a way that doesn't put us in the poor house. Preparing is also very personalized, there is no one way to build your food storage and no one way to build your bug out bag. All of our situations are different and we need to plan accordingly. This is not your typical prepping book; you will not find a list for items you need in the event of a disaster. What you will find is the information you need to build your supplies evenly over time, what to expect from others who are not prepared, form a plan based on our personal situation and do it in a way that helps you become more self-reliant over time. This is more than just another book because we are going to take this a step further and give you full access to the Survivalist Prepper Academy for 60 days. In the academy we have a list of downloadable files, survival courses, prepping courses, spreadsheets and other members only content.

"8 Easy Steps to Disaster Prepping" is a survival book detailing eight simple steps to prepare for any short-term disaster. This book includes tips and suggestions to help the newbie get started in creating a solid prepping base that can eventually be built into a more long-term plan. The 8 steps are nicely detailed throughout the book and it includes the author's own personal Disaster Prepping List that readers can use as a template to tweak as they create their own versions of it. Tanyard Whitebloom is not new to survival prepping. In this introduction he admits, "I started this book not knowing that I was actually writing one. As I spoke to several friends about prepping, they all replied, "I know I have to do that, but I just don't know where to start!" So I thought I would write down a few survival tips for them. Those tips ended up being several pages long and the basis for this book. I guess I know so much about prepping because I have been interested in survival planning since before it was really popular. This comes from the fact that I have been in just about every type of natural disaster since I was a kid." In this book Whitebloom urges everyone to "start somewhere" and begin to prepare with simple survival plans for disaster. There are several scenarios Whitebloom mentions in this book for which to prep. These include Survival plans for economic collapse, prepping for floods, prepping for earthquakes, prepping for blackouts, prepping for hurricanes, prepping for tornadoes, and prepping for civil unrest. Whitebloom's eight steps can be applied to them all.

All empires collapse eventually, and America is no exception. Their reign ends when they are defeated by a larger, and more powerful enemy, or when their financing runs out. From the bestselling author of *CYBER WARFARE* and *EMP: Electromagnetic Pulse*, Bobby Akart undertakes a detailed review of the history of empires and nation-states, and their ultimate demise.

ECONOMIC COLLAPSE is a primer on the reality that our nation will ultimately perish at the hands of economic and societal collapse. The United States economy can collapse as a result of our own government's mismanagement of our national debt or external factors such as a global financial meltdown, an attack on the US Dollar, and other predictable events. Why do you think the Federal Reserve is so frightened of raising interest rates despite apparent underlying inflation data? Our economy is a house of cards. We are just a few steps away from a collapse of the dollar and hyperinflation. History is replete with the rise and fall of empires. Are Americans so arrogant, or oblivious, to realize that we are in a stage of decline and collapse? Some of the signs of decline include a downward cultural spiral, an over-reliance on government and the inability to protect the integrity of a nation's borders. Sound familiar? All empires collapse eventually. There have been no exceptions in the history of humanity. None. All empires end when a more vigorous empire defeats them-or when their financing runs out. If you think the scenarios contained in *The Big Short* by Michael Lewis opened eyes, *Economic Collapse* by Bobby Akart will keep you up at night thinking about

prepping. Because you never know when the day before, is the day before. Prepare for tomorrow! ABOUT THE PREPPING FOR TOMORROW SERIES Freedom Preppers came together in 2011 to share research with others on the subject of prepping.

Originally designed as an informational website, FreedomPreppers.com quickly grew in prominence as its articles on preparedness were shared around the web. The goal of the Prepping for Tomorrow series is twofold. First, provide a detailed analysis of the threats we face as Americans. Second, give new and seasoned preppers alike the opportunity to enhance their preparedness plan with this knowledge. PRAISE FOR THE AUTHOR and PREPPING FOR TOMORROW SERIES Bobby Akart possesses the analytic capability of a supercomputer coupled with the expressiveness of an exceptional writer." ~ Amazon Reviews "A terrifyingly realistic, prescient new series ... which can only be described as prophetic." - G. Michael Hopf, best selling author of The New World series. "Considering how intertwined financial markets and computers are these days, Bobby Akart's warning resonates like Paul Revere riding through the streets of Boston." - Joseph Souza, award winning author of Unpaved Surfaces "Being a fellow Tennessean, not too far from my neck of the woods, I can tell you he is one individual I plan to link up with when/if "it hits the fan." - Steve Bird, Author of the New Homefront series

