This edition has been revised and includes new annotations and a new Test-Bank. Incorporating coverage of legal issues, succinct research and in-depth practice, it is intended both for general student teachers as well as those preparing to be special educators.

Intended as a text for undergraduate and postgraduate courses (B.Ed./M.Ed.; B.A./M.A. Education) and diploma level courses in Education as well as for courses in Special Education, this comprehensive and accessible book provides a sound base for understanding Special Children through an insightful and incisive discussion on Special Education. The text dwells on exceptional children, or children with special needs, who either suffer from various deficits or disabilities, or are gifted. Such children include the mentally retarded, the visually and hearing impaired, the emotionally disturbed, those with autism, cerebral palsy, and the deprived, as well as the gifted and the creative. This well-organized and pedagogically rich text should be extremely useful to students as well as professionals—special education teachers, those engaged in guidance and counselling, educational policy makers, and field workers, who have an abiding interest in the education of exceptional children and in special education.

KEY FEATURES ? Includes student-friendly features like illustrations, examples, tables, and research-based experimental findings. ? Provides a complete picture of exceptionality, from the early years of human history to the present day. ? Gives case histories to practically illustrate the subject.

Exceptional Learners is an outstanding introduction to the characteristics of exceptional learners and their education, emphasizing classroom practices as well as the psychological, sociological, and medical aspects of disabilities and giftedness. In keeping with this era of accountability, all discussions and examples of educational practices are grounded in a sound research base. With hundreds of new references added to the 12th edition, the authors are committed to bringing the most current and credible perspectives to bear on the ever-increasing complexity of educating students with special needs in today's schools. The authors have written a text that reaches the heart as well as the mind, promoting a conviction that professionals working with exceptional learners need to develop not only a solid base of knowledge, but also a healthy attitude

toward their work and the people whom they serve, and constantly challenge themselves to acquire a solid understanding of current theory, research, and practice in special education and to develop an ever more sensitive understanding of exceptional learners and their families. This text uses a straightforward approach and a highly personalized tone to present research and teaching practices, emphasizing the effects of disabilities on the lives of individuals, their families, and their teachers. Themes of commonality and collaboration encourage respect, minimize teacher anxiety, and de-emphasize the typical clinical approach to this content. "Portfolio Activities" help students prepare for their careers and provide resources such as online templates. Multicultural coverage has been fully integrated as a result of the advisory work of nationally known specialist Festus Obiakor (University of Wisconsin, Milwaukee). Enhancements to the companion Web site provide greater integration of print and online content, as well as links to further research on special education. This updated version includes an 8-page insert highlighting the 2004 IDEA Reauthorization Legislation—the history of this important legislation, why the reauthorization was needed, and what the changes included—as well as a table correlating the new HM Video Cases to specific chapters in the book. Award-winning HM Video Cases have been added to the Online Teaching and Study Centers. These 4- to 6-minute cases present actual classroom scenarios that depict the complex challenges and opportunities teachers face every day. They are accompanied by classroom "artifacts," viewing questions, key terms, and bonus videos.

An Introduction to Young Children with Special Needs: Birth Through Age Eight is a comprehensive introduction to educational policies, programs, practices, and services for future practitioners serving young children with delays or disabilities in early intervention-early childhood special education (EI-ECSE). Thoughtfully addressing the needs of children at risk for learning or development delays or disabilities, revered authors Richard M. Gargiulo and Jennifer L. Kilgo offer evidence-based interventions and instructional techniques that provide students with a broad understanding of important theoretical and philosophical foundations, including evidence-based decision making, developmentally appropriate practices, cultural responsiveness, and activity-based intervention.

Exceptional Children: An Introduction to Special Education has always been known for its innovation, strong research base and accessibility. The tenth edition has all of those strengths, but has a greater focus on highly effective, research-based practices that are described in a very step-by-step, applied manner. Heward presents an informative and responsible introduction to the professional practices, trends, and research that define contemporary special education while also conveying the diversity and excitement of this changing field. The book is for those teachers who will be professionals in the area of special education or those who are working with students that have exceptionalities.
