In particular, they expressed the need and will to develop policy and management tools that could lead to a strategy of sustainable growth from an economic, social and environmental point of view. The Programme turned out to be a success (it involved, up to June 2007, more than 2000 trainees from almost all the Provinces of China) precisely because the forces that answered those needs are extremely diverse as to include the academia, national and local governments, public institutions, private companies and international agencies. Following this feature, the book's contributors have been selected among more than 300 professors, researchers, policy makers, and entrepreneurs involved in the Training activities, thus offering different approaches to the key questions of environmental management.

This is a package consisting of Begg's Economics (0077099478) and Microeconomics (0071153543) by Katz and Rosen.
