Educational Psychology is written to show how information and ideas drawn from research in educational psychology can be applied to solve the everyday problems of teaching. The Sixth Canadian Edition continues to emphasize the educational implications and applications of research on child development, cognitive science, learning, motivation, teaching, and assessment.

Educational Psychology is written to show how information and ideas drawn from research in educational psychology can be applied to solve the everyday problems of teaching. The seventh Canadian edition maintains the lucid writing style for which the book is renowned. The text provides accurate, up-to-date coverage of the foundational areas within educational psychology: learning, development, motivation, teaching, and assessment, combined with intelligent examination of emerging trends in the field and society that affect student learning, such as student diversity, inclusion of students with special learning needs, education and neuroscience, and technology.

This first European adaptation of Anita Woolfolk's market-leading text Educational Psychology is unrivalled in its field and is essential reading for anyone studying or interested in education from a psychological perspective. Thoroughly rewritten in a European context, this truly comprehensive book blends cutting edge theory and the latest international research with a wealth of examples, practical applications and tips from experienced educational practitioners, working in a broad range of settings. Extensive pedagogy with features such as Discussion Points and Chapter Summaries promote ease of learning and therefore make this a must-have text for anyone studying in this field.

Learning and teaching is an integrated process, and theory and practice cannot be separated. As in the previous Australasian edition, Educational Psychology 3e continues to emphasise the educational implications and applications of child development, cognitive science, learning and teaching. Recurring themes throughout the text include ideas about education; social and socio-cultural aspects of education; schools, families and community; development, learning and curriculum; and effective teaching. Author Kay Margetts incorporates Australasian perspectives and applications using the work of Australasian researchers and teachers. Numerous examples, case studies, guidelines and practical tips from experienced teachers are used in the text to explore the connections between knowledge, understanding and practice.

Derived from Anita Woolfolk's market-leading Educational Psychology, Eleventh Edition, the most thorough, accessible, and authoritative text on the market, the Active Learning Edition breaks the material into manageable "modules." To provide customers with an alternative version to the longer chapters of the standard 11th Edition, that version's 15 chapters now appear as 40 brief modules, which are easy to cover in shorter academic terms and will make learning easier for students. In addition to presenting comprehensive, expert coverage of all topics teachers need to understand about how students learn and all the classroom applications for which the author is justly renowned, the modules are grouped into clusters that allow for deeper context and background for each topic. Further, each module is a self-contained learning unit, with learning objectives and both in-text and online review materials that provide immediate reinforcement of key concepts and build students' confidence in their grasp of the material. Adding to its interactivity are 14 end-of-cluster "Active Learning Connections" features filled with activities that direct students to new and emerging technologies, connecting them with one another and other students through wikis, blogs, and many other useful technology resources and web sites. This Student Value Edition is a three-hole punched, loose-leaf version of the textbook and provides students the opportunity to personalize their book by incorporating their own notes and taking only the portion of the book they need to class – all at a fraction of the bound book price.

Educational Psychology 4e incorporates Australasian perspectives and applications using the work of Australasian researchers and teachers. Taking an applied approach, this edition continues to emphasise the educational implications and applications of child development, cognitive science, learning and teaching. Numerous examples, case studies, guidelines and practical tips from experienced teachers are used in the text to explore the connections between knowledge, understanding and practice.

This new edition of the European adaptation of Anita Woolfolk's market-leading US text, Educational Psychology, is essential reading for anyone studying or interested in education and learning from a psychology perspective. The second edition includes new work in the areas of Assessment for Learning and Attachment Theory, as well as reflecting recent changes in Special Educational Needs provision. The text shows how information and ideas drawn from cutting-edge research in educational psychology can be applied to solve the everyday problems of teaching and child development.

'This wide-ranging and theoretically grounded text is set to become a classic in the psychology of education.' Alec Webster, Emeritus Professor of Educational Psychology, University of Bristol 'This is an exceptionally strong book that explains the psychology in education in a clear and vivid way. I also appreciated the European approach of the book... I would certainly recommend educators to use this book.' Sofie Loyens, Assistant Professor at the Department of Psychology, Erasmus University Rotterdam, The Netherlands

They find it easy to read, interesting and engaging. . . . This textbook's major strengths are its cognitive perspective, its readability, and the fact that it puts into practice some of the information-processing strategies that it teaches as effective ways to process information. . . ." --Elizabeth Pemberton, University of Delaware "[T]he text is written in a . . . conversational style that invites students to actively explore complex questions about teaching and learning. It is well-organized, supported with visual aids, and various learning tools, such as guidelines, reflection activities, and cases presenting opposing viewpoints. Most importantly, the text is informed and well supported by contemporary scholarship in the field of educational psychology." --Alina Reznitskaya, Montclair State University

For years the gold standard in its field, the new Canadian edition of Educational Psychology continues that tradition of excellence with updated Canadian content and statistics, an enhanced layout, improved pedagogy, and fully integrated MyEducationLab media content. This fifth Canadian edition emphasizes Canada's multicultural context and provides information about reaching diverse learners with added content through the text. As well, the new "Diversity and Convergences" sections highlight the similarities and differences among students in today's classroom. An entire new chapter, "The Learning Sciences and Constructivism" explores the latest findings of modern views about education. Along with its new content, Educational Psychology continues to integrate foundational theories and recent research and demonstrates how to apply this knowledge in real life situations. It shows how and why students learn and the roles of educational professions in motivating and guiding learning. Point/Counterpoint boxes acknowledge controversies and prepare readers to make informed decisions. In maintaining its tradition of excellence, and enhancing its design and content, Educational Psychology, 5th Canadian Edition will remain the gold standard in the field.
