This edition is a well organized 6 level general English course for adults with clear learning aims making it easy for ELT teachers to plan lessons and measure students progress.

While the field of ELT studies sees continued horizontal and vertical diversification, it is also time to take stock of what has made the discipline the field it presents itself as today. As horizontal diversification, we can identify trends that involve a continued inclusion of more fields of study into the family of methods and approaches of ELT. Especially in the technical sense, e-learning has matured and new forms of online learning and teaching have emerged, be it via teleconferences or short-message services for vocabulary training. However, a massive extension has occurred within the so-called social media. The vertical dimension affects a depth of analysis not seen even a decade ago, when for example small and relatively simple learner corpora were used for linguistic analysis that rarely went beyond rote frequency counts. The increasing sophistication in these two dimensions is also reflected in the research papers collected in this volume.

An important contribution to the emerging body of research-based knowledge

about English grammar, this volume presents empirical studies along with syntheses and overviews of previous and ongoing work on the teaching and learning of grammar for learners of English as a second/foreign language. It explores a variety of approaches, including form-focused instruction, content and language integration, corpus-based lexicogrammatical approaches, and social perspectives on grammar instruction. Nine chapter authors are Priority Research Grant or Doctoral Dissertation Grant awardees from The International Research Foundation for English Language Education (TIRF), and four overview chapters are written by well-known experts in English language education. Each research chapter addresses issues that motivated the research, the context of the research, data collection and analysis, findings and discussion, and implications for practice, policy, and future research. The TIRF-sponsored research was made possible by a generous gift from Betty Azar. This book honors her contributions to the field and recognizes her generosity in collaborating with TIRF to support research on English grammar. Teaching and Learning English Grammar is the second volume in the Global Research on Teaching and Learning English Series, co-published by Routledge and TIRF.
