This illustrated volume presents myths from five ancient cultures: Egyptian,
Greek, Roman, Celtic and Norse.

In *Quest for Conception*, Marcia C. Inhorn portrays the poignant struggles of
poor, urban Egyptian women and their attempts to overcome infertility. The
author draws upon fifteen months of fieldwork in urban Egypt to present moving
stories of infertile Muslim women whose tumultuous medical pilgrimages have yet
to produce the desired pregnancies. Inhorn examines the devastating impact of
infertility on the lives of these women, who are threatened with divorce by their
husbands, harassed by their husbands' families, and ostracized by neighbors.

One of the most persistent themes in myth and legend from the world's many
cultures is the story of the journey - the quest. In *Mythical Journeys, Legendary
Quests*, Moyra Caldecott shows the connection between the sacred, mythic
journeys as found in legend and story and the real journey of the individual soul
towards enlightenment. This perennial quest for reassurance in the face of
human mortality is spread as wide as our existence on the planet and throughout

history. Indeed Carl Jung and Joseph Campbell have shown us that myth and legend are not just fantasy tales for children. They are powerful expressions, in code, of a deep yearning towards an understanding of human existence. Moyra Caldecott has selected material from many cultures to illustrate this: from ancient Egypt and Sumeria to aboriginal Australia, pre-Columbian America, Vietnam, India, Africa and Europe. For each legend she provides background on its origin and detailed analysis of its meaning and significance.

Women artists of the Harlem Renaissance dealt with issues that were unique to both their gender and their race. They experienced racial prejudice, which limited their ability to obtain training and to be taken seriously as working artists. They also encountered prevailing sexism, often an even more serious barrier. Including seventy-two black and white illustrations, this book chronicles the challenges of women artists, who are in some cases unknown to the general public, and places their achievements in the artistic and cultural context of early twentieth-century America. Contributors to this first book on the women artists of the Harlem Renaissance proclaim the legacy of Edmonia Lewis, Meta Vaux Warrick Fuller, Augusta Savage, Selma Burke, Elizabeth Prophet, Lois Maillou Jones, Elizabeth Catlett, and many other painters, sculptors, and printmakers. In a time of more

rigid gender roles, women artists faced the added struggle of raising families and attempting to gain support and encouragement from their often-reluctant spouses in order to pursue their art. They also confronted the challenge of convincing their fellow male artists that they, too, should be seen as important contributors to the artistic innovation of the era.

Introduce readers to the elaborate mythology of ancient Egypt. This book provides detailed discussion of the mythology's importance to its own culture and the impact it had on subsequent cultures. The numerous deities worshipped by the ancient Egyptians are described and their importance to different groups and in different regions within the empire are explained. Stories are retold along with explanation of how they reflect the values and concerns of Egyptian culture. Readers will also learn how the myths have made their way to Pop culture.

Before Writing gives a new perspective on the evolution of communication. It points out that when writing began in Mesopotamia it was not, as previously thought, a sudden and spontaneous invention. Instead, it was the outgrowth of many thousands of years' worth of experience at manipulating symbols. In Volume I: From Counting to Cuneiform, Denise Schmandt-Besserat describes how in about 8000 B.C., coinciding with the rise of agriculture, a system of counters, or tokens, appeared in the Near East. These tokens—small, geometrically shaped objects made of clay—represented various units of goods and were used to count and account for them. The token system was a breakthrough in data processing and communication that ultimately led to the invention

of writing about 3100 B.C. Through a study of archaeological and epigraphic evidence, Schmandt-Besserat traces how the Sumerian cuneiform script, the first writing system, emerged from a counting device. In Volume II: A Catalog of Near Eastern Tokens, Schmandt-Besserat presents the primary data on which she bases her theories. These data consist of several thousand tokens, catalogued by country, archaeological site, and token types and subtypes. The information also includes the chronology, stratigraphy, museum ownership, accession or field number, references to previous publications, material, and size of the artifacts. Line drawings and photographs illustrate the various token types.

'What is the basic building block of the universe?' Thales of Miletus was the first to ask this fundamental, yet to be answered, question in the sixth century B.C. This book offers an in-depth account of the answers he gave and of his adventure into many areas of learning: philosophy, science, mathematics and astronomy. Thales proved that the events of nature were comprehensible to man and could be explained without the intervention of mythological beings. Henceforth they became subject to investigation, experiment, questioning and discussion. Presenting for the first time in the English language a comprehensive study of Thales of Miletus, Patricia O'Grady brings Thales out of pre-Socratic shadows into historical illumination and explores why this historical figure has proved to be of lasting significance.

