features 350 Single Best Answer multiple choice questions, covering the whole syllabus. Containing everything candidates need to pass the MRCS Part A SBA section of the exam, it focuses intensively on the application of basic sciences (applied surgical anatomy, physiology, and pathology) to the management of surgical patients. The high level of detail included within the questions and their explanations allows effective self-assessment of knowledge and quick identification of key areas requiring further attention. Varying approaches to Single Best Answer multiple choice questions are used, giving effective exam practice and guidance through revision and exam technique. This includes clinical case questions, 'positively-worded' questions, requiring selection of the most appropriate of relatively correct answers; 'two-step' or 'double-jump' questions, requiring several cognitive steps to arrive at the correct answer; as well as 'factual recall' questions, prompting basic recall of facts.

Thousands of international medical graduates come to the United States to start their career as physicians. Many of them, however, are not aware of the challenges and problems that they may encounter along the way. These difficulties can range from the language and cultural barriers to a lack of confidence and self-esteem. Many students are also unaware of the other career options besides getting into a clinical residency program. As a result of these

issues, a great number of foreign medical students remain unmatched into the National Resident Matching Program. Not matching can be devastating for these graduates, both financially and medically. Students often suffer from psychological effects like major depression and generalized anxiety disorder. This book outlines the potential problems faced by these graduates and their possible solutions. Each chapter collects research evidence, interviews and surveys to gather information to work on each possible problem one by one and describes a solution in great detail. Comprised of thirty chapters, each chapter is broken down into smaller sub-sections to investigate the main theme in depth. Issues addressed include the different types of international medical graduates and their lives in the United States, differences in the education system and healthcare system, the triangle of residency, language and cultural barriers, lack of professional contacts, confidence, self-image and self-esteem issues, and restriction to specific fields and career paths. Written by experts in the field, *International Medical Graduates in the United States* is a first of its kind text that addresses the biggest issues faced by foreign medical graduates in today's world.

Emergency Medicine is becoming a highly valuable and popular branch of medicine in Australasia and many parts of the world. Australasian emergency medicine is recognised as one of the best practised in the world. Multiple Choice Questions form an essential part of many formal assessment processes, however, it is notoriously difficult to study for. MCQs may come in various formats. Whatever the format they are in, they can cover essential knowledge required to practise emergency medicine that cannot be covered in other formal assessment processes. They are valuable to clinical practice, regardless of their use in assessment, as MCQs could target clinically and practically relevant evidence-based information. Emergency Medicine MCQs contains over 700 single answer MCQs covering both adult and paediatric emergency medicine categorised into 24 chapters. The associated iPhone app contains another 180 MCQs divided into 3 test papers of 60 questions. Each question is associated with a detailed answer describing essential evidence-based knowledge in an easily understandable format. These answers are well referenced to Australasian and well known international textbooks, peer reviewed emergency medicine and

other journals and highly regarded web resources. The contributors to the book are 13 emergency physicians and a consultant psychiatrist. This book and the associated iPhone app are aimed at doctors practising emergency medicine, in particular residents and registrars, generalists and hospital practitioners. Emergency registrars in formal training can use these publications to improve essential knowledge, identify gaps in their knowledge, practise MCQs as well as to improve critical thinking skills. Emergency physicians will find these publications valuable as a tool in continuing medical education.

Ear, Nose and Throat (ENT) surgery has traditionally been a difficult and specialised topic in undergraduate medicine and for junior doctors. Many textbooks are too detailed for undergraduate use, or lack self assessment questions to help those wishing to underpin their learning. This concise and easy-to-read self-assessment guide aims to clarify the topic, and find and fill gaps in understanding. The multiple choice questions (MCQs) contained cover all levels of knowledge and the learning objectives of most of the UK medical school curricula, aiding preparation for end of unit, module and final exams for ENT. This book will be an excellent companion for clinics and teaching sessions and an excellent revision primer for graduate entry medical curricula. Legal issues in medical practice have been gripping medical doctors by surprise in recent years. Some decades ago legal issues in medical practice never created any problem. A greater awareness is being created by adding doctor's services within the ambit of Consumer Protection Act, 1986. Neither during the undergraduate training nor the postgraduate courses doctors have ever prepared themselves to deal with real-world situations of litigation related to allegations of negligence. While facing litigation related to allegation of negligence in law courts for the first time, a doctor realizes the importance of medical records, consent and expert witness and searches for help books. There are many books available for reference but this one is a handbook for practising doctors and their lawyers grappled with legal issues culminating in litigations

The Diploma in Otolaryngology - Head & Neck Surgery (DOHNS) is now an intercollegiate examination, and can count towards membership of one of the surgical colleges of Great Britain. The DOHNS has evolved to fit its new role, leaving little up-to-date material available for candidates preparing for the written component. This book by former DOHNS candidates meets that need, focusing on topics that are likely to be examined. Each answer is accompanied by an explanation using current evidence-based research wherever possible. This will be an essential revision text for all DOHNS candidates.

This innovative and accessible guide to ear, nose and throat medicine delivers everything you need to know to develop a thorough grounding in the subject, acting as an essential course companion and an ideal revision aid. Written in a lively and accessible manner reflecting the author's popular lecturing style, the content has been carefully matched to meet the demands of both the undergraduate curriculum and the core competencies for foundation study. Topics are approached in a problem-oriented manner, with basic science and clinical information integrated throughout in line with current teaching practice. Essential ENT, praised in the first edition for its brevity, style and illustrations, remains an essential text for undergraduate medical students and foundation doctors, an excellent aide memoire for those embarking upon a career in ENT and studying for the Diploma in Laryngology and Otology, and a reliable companion in clinical practice for general practitioners and staff in the emergency department.
