### Traditional Chinese Edition of Pig the Tourist

Two engineers hijack a spaceship to join some space pirates—only to discover the pirates are hiding from a malevolent AI. Now they have to outwit the AI if they want to join the pirate crew—and survive long enough to enjoy it. Adda and Iridian are newly minted engineers, but aren't able to find any work in a solar system ruined by economic collapse after an interplanetary war. Desperate for employment, they hijack a colony ship and plan to join a famed pirate crew living in luxury at Barbary Station, an abandoned shipbreaking station in deep space. But when they arrive there, nothing is as expected. The pirates aren't living in luxury—they're hiding in a makeshift base welded onto the station's exterior hull. The artificial intelligence controlling the station's security system has gone mad, trying to kill all station residents and shooting down any ship that attempts to leave—so there's no way out. Adda and Iridian have one chance to earn a place on the pirate crew: destroy the artificial intelligence. The last engineer who went up against the AI met an untimely end, and the pirates are taking bets on how the newcomers will die. But Adda and Iridian plan to beat the odds. There's a glorious future in piracy...if only they can survive long enough.

Simplified Chinese edition of 12 Rules for Life: An Antidote to Chaos

?????:The machine that changed the world

A smooth-talking ex-sergeant, accustomed to an easygoing peacetime military, unexpectedly re-joins the fleet and finds soldiers preparing for the strangest thing—war. The two hundred years' (and counting) peace is a time of tranquility that hasn't been seen since...well, never. Mankind in the Galactic Age had finally conquered war, so what was left for the military to do but drink and barbecue? That's the kind of military that Sergeant R. Wilson Rogers lived in before he left the fleet to become a smuggler. But it turns out that smuggling is hard. Like getting-arrested-for-dealing-with-pirates-and-forced-back-into-service kind of hard. It doesn't seem so bad—the military was a perpetual tiki party anyway—but when Rogers returns after only a year away, something has changed. These are soldiers—actual soldiers doing actual soldier things like preparing for a war that Rogers is sure doesn't exist. Rogers vows to put a stop to all this nonsense—even if it means doing actual work. With an experienced ear for military double-speak, Zieja has created a remarkable and sarcastic adventure.

Fire engines are some of the most impressive and sophisticated vehicles. With bright conspicuous colors, strobe warning lights and wailers, and carrying an impressive amount of kit, these firefighting machines are truly awesome. This comprehensive book presents a complete history of firefighting from Roman times to the present day, as well as a wide-ranging encyclopedia of major fire engine manufacturers from around the world. Section One: The World of Fire Engines and Firefighting charts the history of firefighting and the development of the fire engine from bucket chains and manual pumps designed to be pushed or pulled to the scene of a fire by hand. Horse power, steam power, electric batteries and the coming of the motor age saw impressive changes in the design and engineering of fire trucks. With vast social change in the twentieth century, increasingly sophisticated technology in the home, and ever more dangerous chemicals in use in industry, the role of the fire service has broadened to encompass a wide range of emergency and rescue work.
