Selected, peer reviewed papers from the 3rd International Conference on Mechanical & Manufacturing Engineering 2012, November 20 – 21, 2012, Malaysia. The conference offers a platform for researchers, academicians, technologist, policy makers, industrialists and students to share, discuss and highlight their research findings particularly works that related to research and technological developments and knowledge transfers keeping in mind the main theme Sustainable

Engineering towards Green Technology

This volume is intended to provide an up-to-date overview of the approaches, methodologies and techniques devoted to better understanding of the weathering conditions of rock masses on slopes. According to the local conditions, a variety of slope movements may take place and involve weathered rock masses. Shallow and rapid soil slips evolving to debris flows are probably the most common type of slope movement. At the same time, deep-seated, intermittent landslides can also affect large volumes of weathered rocks and soils. Despite the high frequency of landslides in weathered materials, and the damage and casualties they repeatedly cause, little is known about the relationship between weathering and slope movements. This book presents worldwide case studies, where a variety of geological and geomorphological settings are discussed. The content is divided into three sections: the first is devoted to broad aspects of the weathering/landslide processes; the second and third sections include papers dealing with igneous/metamorphic and sedimentary weathered rocks, respectively.

Where To Download Engineering Mechanics Static By Mariam Yuchaiore

Review: "Islamic Civilization: History, Contributions, and Influence - A Compendium of Literature is a window to literature pertaining to Islamic history and Islam's contributions to knowledge and its influence in medieval Europe. The book is unique in that it presents more than mere annotations - it is a collection of "literature briefs," detailed and focused descriptions of each of the more than six hundred books and articles covered." "In the post-9/11 environment, there has been a surge of interest regarding all things Islamic. While much of the new literature is refreshingly positive, some works demonstrate a revival of centuries-old misconceptions about the Islamic world. Islamic Civilization examines that dichotomy through literature that the author has accumulated over the past twenty years in connection with other research endeavors concerning early Islamic social thought; thus, most references have a social-science/humanities orientation. Students, research scholars, and professionals will find this bibliography full of useful resources and a stimulus for further reading."--BOOK JACKET

This e-book is a compilation of papers presented at the Mechanical Engineering Research Day 2015 (MERD'15) - Melaka, Malaysia on 31 March 2015.