Drawing on archaeological and literary evidence, Dilwyn Jones examines the importance of the boat in Egyptian ritual and belief, as well as in everyday life. The sun god was thought to travel across the sky in a solar boat, and Egyptians believed that the deserving might join the god Osiris in his divine bark after death. Boats played an important part in funerary ritual; models were often placed in tombs to provide the deceased with safe passage through the Winding Waterway in the underworld. Also, boats are frequently depicted in tomb paintings. The Nile has always been a vital transport artery for Egypt and boats the principal means of travel. Early papyrus skiffs gradually gave way to wooden craft of increasing size and sophistication, ranging from fishing boats and barges to seagoing warships, splendid ships of state and enormous obelisk barges used to transport stone to temples and monuments. Dilwyn Jones traces the development of the different types of boats and the techniques of their construction through the Old, Middle, and New Kingdom periods. The book is illustrated with photographs of boat models and paintings and with line drawings.

A book of wisdom teachings and rituals that invoke ancient Egyptian deities to awaken human consciousness • Provides guided shamanic visualizations to invoke 26 of the most significant gods • Takes the reader through shamanic portals of death, rebirth, and illumination • Reconciles internal conflict through a sacred marriage of heart and mind

In *Shamanic Mysteries of Egypt*, Nicki Scully and Linda Star Wolf renew humanity's connection to the ancient gods of Egypt, the neteru. Voices from these divine ancestors remind us of the healing power of the heart, and call us to bring their consciousness into the present to help us remember our true nature as divine humans with sacred purpose. The authors

provide rituals, meditations, and rites of passage to help us meet our personal and planetary challenges with grace, wisdom, and love. The shamanic initiations provided are invoked, directly experienced, and transformed into embodied wisdom that awakens consciousness and illumines the intelligence of the heart. Scully and Star Wolf focus their rituals on 26 of the primary divine entities that preside over the ancient mysteries whose roots are in Old Kingdom and pre-historic Egypt. This fresh interpretation of ancient mysteries unites the energies of Thoth and Anubis to guide us through the current cycle of Earth changes and to help us remember who we really are at heart. Through these passages, Anubis lives up to his ancient title as the Opener of the Way, and Thoth as the Architect of Higher Learning. Together they evoke their power to unite heart and mind in the sacred marriage that brings transformation, renewal, and the awakening of consciousness.

A type of folklore, myth is central to all cultures. Written by a leading authority and of use to high school students, undergraduates, and general readers, this reference offers a convenient overview of the role of myth around the world. The volume defines and classifies types of myth and provides examples from different cultural traditions. It then overviews various approaches to studying myth. This is followed by a look at myth in relation to its contexts, such as religion, politics, and popular culture. The volume closes with a bibliography of print and electronic resources and a glossary.

intellectual struggles of the Egyptians to explain the beginning of the world. The myths that follow range from stories about the gods-- the murder of Osiris and vengeance of Horus, Isis and the seven scorpions, Sakhmet and the virtual slaughter of mankind-- to fables such as the Shipwrecked Sailor and the Enchanted Island. Through these delightful and often amusing tales, we can appreciate more fully the beliefs and imagination of the ancient Egyptians. The calendar material in this expanded edition of *Walk Like An Egyptian* provides further insight into the mind of the ancient world, a glimpse into a world in which every element of reality was a manifestation of the divine and the cosmic, a time in which even the counting of days and months into years was a mystery of divine proportions. The calendar of ancient Egypt is older than astrology. The Egyptian calendar itself is almost forgotten, yet it is the direct ancestor of the Western calendar in use today. The ancient Egyptians were keenly focused on the concept of life as a journey through time, and the calendar was their map. In *Walk Like An Egyptian*, you will find one of the world's oldest guides to self-navigation in an easy-to-use format, a daily horoscope from the dawn of history. Each season, month and day is listed with its ancient name, together with the warnings and requirements, stories and scenarios of the gods involved in the story of the year. The day is divided into eight-hour segments of morning,

afternoon and night. Sacred ceremonies and ritual feasts are also listed, making the calendar a complete guide to the Egyptian year, a horoscope unlike any other available in the modern world. The earlier editions of *Walk Like An Egyptian* brought the concepts of ancient Egyptian religion and philosophy into the context of the modern world. Readers around the globe found the once-obscure ideas of ancient wisdom interpreted as profound contemplations of the reality of human nature. Many familiar names in the ancient pantheon were revealed in modern terms, such as: Osiris, the divine and immortal portion of each human's soul clothed in mortal flesh; Re, the divine light of consciousness in the mind; Horus, who is the paradox of the universal nature of each soul's unique identity; Isis, bonding force of the soul; Thoth, representing the power of human thought and intellect, and more. The success of *Walk Like An Egyptian* led to Wheeler's collaboration with Diana Janeen Pierce, who had assembled a daily calendar of ancient Egyptian ceremonies, rituals and festivals. Wheeler and Pierce worked together on a translation of the lengthy and difficult Cairo Calendar Papyri, one of the few surviving documents detailing the system by which Egyptians organized their daily lives. Wheeler's accompanying interpretation of the Egyptian cosmos makes a lively counterpart to the horoscope, clarifying the often confusing material. Together, Wheeler and Pierce provide a modern evaluation of how to
