This book considers the scope and dynamics of Education for Sustainable Development (ESD) and learning in schools in Africa. It explores the conditions and processes that support such learning, and examines how ESD in schooling can improve the quality and relevance of education. The quality of education has been defined internationally as a key concern for educational institutions around the world, including schools in Africa. The models of quality are often limited to performance-based approaches and/or inclusive approaches. The contributions in this book show that there is more to a discussion on educational quality in Africa than performance success and/or inclusion. The chapters explain how ESD brings a new relevance to education in Africa, and at the same time, sounds the beginning of a new concept of quality education. The volume presents a collection of experiences in creating and supporting quality learning processes through a variety of ESD practices.

"In this gracefully written book Dr. Eva Poluha wrestles with important issues of Ethiopian political culture and cultural continuity and transmission in general. Drawing upon her years of experience in the country, as well as the data from this school ethnography, she has produced a stimulating and thought-provoking work for those interested in problems of cross-cultural education as well as in Ethiopia." -- Herbert S. Lewis, Professor Emeritus, Department of Anthropology, University of Wisconsin-Madison

Children play a vital role as a source of information on politics but have been neglected as political actors in research contexts. In this study, children are used as a window to an Ethiopian society where hierarchical relations persist, despite the numerous political and administrative transformations of the past century. With data gathered through participant observation the book examines how young, Addis Abeba school children learn to adapt to and reproduce relations of superordination or subordination based on gender, age, strength and social position. The children's experiences are viewed in the historical context of state-citizen relations where hierarchy and obsession with control have been and continue to be dominant. The discussion focuses on the power of continuity in the reproduction of cultural patterns and political behaviour, and on how change towards more egalitarian relations could come about.

The twelfth edition of the EFA Global Monitoring Report marking the 2015 deadline for the six goals set at the World Education Forum in Dakar, Senegal, in 2000 provides a considered and comprehensive accounting of global progress. As the international community prepares for a new development and education agenda, this report takes stock of past achievements and reflects on future challenges. There are many signs of notable advances. The pace towards universal primary education has quickened, gender disparity has been reduced in many countries and governments are increasing their focus on making sure children receive an education of good quality. However, despite these efforts, the world failed to meet its overall commitment to Education for All. Millions of children and adolescents are still out of school, and it is the poorest and most disadvantaged who bear the brunt of this failure to reach the EFA targets.

This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.
