From the Ruins of Colonialism throws fresh light on the history of memory, forgetting and colonialism. Focusing on Australia, the book charts how film, public commemorations, history textbooks and museums have, in a strange ensemble, become something called Australian History. It considers key moments of historical imagination, including the legends of Captain Cook and the Eureka Stockade, events such as the 1988 Bicentennial celebrations and the shipwrecked woman Eliza Fraser, whose story reflects anxieties about race and gender. This book argues for a new sense of remembering. Rather than being content with a culture of amnesia, it makes the case for learning to belong in the ruins of colonial histories. Chris Healy's investigation of these historical cultures and narratives is innovative and stimulating and will become a powerful statement for new histories.

This book discusses how facts travel, and when and why they sometimes travel well enough to acquire a life of their own. Whether or not facts travel in this manner depends not only on their character and ability to play useful roles elsewhere, but also on the labels, packaging, vehicles and company that take them across difficult terrains and over disciplinary boundaries. These diverse stories of travelling facts, ranging from architecture to nanotechnology and from romance fiction to climate science, change the way we see the nature of facts. Facts are far from the bland and rather boring but useful objects that scientists and humanists produce and fit together to make narratives, arguments and evidence. Rather, their extraordinary abilities to travel well shows when, how and why facts can be used to build further knowledge beyond and away from their sites of original production and intended use.

A book for anyone teaching English spelling, particularly those working with English language learners. This essential manual answers three challenging questions about teaching spelling: Why is there a problem with teaching and learning spelling? What can be done about it? How can this be accomplished? The first part of the book helps teachers understand the systems of English spelling and the regularities, which are not necessarily phonological. It explores the errors that learners really make and the challenges faced by teachers. The second part outlines a fresh, new, multi-dimensional approach to teaching spelling which recognises the need for learner engagement and strategy training as well as work on the patterns found in English orthography. The final part of the book presents over seventy engaging and effective activities which are designed to develop a range of strategies and knowledge about English spelling.
