These proceedings represent the work of researchers participating in the 6th International Conference on Management, Leadership and Governance (ICMLG 2018) which is being hosted this year by the Institute for Knowledge and Innovation Southeast Asia (IKI-SEA), a Centre of Excellence of at Bangkok University, Thailand on 24-25 May 2018.

Given the increased social and environmental problems in China, this book looks into the social and environmental (environmental) disclosure practices of socially responsible Chinese listed firms by constructing a stakeholder-driven, three-dimensional, disclosure index. The book contains a three-part study: the first part explores the current status of

social and environment disclosure practices. The second part empirically examines the relationship between corporate social and environmental disclosure and various influencing factors (i.e. stakeholders' power and corporate characteristics). The third part empirically examines the link between corporate social responsibility (CSR) reporting (i.e. publishing a CSR report and the quality of the CSR report) and socially responsible reputation. The book finds that the CSR report provided more stakeholder-relevant social and environmental disclosure than the annual report. It also finds that corporate characteristics such as firm size, profitability and industry classification are all statistically significant factors influencing social and environmental disclosure of the Chinese firms studied. Shareholders significantly influenced firms' social and environmental disclosure, and creditors significantly influenced firms' disclosure related to their environmental performance. The final part of the study reports that publishing a CSR report and CSR reporting quality had a positive influence on firms' socially responsible reputation and that the CEO/chairman duality negatively influenced firms' socially responsible reputation. The book also highlights that financial performance and firm size were the two corporate characteristics that had a positive influence on corporate socially responsible reputation. This book will be of interest to those who are keen to learn more about corporate social responsibilities in the context of Chinese firms.

The premier accounting reference, revised and expanded The Accountants' Handbook series has the longest tradition of any reference of providing comprehensive coverage of the field to both accounting professionals and professionals in other fields who need or desire quick, understandable, and thorough exposure to complex accounting-related subjects. Like its predecessors, the Tenth Edition is designed as a single reference source that provides answers to all reasonable questions on accounting and financial reporting asked by accountants, auditors, bankers, lawyers, financial analysts, and other preparers and users of accounting information. Written by nationally recognized accounting professionals, including partners in major public accounting firms, financial executives, financial analysts, and other relevant business professionals, the Handbook covers both financial accounting and reporting and industry specific accounting issues in separate volumes for easy reference. Its comprehensive content provides analysis on over 43 critical areas of accounting.

With the sixteenth edition of Financial and Managerial Accounting: The Basis for Business Decisions, the Williams author team continues to be a solid foundation for students who are learning basic accounting concepts. In this revision, the authors have added to and refined the coverage of International Financial Reporting Standards (IFRS), particularly in Chapter 15 ("Global Business and Accounting"). Hallmarks of the text--including the solid Accounting Cycle Presentation, relevant pedagogy, and high quality, end-of-chapter material--have been updated throughout the book.

Philip Brown is one of the most admired and respected accounting academics alive today. He was a pioneer in capital

markets research in accounting, and his 1968 article, co-authored with Ray Ball, "An Empirical Evaluation of Accounting Income Numbers," arguably had a greater impact on the course of accounting research, directly and indirectly, than any other article during the second half of the twentieth century. Since that time, his innovative research has focused on issues that bridge accounting and finance, including the relationships between net profit reports and the stock market, the long-run performance of acquiring firms, statutory sanctions and voluntary corporate disclosure, and the politics and future of national accounting standards to name a few. This volume brings together the greatest hits of Brown's career, including several articles that were published in out-of-the-way places, for easier use by students and researchers in the field. With a foreword written by Stephen A. Zeff, and an introduction that discusses the evolution of Brown's research interests and explains the context for each of the essays included in the volume, this book offers the reader a unique look inside this remarkable 50-year career.

This book explores recent developments in the theory, strategic perspective and international practice of corporate social responsibility. In particular it discusses the consequences of the economic slowdown apparent in many economies and the impact of changes in the regulatory environment. It consists of three parts: Part one addresses a variety of theoretical approaches as well as the dynamics and criticism of corporate social responsibility. It takes into account social and governmental expectations for the new and extended role of companies in the economy and in society, and provides a new context and theoretical assumptions regarding the functions and tasks of corporate social responsibility. Part two discusses the practical aspects relating to strategic management and corporate governance, corporate disclosure and reporting, as well as the empowerment of stakeholders. Lastly, part three focuses on the international practice of corporate social responsibility in various organizational and institutional settings. Using numerous case studies, the book explores the challenges and tasks of CSR in emerging markets, in the fashion industry and in global and family companies. It identifies the changes that can be detected following the financial crisis, closing the loop and linking the empirical findings with the revised theoretical framework.

