The history of totalitarian states bears witness to the fact that literature and print media can be manipulated and made into vehicles of mass deception. *Censorship and Literature in Fascist Italy* is the first comprehensive account of how the Fascists attempted to control Italy's literary production. Guido Bonsaver looks at how the country's major publishing houses and individual authors responded to the new cultural directives imposed by the Fascists. Throughout his study, Bonsaver uses rare and previously unexamined materials to shed light on important episodes in Italy's literary history, such as relationships between the regime and particular publishers, as well as individual cases involving renowned writers like Moravia, Da Verona, and Vittorini. *Censorship and Literature in Fascist Italy* charts the development of Fascist censorship laws and practices, including the creation of the Ministry of Popular Culture and the anti-Semitic crack-down of the late 1930s. Examining the breadth and scope of censorship in Fascist Italy, from Mussolini's role as 'prime censor' to the specific experiences of female writers, this is a fascinating look at the vulnerability of culture under a dictatorship.

In many European languages the National Standard Variety is converging with spoken, informal, and socially marked varieties. In Italian this process is giving rise to a new standard variety called Neo-standard Italian, which partly consists of regional features. This book contributes to current research on standardization in Europe by offering a comprehensive overview of the re-standardization dynamics in Italian. Each chapter investigates a specific dynamic shaping the emergence of Neo-standard Italian and Regional Standard Varieties, such as the acceptance of previously non-standard features, the reception of Old Italian features excluded from the standard variety, the changing standard language ideology, the retention of features from Italo-Romance dialects, the standardization of patterns borrowed from English, and the developmental tendencies of standard Italian in Switzerland. The contributions investigate phonetic/phonological, prosodic, morphosyntactic, and lexical phenomena, addressed by several empirical methodologies and theoretical vantage points. This work is of interest to scholars and students working on language variation and change, especially those focusing on standard languages and standardization dynamics.

This is the first comprehensive study of the remarkably rich tradition of women's writing that flourished in Italy between the fifteenth and early seventeenth centuries. Virginia Cox documents this tradition and both explains its character and scope and

offers a new hypothesis on the reasons for its emergence and decline. Cox combines fresh scholarship with a revisionist argument that overturns existing historical paradigms for the chronology of early modern Italian women's writing and questions the historiographical commonplace that the tradition was brought to an end by the Counter Reformation. Using a comparative analysis of women's activities as artists, musicians, composers, and actresses, Cox locates women's writing in its broader contexts and considers how gender reflects and reinvents conventional narratives of literary change.
