This volume provides an overview of all aspects of Hong Kong English in a style designed for undergraduates and general readers. As a former British colony, Hong Kong used English as the language of government, law and education in the early days of colonial rule. Since the Handover from British to Chinese rule in 1997, it is no longer used as the primary language of government. However, the status of English has survived the decline of colonial rule, as English has become an international language which is indispensable for a service-oriented economy such as present-day Hong Kong. Its use is still widespread in legal contexts, and English is the medium of instruction in at least a quarter of secondary schools. Outwith the realm of education, English is important as a means of international communication in the fields of banking and finance, business, and in the tourism and hospitality industry. English is therefore integrated into Hong Kong life in various ways and this has resulted in a thriving and developing variety of English. This book describes English in Hong Kong as a linguistic phenomenon from the point of view of language structure, but also takes into account historical, socio-cultural and socio-political developments.

A wave of life stories and autobiographical narratives by Aboriginal women began in the late 1970s and gained momentum a decade later with the publication of Sally Morgan's *My Place* (1987), which became a bestseller. While some of the books of the first wave focused mainly (if not exclusively) on the author, Aboriginal women's life stories widened over time to include transgenerational histories of the family. Reading *Aboriginal Women's Life Stories* is an important discussion of books that have shaped our understanding of contemporary Indigenous Australian literature. Anne Brewster provides an in-depth textual analysis of three key titles and situates them in relation to concepts of history, race, gender, family, storytelling and Aboriginality in modern Australia. "Looking back, we can recognise now what an extraordinary phenomenon these life stories are, and how they have changed understandings of Aboriginality and writing ... The return of this classic book in a new edition is a welcome reminder that Anne Brewster's careful, deeply respectful and informed approach to these writings is as necessary now as it ever was." —Professor Gillian Whitlock FAHA

Collins Skills for the TOEIC Test: Listening and Reading is a unique skills-based exam preparation course. TOEIC ('Test of English for International Communication') is a test of English proficiency for people in the workplace seeking to work in an international environment or looking for promotion within their organisation. The TOEIC test questions simulate real-life situations relevant to the global workplace. Score reports for candidates provide accurate, meaningful feedback about a test taker's strengths and weaknesses. *Collins Skills for TOEIC* is a two book series (1 Listening/Reading; 2 Speaking/Writing) and focuses on helping learners handle the integrated skill aspect of the TOEIC test, where they are required to produce responses based on mixed input. Each book in the series therefore will contain all four skills but in different weightings. Summary *Quick Guide: question overviews give learners an easy reference to the characteristics of each question type *Challenges and Solutions: these sections offer strategy and skills reviews to help learners learn how to overcome the most common challenges. *Get it right: gives a quick overview of the most important steps for doing well on each question type and includes useful vocabulary and expressions *Answer

Analysis: teaches learners how to rule out distracter answer options *Progressive Practice: encourages independent learning by offering a graded progression of content and task sets *Review sections: offer timed TOEIC test-taking guides and help learners practice what they've learned in a simulated environment *Audio CD: enables effective TOEIC practice *Highly experienced author team, who have written TOEIC materials before and have also worked as teachers themselves, preparing learners for the test. Reading for Life is an anthology of poems and of extracts from prose fiction, related to a series of case-histories of individuals carefully reading, discussing their reading lives, and thinking about the relation of literature to their existence. It enables readers to gain increased imaginative access to the works in question through seeing how they have intensely affected equivalent readers--a novelist, a poet, a doctor, a teacher, an anthologist, but also non-specialists, ordinary people within shared reading groups in many different settings, finding help from literary texts in times of often painful personal need. It is the story of the work done by Philip Davis' research unit, the Centre for Research into Reading, Literature and Society (CRILS), at the University of Liverpool, in a ten-year partnership with the outreach charity The Reader, taking serious literature to often neglected communities and struggling individuals through the shared reading--alive and aloud--of literature from all ages. Reading for Life is a detailed account of what reading literature can do for a wide variety of individuals in relation to a wide variety of texts: it will be of interest to serious readers in the wider world as much as to scholars working within literary studies, and to all those involved in thinking about the therapeutic interactions of literature and life in psychology, medicine, and mental health support settings.