Working Papers provide students with formatted templates to aid them in doing homework assignments.

This is a refereed, academic research annual that is devoted to publishing articles about advancements of accounting and its related disciplines from an international perspective. This serial examines how these developments affect the financial reporting and disclosure practices, taxation, management accounting practices, and auditing of multinational corporations as well as their effect on the education of professional accountants worldwide.

Accounting: Text & Cases is a product of lifelong dedication to the discipline of accounting. Covering both financial and managerial accounting as well as broader managerial issues, the book incorporates a breadth of experience that is sure to enrich your course and your students. The approximately 109 cases that make up most of the end of chapter material are combination of classic Harvard style cases and extended problems, with 12 complete new cases added to the 13th edition. The text is covered as two

parts. Part 1 deals with chapters 1 -14 which cover financial accounting, while part 2 covers Chapters 15-28 which in essence is associated with management accounting. The tale end of part 2 also focuses on broader issues of control and corporate strategy. Both parts have been updated to reflect the current changes relevant to Accounting.

The presence of sound corporate governance in a financial institution is important in maintaining the confidence of both the market and the public. The power that corporate governance holds over the success of some of the largest financial institutions in the world is not to be downplayed. This book methodically assesses the quality of corporate governance and mechanisms of accountability disclosures to various stakeholders. It is further intended to provide fresh insights into some specific corporate governance recommendations to help improve good governance in financial institutions, particularly in the United Kingdom and the EU but will also be applicable to other major economies. It explores what, when and how corporate governance has changed the financial institution functions and corporate executive behaviour by critically reviewing the pre- and post-financial crisis theoretical and empirical literature. Increasingly driven by the nature of complications, complexities and opacity in the operations of financial systems, corporate governance reporting plays an important role in the financial sector. It will provide insights into corporate governance disclosures over a long-term basis. This book should be a valuable asset to support the research of practitioners, students and all academics due to its stimulating and reflective insights into this fascinating topic.

This volume of Eurasian Studies in Business and Economics focuses on latest results from research in Banking and Finance, Accounting and Corporate Governance, Growth and Development, along with a focus on the Energy sector. The first part on Accounting and Corporate

Governance features articles on environmental accounting, audit quality, financial information, and adoption of governance principles. The Banking and Finance part looks at risk-behavior in banks, credit ratings during subprime crisis, stakeholder management, and stock market crises. The book focuses then on the energy sector and analyzes macroeconomic impacts of electricity generation, risk dimensions in wind energy, the latest EU energy reforms, and discusses prediction models.

While many texts characterize themselves as having either a “user” approach or a “preparer” approach, Williams’ Financial Accounting is written for faculty who want to strike a balance between these approaches. Business majors will find relevance in the “Ethics, Fraud & Corporate Governance,” “Your Turn” and “Case in Point” boxes throughout the chapters while accounting majors will receive a firm grounding in accounting basics that will prepare them for their intermediate course.

Larson Fundamental Accounting Principles is the market leader in Canada due to its focus on innovation, including market driven development, student-centered content and pedagogy, and innovative technology. Written in a clear and technically accurate manner, the 15th Canadian Edition continues to emphasize student success at its core. A wealth and variety of problem material

allows students to build confidence, and provides them with an opportunity to practice and master accounting concepts. New Canadian author, Heidi Dieckmann, conveys dynamic energy and a consistent voice across both Volumes 1&2, by incorporating fresh and exciting real world examples and companies that make accounting even more relevant to today's students. Larson provides a comprehensive set of resources for both instructors and students to support a wide range of teaching and learning. What is my theory? How do I choose a theory? Why and how should I employ a particular method for collecting the empirical data? These basic questions concern everyone involved in research. A research study can be a voyage of discovering or choice of theoretical perspective as well as gathering empirics or facts on a problem or situation. This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting. All the chapters provide both retrospective and contemporary views by scholars in the field. Each chapter documents the latest developments and research in accounting and control systems and provides valuable insights into methodological perspectives in accounting research. This second edition has also introduced a number of new chapters covering strategy-management control as practice, grounded theory approach, institutional logic and rhetoric, social interaction theory, actor-network theory and practice theory. The book is primarily intended for research students and academic researchers. It can also be used for undergraduate Honours course as well as postgraduate accounting and business methodology courses. Research organisations and consulting firms in accounting and business fields may also find this book useful. The principal aims of this second edition are (1) to update the chapters previously published in 2006 and (2) to introduce new chapters documenting recent developments in accounting research.