The Death of Money Sale price. You will save 66% with this offer. Please hurry up! Survival Preparedness: A Beginners Guide to Survival Prepping What would happen to you and your family if suddenly one day you woke up and realized there was no electricity or information grid, and that there was no end to the situation in sight? Would you be able to survive? If you have concerns as to how you and your family would be able to survive in situations such as natural disasters, terrorist attacks, or even economic collapse, then WAIT NO LONGER! Survival Preparedness is an ABSOLUTE MUST READ if you wish to learn how to handle and survive in these emergency situations. Don't think that these things can't happen to you, because every day on the news we hear about everything from wildfires and hurricanes to rampant diseases, terrorist attacks, and wars. Nothing is worse or causes more panic than finding yourself in one of these emergency situations without the proper supplies, survival skills, and without a plan. There are several reasons why thinking about preparing in advance for situations such as a short term emergency or long term crisis can be intimidating and cause for concern. After all, chances are that no one else you know is doing it and you probably don't even know where to begin. It can become an overwhelming task when you consider the large number of supplies you may need and the cost involved in organizing this amount of supplies and equipment. You may also wonder where you are going to store all of these supplies and equipment in a small to average size home. Having a simple plan in place to prepare for disaster before it actually happens is essential. When you are prepared, you'll be able to sleep much better at night knowing you have a plan of action in place. If you wait until an actual disaster happens, chances are it might be too

late to ensure the safety and well being of your family. This is why it is essential to read Survival Preparedness and be prepared! What Makes Survival Preparedness Different? While other survival books may offer some useful information, they often neglect to tell you exactly what you need to do and how to go about it, so it doesn't seem like such a daunting task. All of this information is provided with Survival Preparedness, including a comprehensive prepper list, gear, and supplies. What Does Survival Preparedness Offer? Survival Preparedness provides readers with a step by step plan to use to prepare for survival in times of crisis. By following everything in the book, you can be sure to have most of what you will need to survive a short term crisis situation or long-term survival situation. Specific instructions are provided as to what items to purchase or collect, how much of it to store, as well as how to store it. Survival Preparedness Works With Your Timeline Trying to prepare for long term survival all at once is virtually impossible, which is why Survival Preparedness allows readers to tailor their timeline to accommodate their specific needs. By stocking up on all items needed for each month, within one year you will acquire everything you need for a 72 hour emergency kit, as well as a one year supply of stored food (survival food list) and supplies (survival gear list) required for both shelter and security. Using this guide will allow readers to let go of feelings of panic and stop procrastinating and instead focus on strategy and preparation. Each month will be about working toward specific goals. As you complete these goals, you will feel motivated and develop an attitude of self-reliance so that when you turn on the news and hear about everything that is going on in this world, you'll feel more at peace knowing you have what it takes to survive and keep you and your family safe.

Are you, along with thousands if not millions of other everyday people, hugely concerned about the way things are going in our unstable and unpredictable world? Are you worried about the possibility of a natural catastrophe, an EMP attack that would cause the power grid to collapse, a government takeover in the form of martial law, an economic collapse that could be worse than the Great Depression, a nuclear power plant accident, or any other kind of devastating disaster that you can think of? And most importantly, do you have the skills and knowledge you need to protect your family and friends in the event that such a nationwide wide calamity does indeed happen? If so, there is no reason to deny that you aren't. Millions of people throughout the world, and especially in the United States, have spent the last several years taking very drastic and critical steps to prepare themselves and their families for a large scale and long term emergency scenario. It's never too late to start doing so yourself. So what can you do to start preparing yourself and your family for disaster? The very first thing you need to do is start accumulating knowledge. Only after you have gained knowledge will you be able to convert that knowledge into a useful and lifesaving skill set. This book will serve as an excellent introduction to many of the different hacks that will come in handy during any kind of a survival or disaster situation. Prepping in general is a massive responsibility that you take not only for yourself but for your loved ones as well. Ultimately, how much knowledge you have about survival and disaster preparedness and how well you are able to turn that knowledge into skills will definitely mean the difference between life and death. Now is it possible that a large scale disaster may never happen, at least not in your lifetime? Sure, but that doesn't mean that you shouldn't prepare yourself anyway. After all, the old saying goes that it's always better to be safe than sorry. A scary aspect of disaster preparedness is that we have absolutely no control over when, where, or how it will happen. When it does occur, it will take us by completely surprise and throw us into survival mode in the blink of an instinct. This is why it is always better to be prepared than to not be prepared. The very fact that you're reading this book right now is evidence that you agree with what I am saying in this introduction. You agree that a massive disaster could indeed impact you and your family, and you agree that you need to start gathering knowledge so that you can start to take action immediately. In this book, we're going to go through specific categories (or perhaps more appropriately, priorities) that are related to survival and specific hacks, tips, and strategies that you can follow for each one, including:- Hacks For Adopting the Survival Mentality- Hacks For Avoiding Common Survival Mistakes- Hacks For Gathering and Storing Food- Hacks For Collecting and Storing Water- Hacks For Applying First Aid- Hacks For Home Security and Personal Defense By the end of this book, you will be much more knowledgeable on survival and disaster preparedness, and you will then be able to start transforming that knowledge into a valuable skill set. Now granted, should this book be the only survival or prepping book that you read in your entire life? Of course not. You can never learn too much information and therefore you should never stop reading. The purpose of this book is solely to introduce you to disaster preparedness hacks or to otherwise teach you some hacks you may not have thought of even if you already have begun learning. **DOWNLOAD YOURS NOW!**

