This book brings to the forefront the challenges and opportunities of change by combining insights from practice, research, and theories of change management to examine nonprofits. It incorporates interdisciplinary perspectives to examine the dimensions, determinants, and outcomes of change in nonprofits. It offers managers, researchers, and students case examples on how to develop, implement, and manage change in the context of nonprofits. both corporate and nonprofit organizations. The authors take a fresh approach to the study of leadership: they perform research in nonprofits both to understand and appreciate their complexities, and to reach conclusions about the nature of leadership in any context, including for-profit and governmental entities. Moving from nonprofit to for-profit in this way reverses the flow of ideas as represented in the mainstream literature of leadership. The authors' journey leads through case studies of remarkable leaders succeeding in complex situations. The book explores contemporary versions of leadership as embedded in American culture. It develops the concept of good fit between the leader and circumstances in which she or he must lead; it reveals predictable leadership dynamics and cycles; it explains how leaders can increase the readiness for change in their organizations; it describes the felt experience of "flow" when successful leaders are lost in the moment. Although each chapter employs a different lens, the object is the same throughout—leadership as the practice of alignment. The result is a multifaceted view of leadership as a complex system of shifting interrelationships that yields insights useful to students, researchers and leaders themselves.

Features and Benefits: Critical review of literature on leadership which encourages diversity in leadership models and approaches. Case studies of nonprofit leadership which affirm public-minded, mission-driven leaders and acknowledge their contributions. Overarching concept of alignment which reframes leadership as an active process where the awareness of and response to the interplay of multiple, relevant factors matters more than charisma, pedigree or power.

Typical leadership books focus on motivating people. This book addresses both motivating people and improving the processes people use in their work. This is crucial because it is through empowering workers to control and improve their work processes that the highest level of worker motivation is achieved and the most effective organization is developed."--Jacket.