Water. We drink it. We cook with it. We wash with it. We can't live without it. Most of us don't think about it much. But it is not there for everybody, and our world is changing fast. We have to think very carefully about water, and about our use of it.

Gilmore (history, Stockton State College) is concerned with the half century following independence, during which rural New England changed from a traditional agricultural region into a commercialized one. He examines the links among cultural, social, and economic aspects of this transformation, an ingredient of which was an ideological commitment to reading and learning.

This book brings together some of the world's foremost literacy scholars to discuss how research influences what teachers actually do in the classroom. Chapters describe the current state of knowledge about such key topics as decoding, vocabulary, comprehension, digital literacies, reading disabilities, and reading reform. At the same time, the authors offer a unique "inside view" of their own research careers: key personal and professional influences, how their research agendas took shape, and what they see as the most important questions currently facing the field. The book honors the contributions of Isabel Beck, who has achieved tremendous success in translating research into widely used instructional practices.

Since colonial times, Chicano/a literature has varied with the authors' assumptions about the class and gender of their audiences, the linguistic choices available for literary communication, the geographic mobility of writers and readers, and the tastes they may have acquired in Mexico or other countries. In this examination of Chicano/a literature, Manuel M. Martn-Rodrguez analyzes the ways it connects with and is shaped by the interaction with its audiences. Motivated by a Toms Rivera essay from 1971, "Into the Labyrinth: The Chicano in Literature," Martn-Rodrguez began collecting, researching, and examining Chicano/a literature. He soon determined that a work of literature without a reader has no real existence and, specifically, Chicano/a literature has been defined as much by its readers as by its authors. Martn-Rodrguez begins this writing with an examination of the Chicano movement of the 1960s and 1970s, when the creation of Chicano-owned or controlled publishing enterprises made possible a surge of Chicano/a literature at the national level. He then concentrates on Chicana literature and "engendering" the reader and on linguistic and marketing strategies for a multicultural readership. Finally, Martn-Rodrguez provides a very thorough list of Chicano/a literature which he studied and he recommends for the reader to consider.

One of the liveliest areas of research in the social sciences is reading. Scholarly activity is currently proceeding along a number of different disciplinary lines, addressing a multitude of questions and issues about reading. A short list of disciplines involved in the study of reading would include linguistics, psychology, education, history, and gerontology. Among the important questions being addressed are some long-standing concerns: How are reading skills acquired? What are the basic components of reading skill? How do skilled readers differ from less skilled ones? What are the best ways to approach instruction for different groups of readers-young beginning readers, poor readers with learning problems, and teenage and adult illiterates? How can reading skill best be measured-what standardized instruments and observational techniques are most useful? The large volume of textbooks and scholarly books that issue forth each year is clear evidence of the dynamic nature of the field. The purpose of this

volume is to survey some of the best work going on in the field today and reflect what we know about reading as it unfolds across the life span. Reading is clearly an activity that spans each of our lives. Yet most accounts of it focus on some narrow period of development and fail to consider the range of questions that serious scholarship needs to address for us to have a richer understanding of reading. The book is divided into four parts.

If readers of the twentieth century feel overwhelmed by the proliferation of writing and information, they can find in Samuel Johnson a sympathetic companion. Johnson's career coincided with the rapid expansion of publishing in England--not only in English, but in Latin and Greek; not only in books, but in reviews, journals, broadsides, pamphlets, and books about books. In 1753 Johnson imagined a time when "writers will, perhaps, be multiplied, till no readers will be found." Three years later, he wrote that England had become "a nation of authors" in which "every man must be content to read his book to himself." In *Samuel Johnson and the Life of Reading*, Robert DeMaria considers the surprising influence of one of the greatest readers in English literature. Johnson's relationship to books not only reveals much about his life and times, DeMaria contends, but also provides a dramatic counterpoint to modern reading habits. As a superior practitioner of the craft, Johnson provides a compelling model for how to read--indeed, he provides different models for different kinds of reading. DeMaria shows how Johnson recognized early that not all reading was alike--some requiring intense concentration, some suited for cursory glances, some requiring silence, some best appreciated amid the chatter of a coffeehouse. Considering the remarkable range of Johnson's reading, DeMaria discovers in one extraordinary career a synoptic view of the subject of reading.