The Death of Money Sale price. You will save 66% with this offer. Please hurry up! Economic Collapse and How to Survive In Global Economic Crisis (dollar collapse, preppers, prepper supplies, survival books) Do you know what you'd do in a crisis situation? Are you aware that the government is heading for an economic collapse and you might be left without power, running water, and a food supply if it does? If you've answered no to either one of those questions, you might want to pick up this eBook that explains what you'll need in the event of an SHTF scenario. The governments across the globe are playing a dangerous game with the currency wars that could ruin nations across the globe, and just because you believe you might be in one of the larger ones doesn't mean they will win. In this book, you'll find: How to find food and water and filter the water for safety How to find or secure shelter and clothing to survive cold weather What tools you'll want to keep on hand for when the power goes out Other items and medications you'll need to survive comfortably And so much more Download your copy of " The Death of Money " by scrolling up and clicking "Buy Now With 1Click" button. "History shows that people who save and invest grow and prosper, and the others deteriorate and collapse. As Financial Reckoning Day demonstrates, artificially low interest rates and rapid credit creation policies set by Alan Greenspan and the Federal Reserve caused the bubble in U.S. stocks of the late '90s. . . . Now, policies being pursued at the Fed are making the bubble worse. They are changing it from a stock market bubble to a consumption and housing bubble. And when those bubbles burst, it's going to be worse than the stock market bubble

. . . No one, of course, wants to hear it. They want the quick fix. They want to buy the stock and watch it go up twenty-five percent because that's what happened last year, and that's what they say on TV." —Jim Rogers, author of the bestseller *Adventure Capitalist* from the Foreword to *Financial Reckoning Day* Advanced praise from bestselling authors "An investment book that will not only enlarge your investment horizon, but also make you laugh and thoroughly entertain you for a few hours." —Dr. Marc Faber, author of the bestseller *Tomorrow's Gold* "Financial Reckoning Day is . . . in the category of scintillating sex or good vision, something to be savored and enjoyed before it is too late." —James Dale Davidson, author of the bestseller *The Great Reckoning* and *The Sovereign Individual* "A powerful and insightful vision . . . each paragraph stimulates a new rush of thoughts that fills in gaping holes in the investor's understanding of what has happened to their dreams . . . while prepping them to confront any new confusion that may arrive." —Martin D. Weiss, author of the bestseller *Crash Profits*

This is a modern tale of a family and town that faced economic collapse along with an EMP event. Tabitha tried for many years to teach the families to put up foods and other supplies in case of emergencies. It wasn't about zombies, she just wanted folks to have enough to feed themselves. No one listened, most even mocked her. That is until it all fell apart - the economy, the weather, and finally the grid. They learn to survive and flourish thanks to the efforts of a woman named Tabitha. She is stronger than anyone ever expected as she leads a town to their future.

In this book, we're going to dive in-depth into what must be one of your top priorities when preparing for disaster: building an arsenal of survival guns. Having guns and ammunition in your stockpile is up there with storing enough food, water, and medicine, because it will be useful to you in virtually any kind of a disaster? EMP attack, economic collapse, enemy invasion, terrorist attack, nuclear power plant accident, natural disaster, you name it, you're going to need guns because in each of those scenarios there will be people who will seek to harm you and your family and you must be able to protect yourselves. In each of those scenarios, burglars, intruders, raiders, and mobs are going to be patrolling the streets preying on the innocent. They will especially target people who they believe have items of value, and if they have reason to believe that you have food in the home, they can and will come knocking on your door. In the day and age we live in, you simply have to have firearms and a healthy stockpile of ammunition in order to consider yourself adequately protected when it comes to security. This book is going to be a very straightforward beginner's guide that covers three very simple topics: 1. Why Do You Need To Have An Arsenal Of Survival Guns? 2. Building Your Survival Arsenal 3. How To Store Plenty Of Guns For The Long Term If you're already an expert on guns, I have to warn you that you're probably not going to find much information in this book that you don't already know. But on the other hand, if you're someone who is new to guns and prepping in general and you are looking for a short and yet resourceful book that covers the basics of what you need to know on storing guns and ammunition, then this will be just the guide you are looking for.

In this book, I'm going to tackle a subject that I feel doesn't receive nearly as much attention as it should in survival and prepping circles: how to work with your neighbors to keep your neighbors safe and secure during a survival or disaster scenario. The information in this guide will work for practically any kind of a disaster that you can think of, whether it be an EMP attack, terrorist attack/enemy invasion, a natural disaster, an economic collapse, or whatever else. When people think about what they will do in the midst of the disaster, most imagine themselves either going it alone or just working with their family. I'm here to tell you that your chances of survival will always go up if you make your survival efforts a cooperative effort with your neighbors instead...even if you don't know your neighbors that well or at all. We will dive into the benefits of working together as a neighborhood, how to keep yourself organized and well supplied, how to protect your neighborhood from angry mobs and raiders, and so on. The specific subjects that we are going to cover include the following: - A United Neighborhood Is Stronger Than A Divided Neighborhood - How You Can Get Your Neighbors On Board With You - Assigning Roles To Your

Neighbors- Making Your Neighborhood Sustainable - Securing Your Neighborhood During A Disaster- Defending Your Neighborhood Against Attack
By the end of this book, you will realize why working together with your neighbors in a disaster situation is so critical and how you can work with them effectively to ensure that every single one of you survive.
