Samuel Taylor Coleridge (1772-1834) was an English poet, literary critic and philosopher who, with his friend William Wordsworth, was a founder of the Romantic Movement in England and a member of the Lake Poets. He wrote the poems *The Rime of the Ancient Mariner* and *Kubla Khan*, as well as the major prose work *Biographia Literaria*. His critical work, especially on Shakespeare, was highly influential, and he helped introduce German idealist philosophy to English-speaking culture. He coined many familiar words and phrases, including suspension of disbelief. He was a major influence on Emerson, and American transcendentalism. Coleridge is one of the most important figures in English poetry. His poems directly and deeply influenced all the major poets of the age. He was

known by his contemporaries as a meticulous craftsman who was more rigorous in his careful reworking of his poems than any other poet, and Southey and Wordsworth were dependent on his professional advice.

In 1919, Keynes participated in the negotiations of World War I's armistice. He strongly disagreed with terms of reparation imposed on Germany, arguing in this controversial book that German impoverishment would threaten all of Europe. This prophetic view of the European marketplace in the early 20th century represents a much-studied landmark of economic theory.

The General Theory of Employment, Interest and Money was written by the English economist John Maynard Keynes. The book, generally considered to be his magnum opus, is largely credited with creating the terminology and shape of modern macroeconomics. Published in February 1936, it sought to bring about a revolution, commonly referred to as the "Keynesian Revolution", in the way economists thought - especially in relation to the proposition that a market economy tends naturally to restore itself to full employment after temporary shocks. Regarded widely as the cornerstone of Keynesian thought, the book challenged the established classical economics and introduced important concepts such as the consumption function, the multiplier, the marginal efficiency of

capital, the principle of effective demand and liquidity preference. The central argument of *The General Theory* is that the level of employment is determined, not by the price of labour as in neoclassical economics, but by the spending of money (aggregate demand). Keynes argues that it is wrong to assume that competitive markets will in the long run deliver full employment or that full employment is the natural, self-righting, equilibrium state of a monetary economy. On the contrary, under-employment and under-investment are likely to be the natural state unless active measures are taken. One implication of *The General Theory* is that an absence of competition is not the main issue regarding unemployment, and that even reducing wages or benefits have no major effect.

The letters Rilke wrote during the war and postwar years are of particular interest not only for whatever they may contain of the wisdom of the poet, the artist, and the humanitarian, but for their analysis of the intellectual and spiritual currents of the time.

These letters give the account of Rilke's own state of mind and of his final approach to the threshold of his great works. They show the rapid change he underwent after his reaction to the first excitement of

the war; how his dismay at the cruelty and confusion of war helped to render the poet in him speechless for many years; how he nevertheless characteristically held to his own fundamental views throughout war and revolution and in spite of everything retained his belief in the capacity of humanity to create for itself a better future.

This collection of essays is a perusal of subjects that are relevant to humanistic studies. American education in relation to European educators is the focus of one article. The question of Latin and its use in reading Virgil, Kipling and T.S. Eliot is approached, and figures such as John Dewey and Winston Churchill are highlighted. While the writings are too diverse to be characterized by a specific theme, various facets of education are explored, and most essays bear insight into the American experience. Collected Essays, while easily accessible to the lay reader with an interest in these topics, will be especially pertinent to educators, students of American history and students of literature.

Not illustrated. 1884 edition. Excerpt: ... "To Me. Tobib Mathew: It is true my labors are now most set to have those works which I had formerly published, as that of Advancement of Learning, that of Henry VII., that of the Essays, being retractate and made more perfect, well translated into Latin by the help of some good pens which forsake me not. For these modern languages will, at one time or other, play the bankrupt with books; and since I have lost much time with this age, I would be glad, as God shall give me leave, to recover it with posterity. For the Essay of Friendship, while I took your speech of it for a cursory request, I took my promise for a compliment. But since you call for it, I shall perform it." In his letter to Father Fulgentdo, giving some account of his writings, he says:

--"The Novum Organum should immediately follow; but my moral and political writings step in between as being more finished. These are, the History of King Henry VII., and the small book, which, in your language, you have called Sagni Morali, but I give it a graver title, that of Sermones Fideles, or Interiora Serum, and these Essays will not only be enlarged in number, but still more in substance." The nature of the Latin edition, and of the Essays in general, is thus stated by Archbishop Tenison: --"The Essays, or Counsels Civil and Moral, though a bywork also, do yet make up a book of greater weight by far than the Apothegms; and coming home to men's business and bosoms, his lordship entertained this persuasion concerning them, that the Latin volume might last as long as books should last. His lordship wrote them in the English tongue, and enlarged them as occasion served, and at last added to them the Colors of Good and Evil, which are likewise found in his book De Augmentis. This book provides a collection of essays representing the state of the art in the research into argumentation in classical antiquity. It contains essays from leading and up and coming scholars on figures as diverse as Parmenides, Gorgias, Seneca, and Classical Chinese "wandering persuaders." The book includes contributions from specialists in the history of philosophy as well as specialists in contemporary argumentation theory, and stimulates the dialogue between scholars studying issues relating to argumentation theory in ancient philosophy and contemporary argumentation theorists. Furthermore, the book sets the direction for research into argumentation in antiquity by encouraging an engagement with a broader range of historical figures, and closer collaboration between contemporary concerns and the history of philosophy.
