Christian Schwarzkopf has developed a new more holistic entrepreneurial ecosystem on a national level and has analyzed as well as compared the fundamentals of innovation and entrepreneurship in Germany and the USA in order to derive the key elements for an entrepreneurial ecosystem. The described ecosystem consists of four circles and 24 elements, with the entrepreneur in the core. Surrounding essential elements, for example, are risk financing, culture or domestic markets. The author shows the differences between Germany and the USA and provides improvement proposals for nations like Germany.

Entrepreneurship involves the creation process-creating something new of value. The creation has to have value to the entrepreneur and value to the audience for which it is developed. This audience can be (1) the market of organizational buyers for business innovation, (2) the hospital's administration for a new admitting procedure and software, (3) prospective students for a new course or even college of entrepreneurship, or (4) the constituency for a new service provided by a non-profit agency. Second, entrepreneurship requires the devotion of the necessary time and effort. Only those going through the entrepreneurial process appreciate the significant amount of time and effort it takes to create something new and make it operational.

Entrepreneurship is the capability to be an entrepreneur. Beyond that idea is an ideology that a person's business actions result in industrial growth or technical advances, making that person a leader in the economic world. The contributors to this latest volume in the Praxiology Series, now available in paperback, are united in claiming that resourcefulness is a characteristic of people who take effective action, and that effectiveness is dependent on good, ethical purposes. The wide-angle definition of entrepreneurship presented in this volume demands that people and organizations engage in more than simple self-interest, but also display awareness of the prospects for wider growth and advances resulting from their decisions. In a period of financial crisis caused by irresponsible behavior by eminent would-be "entrepreneurs" the significance of this perspective should be evident. The editors claim that growth, not stagnation, advantage, not decline, are irreversible traits of business activity. This is why the very concept of entrepreneurship calls for values and responsibility—even more than in the past. The contributors develop the idea of entrepreneurship from both theoretical approaches religious and practical, or applied perspectives. This inter- and multidisciplinary approach offers readers a chance to rebuild trust in entrepreneurship.

This textbook focuses on the management challenges of founding a new venture and managing its rapid growth as the firm evolves. A key chapter of the book is dedicated to leadership challenges in managing rapidly growing young firms located in new industries and technology areas. Entrepreneurial Small Business (ESB) provides students with a clear vision of small business as it really is today: Katz focuses on the distinctive nature of small businesses that students might actually start versus high growth firms. The goal of the companies described in this textbook is personal independence with financial security; not market dominance with extreme wealth. Traditional beliefs and models in small business are discussed, as well as the latest findings and best practices from academic and consulting arenas. Katz and Green recognize the distinction between entrepreneurs who aim to start the successor to Amazon.com or the pizza place around the corner. They discuss the challenges facing entrepreneurs, while keeping focused on the small businesses students plan to start.

"This book got its start with a simple question from my mother, "What is the difference between what you teach and what your father did for a living?" We were sitting shiva (which is the ancient Jewish tradition of mourning), in this case after the death of my father, a Polish immigrant to the United States who had been a small business owner for almost 50 years at the time of his death in 2003"--

Entrepreneurship is a phenomenon of tremendous societal importance. It is also an elusive phenomenon, and researching entrepreneurship is therefore fun, fascinating and frustrating at times. In *Researching Entrepreneurship*, Per Davidsson, one of the most highly recognized entrepreneurship scholars shares in a personal and readable way his rich experience and ideas on how entrepreneurship can or should be researched. After a comprehensive treatment of entrepreneurship as societal phenomenon and scholarly domain, the core chapters of the book discuss design, sampling, operationalization and analysis issues on several levels of analysis: individual, venture, firm, industry, region and nation. The book is targeted at doctoral students and other relative newcomers to the field of entrepreneurship research. However, taking a fresh, reflective perspective and looking beyond research conventions, it should provide potential for inspiration and food for thought also for experienced entrepreneurship researchers.
