Financial Statement Analysis, 8e, by emphasizing effective analysis and decision making, gives readers a competitive advantage in analyzing financial statements in an increasingly competitive market. Financial Statement Analysis, 8e, continues to set the standard (over 7 prior editions) in showing students the keys to effective financial statement analysis – including both accounting analysis (part II) and financial analysis (part III). The book is appropriate for students with broad business interests, as well as those who are majoring in accounting and finance as it clearly shows the relevance of financial statement analysis to all business decision makers. The authors apply 3 important criteria in their writing: (i) Make it relevant; (ii) Draw inferences for business decisions; and (iii) Make it accessible and interesting. In addition, the authors: 1. Use numerous and current “real world” examples 2. Focus on analysis while describing current reporting requirements 3. Apply a concise/succinct writing style 4. Explain securities valuation using financial statement analysis

This book describes valuation as an exercise in financial statement analysis. Students learn to view a firm through its financial statements and to carry out the appropriate financial statement analysis to value the firm’s debt and equity. The book takes an activist approach to investing, showing how the analyst challenges the current market price of a share by analyzing the fundamentals. With a careful assessment of accounting quality, accounting comes to life as it is integrated with the modern theory of finance to develop practical analysis and valuation tools for active investing.

The only local text in the market, Business Analysis and Valuation provides a framework for understanding and using financial statements for business students and practitioners. Developed specifically for students undertaking accounting valuation subjects, the text is unique in its approach which introduces and develops a framework for business analysis and valuation using financial statement data, then shows how to apply this framework to a variety of decision contexts. All chapters of this edition have been updated to include the latest regulations, practices and examples from both the financial markets and research. Industry insights from practitioners and other experts have been added to each chapter, giving students a practical, real-life understanding of how the content they are learning translates to the workplace. With an increased number of real-business Asia-Pacific case studies exploring various issues, including a running chapter example, and references to recent research in this field, the text offers local context and a practical and in-depth approach.

Written expressly for business lawyers, this best-selling guide takes you step-by-step through the key principles of corporate finance and accounting. This Second Edition will update the title's content and provide additions to reflect post-Enron SEC and FASB rules and new rules regarding merger and acquisition accounting.

For undergraduate/graduate courses in Financial Statement Analysis and Valuation. This text combines finance, accounting, and business strategy theory with enough real accounting information to teach students how to actually use financial statement data in valuation and analysis--as well as understand the corporate finance theory behind it.

Wahlen/Baginski/Bradshaw is a balanced, flexible, and complete Financial Statement Analysis book that is written with the premise that students learn financial statement analysis most effectively by performing the analysis on actual companies. Which we also concluded within the thesis. The Carlsberg B share is characterized as underpriced at the date 31.12.2009. The qualitative conclusion in the thesis is that we have unrealized gain in the Carlsberg B share.

This text focuses on the output of financial statements, not the input. As such, the book asks what financial statements tell you, not how they are prepared. The idea is to get students to see accounting "working." The particular use of financial statements that the book focuses on is valuation. The text takes the approach that the best way to accurately value a firm is to look at the future earnings of the firm. The main pretext of the book is that financial statement analysis and valuation analysis are inextricably entwined: valuation is an exercise in financial statement analysis. Financial statement analysis is directed by the need to get information for valuation. Accordingly, the book brings finance and accounting concepts together. The book stresses concepts, but the idea is to show how to move from concepts to practice.
