Since the beginning of the century, there have been calls for the integration of traditional individualistic (micro) and management (macro) paradigms in Human Resource Management studies. This book presents advanced quantitative and mixed research methods that can be used to analyze integrated macro and micro paradigms within the field of Human Resource Management. Multi actor, social network and longitudinal research practices, among others, are explored. Readers will gain insight into the advantages and disadvantages of different research methods in order to evaluate which type is most suitable to their research. This book is suitable for both advanced researchers and graduate students.

The performance of an expatriate is often determined by factors like (in)ability to adjust to foreign culture, the length of the assignment, willingness to move and work-related factors. What should be considered when selecting an expatriate are therefore criteria like technical ability, cross-cultural suitability, family requirements, country requirements as well as language and company requirements. However, recruitment and selection are only the first step for international Human Resource Management. The aim of this paper is therefore to point out the increasing importance of Human Resource Management especially from internationally operating companies' point of view. Furthermore, it will be pointed out what International Human Resource Management is and why it is necessary for Multi National Companies (MNCs) to concern about this topic. In addition, challenges and requirements of HRM will be illustrated and highlighted.
