Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction; incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice Captures new and ongoing developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.

An important contribution to the emerging body of research-based knowledge about English grammar, this volume presents empirical studies along with syntheses and overviews of previous and ongoing work on the teaching and learning of grammar for learners of English as a second/foreign language. It explores a variety of approaches, including form-focused instruction, content and language integration, corpus-based lexicogrammatical approaches, and social perspectives on grammar instruction. Nine chapter authors are Priority Research Grant or Doctoral Dissertation Grant awardees from The International Research Foundation for English Language Education (TIRF), and four overview chapters are written by well-known experts in English language education. Each research chapter addresses issues that motivated the research, the context of the research, data collection and analysis, findings and discussion, and implications for practice, policy, and future research. The TIRF-sponsored research was made possible by a generous gift from Betty Azar. This book honors her contributions to the field and recognizes her generosity in collaborating with TIRF to support research on English grammar. Teaching and Learning English Grammar is the second volume in the Global Research on Teaching and Learning English Series, co-published by Routledge and TIRF.
