Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment

Rare, unique and irreplaceable - precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem. Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilized as both food and medicine. Phytochemistry of Australia's Tropical Rainforest is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics, analgesics, steroids, antimalarials and more. It provides an insight into the habitat, ecology and family associations of hundreds of species and explores their future therapeutic potential, alongside phytochemical studies of the ancient plant lineages. Toxicological evaluations of important poisonous plants are also included. Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth, many of which are illustrated in this book. This comprehensive work is an essential reference for phytochemists, ethnobotanists and those with an interest in

rainforests and their medicinal and botanical potential. A visual history of the FIAT 500, the ultimate lifestyle car that has remained a timeless classic and design legend. Considered to be one of the most popular models in automotive history, the FIAT 500 has become a legend over time. Its innovative features, the original and recognizable design of its bodywork, and its versatility have distinguished it as an automotive icon with enduring appeal. FIAT 500: The Design Book is an invitation to embark on a captivating journey through the main milestones of the 500 project: from the first series in the 1960s to the public presentation at the Geneva International Motor Show of the Trepùno prototype in 2004, of the new 500 and 500C, the 500L through to the 500X. This visually rich and fascinating book explains not only the genesis and "design metamorphosis" of each model, but also their backgrounds, and explores the contributions of the designers who have helped to develop them with innovation and foresight.

This year marks the 50th anniversary of the British cult classic movie *The Italian Job*. This landmark anniversary presents a unique opportunity to celebrate the film with a coffee table book packed full of images, insights and revelations. Loaded with Sixties swagger, and famed for its endlessly quotable dialogue and one of the most impressive car chases in movie history, *The Italian Job* is the ultimate celebration of 'cool Britannia'. From the opening sequence of Rossano Brazzi gliding through the Alps in an orange Lamborghini Miura, to the high-speed getaway across the city of Turin in three Mini Coopers, *The Italian Job* is a petrolhead's dream. In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that

public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

The book examines some of the ways in which contemporary forms of political dissent are situated within processes of global ordering. Grounded in analysis of concrete practices of discipline and dissent in specific contexts, it explores the ways in which resistance can be shaped by dominant ways of thinking, seeing or enacting politics and by the multiform relations

of power at play in the making of global order. The contributions, written from a variety of disciplinary backgrounds, address themes such as the processes through which particular sorts of resisting subjects are produced; the politics of knowledge in which resisting practices are embedded; the ways in which visual technologies are deployed within and towards oppositional practices; and the politics of gender, race and class within spaces of contestation. The volume thus opens up space for critical reflection and interdisciplinary dialogue on what it means to be a resisting subject and on the interplay between the power and counter-power in global order. This book was published as a special issue of Globalizations.
