Main entries are in Romanized Japanese with Chinese characters, if any. In the second line, parts of speech label ([n.] for nouns and [v.] for verbs) and the entry's Chinese equivalents in Pinyin (Romanized standard Chinese pronunciation) followed by Chinese characters (both simplified and traditional if applicable). Then, in the third line, entry's English equivalents with standard American pronunciation with focus on stressed syllable*in bold print.. A syllable is part of a word that contains one vowel sound. In every word of two or more syllables, one syllable is stressed. It's called 'stressed syllable'. The vowel sound in that syllable is louder, higher in pitch, and longer than the other vowel sounds in the same word. The contrast between stressed and unstressed syllables is very important because it helps to create the rhythm of English. The native English speakers rely more on stressed syllable to understand what you say than on the individual sounds of the word. This book is ideal for learners of Japanese, Chinese, and English as a second language who want to communicate more effectively. [Sample] ashita ?? [n.] míng rì ?? tomorrow [t?ma:rou] asobi ?? [n.] yóu xì ?? (??) play [plei] chikuseki ?? [n.] j? xù ?? (??) accumulation [?kyu:m?lei??n]

This invaluable interpretive tool, first published in 1937, is now available for the first time in a paperback edition specially aimed at students of Chinese Buddhism. Those who have endeavoured to read Chinese texts apart from the apprehension of a Sanskrit background have generally made a fallacious interpretation, for the Buddhist canon is basically translation, or analogous to translation. In consequence, a large number of terms existing are employed approximately to connote imported ideas, as the various Chinese translators understood those ideas. Various translators invented different terms; and, even when the same term was finally adopted, its connotation varied, sometimes widely, from the Chinese term or phrase as normally used by the Chinese. For instance, klésa undoubtedly has a meaning in Sanskrit similar to that of, i.e. affliction, distress, trouble. In Buddhism affliction (or, as it may be understood from Chinese, the afflictors, distressers, troublers) means passions and illusions; and consequently fan-nao in Buddhist phraseology has acquired this technical connotation of the passions and illusions. Many terms of a similar character are noted in the body of this work. Consequent partly on this use of ordinary terms, even a well-educated Chinese without a knowledge of the technical equivalents finds himself unable to understand their implications. "DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone." --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York
"Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted." --William S.Y. Wang, professor of linguistics, University of California at Berkeley
