

Essentials Of Internal Medicine 3e

Based on the popular review course from Harvard Medical School, The Brigham Intensive Review of Internal Medicine, 3rd Edition, provides in-depth coverage on all specialties of internal medicine, as well as palliative care, occupational medicine, psychiatry, and geriatric medicine. Ideal for preparing for certification or recertification, this highly regarded review tool keeps you up to date with tremendous changes in the field, incorporating detailed discussions in every chapter, essential learning points, more than 600 review questions, numerous tables and figures, and more. Includes three new chapters: Sedation Agitation-Sleep Deprivation; Hepatitis B and C; and Evaluation of the Dyspneic Patient. Features a brand new, full-color design with all-new diagrams and color photos. Provides extensively revised information throughout, including more MOC-focused content.

This third edition is expanded, revised and largely re-written. However the aim remains the same and it is hoped that anyone involved in Travel or Tropical Medicine will find the contents interesting, stimulating and helpful. As before it is divided into easy-to-read sections with clear answers that sometimes encapsulate whole diseases. The four-part question format is retained in order to aid those intending to take Certificate or other exams in Travel Medicine. The correct answer to each question is that which is generally accepted as the best one. Nonetheless the reader may quibble with some answers and the author is always happy to accept sound advice and change accordingly. Travel Medicine has a broad canvas. It cuts across the boundaries of Infectious Diseases, Internal Medicine, Tropical Medicine, Geographical Medicine, Aviation and Refugee Medicine. Because of this the few Textbooks we have Travel Medicine are large and difficult to digest. This little book attempts to set down in concise form the essential elements of Travel Medicine in a way that is easy to read yet challenging. These pages certainly invite the reader to share in excitement and wonder of this fascinating subject.

University of California-Davis for radiology residents. The text is a guide to the fundamental principles of medical imaging physics, radiation protection and radiation biology, with complex topics presented in the clear and concise manner and style for which these authors are known. Coverage includes the production, characteristics and interactions of ionizing radiation used in medical imaging and the imaging modalities in which they are used, including radiography, mammography, fluoroscopy, computed tomography and nuclear medicine. Special attention is paid to optimizing patient dose in each of these modalities. Sections of the book address topics common to all forms of diagnostic imaging, including image quality and medical informatics as well as the non-ionizing medical imaging modalities of MRI and ultrasound. The basic science important to nuclear imaging, including the nature and production of radioactivity, internal dosimetry and radiation detection and measurement, are presented clearly and concisely. Current concepts in the fields of radiation biology and radiation protection relevant to medical imaging, and a number of helpful appendices complete this comprehensive textbook. The text is enhanced by numerous full color charts, tables, images and superb illustrations that reinforce central concepts. The book is ideal for medical imaging professionals, and teachers and students in medical physics and biomedical engineering. Radiology residents will find this text especially useful in bolstering their understanding of imaging physics and related topics prior to board exams.

Common Clinical Presentations in Dogs and Cats is a reliable resource and quick reference to essential information for diagnosing canine and feline patients, based on presenting complaints. The text takes a problem-oriented approach to recognizing common clinical conditions, and introduces diagnostic and treatment plans for companion animal practice. Equally useful for veterinary students and practicing clinicians, the book presents 78 chapters grouped by body system, for ease of access. Each chapter focuses on identifying the chief complaint, pinpointing possible diagnoses, and determining the clinical approach to patient care. The book is richly illustrated throughout with clinical photographs and line drawings that demonstrate the concepts presented. Common Clinical Presentations in Dogs and Cats is an essential resource that:

- Gives clinicians fast access to essential details for approaching common case presentations in dogs and cats and forming a correct diagnosis
- Presents information by clinical signs, organized by body system
- Takes a standardized chapter format for ease of use
- Includes color photographs and line drawings to illustrate the conditions discussed

Written for small animal general practitioners and veterinary students, Common Clinical Presentations in Dogs and Cats is a patient-side reference that can help practitioners gain the knowledge and confidence to correctly diagnose a wide range of clinical presentations.

Providing a ready reference for the initial triage, collection of diagnostic samples, and management of a poisoning case, Small Animal Toxicology Essentials focuses on the most common poisons encountered by companion animals. From

prevention to evaluation, monitoring, and treatment, the book is a guide for veterinary technicians to differentiate between significant and insignificant exposures and effectively manage animal poisonings. Emphasizing clinical signs, differential diagnoses, and case management, the book begins with the principles of veterinary toxicology, such as terminology, history-taking, and decontamination. The second half of the book is devoted to specific toxicants, including plants, metals, drugs, and household poisons. A companion website at www.wiley.com/go/poppenga provides review questions in Word and color images available for download into PowerPoint. Small Animal Toxicology Essentials is a useful resource for veterinary technicians, especially those with a interest in emergency and critical care, and veterinary technician students, as well as practicing veterinarians looking for an introduction to toxicology.

"Harrison's is intended for learners throughout their careers. For students, Part 1, Chapter 1 begins with an overview of "The Practice of Medicine". In this introductory chapter, the editors continue the tradition of orienting clinicians to the science and the art of medicine, emphasizing the values of our profession while incorporating new advances in technology, science, and clinical care. Part 2, "Cardinal Manifestations and Presentation of Diseases" is a signature feature of Harrison's. These chapters eloquently describe how patients present with common clinical conditions, such as headache, fever, cough, palpitations, or anemia, and provide an overview of typical symptoms, physical findings, and differential diagnosis. Mastery of these topics prepares students for subsequent chapters on specific diseases they will encounter in courses on pathophysiology and in clinical clerkships"--
