This is the first book to overtly consider how basic evolutionary thinking is being applied to a wide range of special social, economic, and technical problems. It draws together a collection of renowned academics from a very disparate set of fields, whose common interest lies in using evolutionary thinking to inform their research.

The book contains the Proceedings of the 2010 Conference of the Italian Systems Society, see also www.AIRS.it. Papers will deal with the interdisciplinary study of processes of changing related to a wide variety of specific aspects. Attempts to deal with them, based on generalising approaches used to study the movement of bodies and environmental influence, have included

ineffective reductionistic simplifications. Indeed changing also relates, for instance, to processes of acquisition and varying properties such as for software; growing and aging biological systems; learning/cognitive systems; and socio-economic systems growing and developing through innovations. The aim of the book is to present very advanced studies and the generalisation of processes of changing as for processes of emergence. Papers in the book study the problem considering its transdisciplinary nature, i.e., systemic properties studied per se and not within specific disciplinary contexts. The aim of these studies is to outline a transdisciplinary theory of changes in systemic properties. Such a theory should have simultaneous, corresponding and eventually hierarchical disciplinary aspects as expected for a general theory of emergence. Within this transdisciplinary context, specific disciplinary research activities and results are assumed to be mutually represented as within a philosophical and conceptual framework based on the theoretical centrality of the observer. Models and theories will be based on the conceptual inseparability between observer and observed as in constructivism and for logically open systems. Contributions will deal such issues in interdisciplinary ways considering theoretical aspects and applications from Physics, Cognitive Science, Biology, Artificial Intelligence,

Traditional Chinese edition of Drive: The Surprising Truth About What Motivates Us by Daniel Pink. Challenges the fact that humans are motivated by hope of gain and loss of fear, citing examples that intrinsic motivation comes from the opportunity to grow, to have some autonomy over the work that we do, and to take part in something bigger than oneself.

Amazon's top 10 best-selling business organization category. A high score of 4.8 stars by Amazon readers. The best-selling writers of New York Times and Wall Street Journal. We all have our own mountains to climb. On the way to the summit, we can only rely on our vision. The chief executive of the company personally teaches the principles of leading high-performance teams, learns the blueprint for the future of Airbnb, Instagram, Amazon, and Marvel, outlines a clear and pragmatic vision, and even difficult goals can be gradually achieved!

One day it happens. You end up in charge of a team as a manager, technical team leader, architect, or scrum master. The team is looking to you for guidance. Personality clashes need to be worked out. Heated debates need to be mediated, and the team is constantly putting out fires instead of doing the right things, the right way. Everyone wants to do the right thing, but nobody seems to doing it. This is where leaders can get stuck and need the guidance that elastic leadership

offers. This framework and philosophy of leadership can help as they strive to manage day-to-day and long term challenges, and create the elusive self-organizing team by coming to understand that their leadership needs to change based on the needs and goals of the team. Elastic Leadership offers a set of values, techniques, and practices to consider in current or future leadership roles. First, it looks at the elastic leadership philosophy—a way of navigating the leadership world that provides a moral compass when making decisions, large and small. It includes the leader manifesto, and the elastic leadership framework phases (survival mode, learning, and self organization). Readers will discover a set of techniques and practices the author has acquired along his own journey that will complement and support their moral compass. Next, the book provides a set of thoughts and notes from other leaders, with accompanying annotations from the author about how they fit into the overall framework and compass. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

The proposed SDN discusses the specific macro-critical aspects of women’s participation in the labor market and the constraints that prevent women from developing their full economic potential. Building on earlier Fund analysis, work undertaken by other organizations and academic research, the SDN presents possible policies to overcome these obstacles in different types of countries.

Christianity needs powerful voices in today's world, voices from strong leaders guided by God and devoted to Christ.
