

En Bons Termes Edition

This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in

another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

En Bons Termes

From the New York Times bestselling author of the smash hit One Second After series comes 48 Hours, a

nail-biting and prescient thriller about a solar storm with the power to destroy the world's electrical infrastructure. In 48 hours, the Earth will be hit by a Coronal Mass Ejection (CME) from the Sun, a "Carrington Event" that has the power to shut down and possibly destroy the world's electrical infrastructure. To try and prevent permanent damage, everything goes dark prior to the hit: global communications are shut down; hospital emergency generators are disconnected; the entire internet, media broadcasting, and cell phone systems are turned off. Will the world's population successfully defend itself in the wake of the CME, or will mass panic lead to the breakdown of society as we know it? William R. Forstchen is at his best in *48 Hours*, a tale of the resilience of American citizens when faced with a crisis. The view of translation as a socially regulated activity has opened up a broad field of research in the last few years. This volume deals with central questions of the new domain and aims to contribute to the conceptualisation of a general sociology of translation. Interdisciplinary in approach, it discusses the role of major representatives of sociology like Pierre Bourdieu, Bruno Latour, Bernard Lahire, Anthony Giddens or Niklas Luhmann in establishing a theoretical framework for a sociology of translation. Drawing on methodologies from sociology and integrating them into translation studies, the book questions some of the established categories in this discipline and calls for a redefinition of long-assumed principles. The contributions show the social involvement of translation in various fields and focus especially on the translator's position in an

emerging sociology of translation, Bourdieu's influence in conceptualising this new sub-discipline, methodological questions and a sociologically oriented meta-discussion of translation studies.

Gregoire was an early nineteenth century French Roman Catholic bishop who turned his attention to the place of African Americans in Catholic and Euro-American thought. His work is, among other things, a devastating critique of Thomas Jefferson's Notes on the State of Virginia, in which the third president muses about black inferiority. Gregoire's views made an American edition difficult, as Jefferson opposed the book's appearance. An Enquiry is one of the few of Gregoire's thirty-plus books to be translated into English, and its publication in Brooklyn in 1810 was an event for African Americans. In this new edition, Graham Hodges presents a pristine reproduction of the original text in modern font, and offers a critical

introduction to Gregoire, Franco-American abolitionism, and the influence of this important work on the development of the African American intellectual tradition.

Enemy Force (1903) is a ground-breaking, surrealist novel about a poet who is locked in a lunatic asylum and who mysteriously becomes possessed by an "Enemy Force," possibly an alien being from a hellish planet orbiting the star Aldebaran. Both tragic and satirical, emotional and visionary, it is considered by many scholars to be a forgotten masterpiece of early science fiction. John-

Antoine Nau (1860-1918) was himself an eccentric French poet and writer who led a marginal existence and whose works remained mostly unpublished until long after his death. **FIRST WINNER OF THE PRESTIGIOUS LITERARY GONCOURT AWARD (1903).** "The best [novel] that we ever crowned."

Social life is in a constant process of change, and sociology can never stand still. As a result, sociology today is a theoretically diverse enterprise, covering a huge range of subjects and drawing on a broad array of research methods. Central to this endeavour is the use of core concepts and ideas which allow sociologists to make sense of societies, though our understanding of these concepts necessarily evolves and changes. This clear and jargon-free book introduces a careful selection of essential concepts that have helped to shape sociology and others that continue to do so. Going beyond brief, dictionary-style definitions, Anthony Giddens and Philip W. Sutton provide an extended discussion of each concept which sets it in historical and theoretical context, explores its main meanings in use, introduces relevant criticisms, and points readers to its ongoing development in contemporary research and theorizing. Organized in ten thematic sections,

the book offers a portrait of sociology through its essential concepts, ranging from capitalism, identity and deviance to globalization, the environment and intersectionality. It will be essential reading for all those new to sociology as well as anyone seeking a reliable route map for a rapidly changing world.

Prison changes a man. Sometimes in ways you can see. Usually in ways you can't. On the day he gets out, Henry promises Evan he will find his daughter, the daughter he never met, and deliver a letter. But Henry isn't about to give up. Carson's behaviour towards him grows threatening, and Henry realises

Part One of Montesquieu's *Idea of Justice* comprises a survey of the currency in philosophical, ethical and aesthetic debate during the second half of the 17th century of the terms *rapport* and *convenance*, which are central to the enigmatic definition given to justice by Montesquieu in *Lettres Persanes* LXXXIII. In this survey, attention is concentrated on the way in which the connotations of these terms fluctuate with the divergent development of the methodological and speculative outgrowths of Cartesianism into two schools of thought, materialist and idealist, often widely at variance in their views of the nature and organization of the universe. In Part Two, Montesquieu's definition of justice is set against this background, whose doctrinal conflicts, because of the characteristic associations of its key terms, it may be taken to reflect, just as it may be held to epitomize, by virtue of its elaboration in the opening chapter of *De l'Esprit des Lois* and its close terminological affinities with the definition of law there given, an undoubtedly related conflict between the implications of causal determinism and the aspirations of idealist metaphysics surviving at the heart of Montesquieu's outlook, and, remaining unresolved, often said to impair the coherence if not the validity of his theory of society.

The global financial crisis of recent years and the associated large fiscal deficits and debt levels that have impacted many countries underscores the importance of reliable and timely government statistics and, more broadly, public sector debt as a critical element in countries' fiscal and external sustainability. *Public Sector Debt Statistics* is the first international guide of its kind, and its primary objectives are to improve the quality and timeliness of key debt statistics and promote a convergence of recording practices to foster

international comparability and as a reference for national compilers and users for compiling and disseminating these data. Like other statistical guides published by the IMF, this one was prepared in consultation with countries and international agencies, including the nine organizations of the Inter-Agency Task Force on Finance Statistics (TFFS). The guide's preparation was based on the broad range of experience of our institutions and benefitted from consultation with national compilers of government finance and public sector debt statistics. The guide's concepts are harmonized with those of the System of National Accounts (2008) and the Balance of Payments and International Investment Position Manual, Sixth Edition.

This book demonstrates the importance of Léon Duguit for property theory in both the civil and common law world. It translates into English for the first time ever Duguit's seminal lecture on property, the sixth of a series given in 1911 in Buenos Aires. It also collects essays from the leading experts on the social function of property in major civil and common law jurisdictions internationally. The book explores the importance that the notion of the social function of property has come to have not only in France but in the entire civil law tradition, and also considers the wide – if un-attributed and seldom regarded – influence in the common law tradition and theory of property.
