The 2008 Olympic Games will be held in Beijing but many human rights activists support a boycott. They liken the circumstances to previous governments that used the games to glorify their regimes - most notoriously the Nazis in 1936. What has led to this perception and is it fair? Sport, Revolution and the Beijing Olympics is a cultural history of sport in China and challenges many such ingrained Western assumptions. The authors unpick the relationship of sport to imperialism and revolution, and examine its significance in both China and Taiwan at governmental and everyday levels. In the process, they successfully

debunk harmful myths, such as the prevalence of drugs in Chinese sport among women athletes, and present a balanced view that is a much-needed corrective to popular understanding.

This book concisely and clearly spells out invaluable lessons and techniques for every step of the trial process. Readers will find coverage of: expert witnesses, which incorporates the Daubert Supreme Court case; direct- and cross-examinations of expert witnesses; examples of expert examinations; expansive treatment of exhibits and occurrence witnesses; And The psychology of effective presentation of occurrence witnesses before the jury.

Instrumentation, Control and Automation of Water and Wastewater Treatment and Transport Systems 1993 comprises a selection of manuscripts on the development of control strategies and their applications and on the status and future directions of Instrumentation, Control, and Automation (ICA) in the water and wastewater industry. The book starts by providing an overview of the status, the constraints and the future prospects for ICA in water and wastewater treatment and transport based on the survey responses of experts from 16 different countries. The text continues by presenting the need for dynamic modeling and simulation software to assist operations staff in developing effective instrumentation control strategies and to provide a training environment for the evaluation of such strategies. The book also covers the critical variables in system success; the use of an enterprise-wide computing that emphasizes the importance of strategic planning, performance measures, and human factors associated with the suggested implementation of applied technology; and the use of part-time unmanned operation at a large wastewater treatment plant. A functional approach based on the utility's water and wastewater

functional requirements; the collection system monitoring and control; water distribution and control systems; dynamic modeling and simulation; and process control strategy and development are also considered. This book will be beneficial to biochemists, wastewater technologists, and public health authorities.
