The sequel to *The Sixth Discipline: Ran-Del Jahanpur* still doesn't know what his clan shaman foresaw in his vision of the future. Whatever the old man saw made him force Ran-Del to leave the forest and marry Baron Hayden's daughter. In spite of minor jealousies, Ran-Del and Francesca have forged a strong marriage. Ran-Del is still a warrior, but he's comfortable in the city partly because few people know of the psy abilities that make him so useful to the House of Hayden. Fortunately, psy talents are rare in the city, and no one knows the true circumstances of her marriage, not even Freddie. As heir to House Leong, Freddie has his own problems; he spends his days trying to escape his mother's iron control and ensure she never kills his father. But not all the dangers of

Haven lie in the cities. In the mountains to the north, the fiercely independent people known as the Horde have changed their ways. Berger's slim, user-friendly volume on academic writing is a gift to linguistically-stressed academics. Author of 60 published books, the author speaks to junior scholars and graduate students about the process and products of academic writing. He differentiates between business writing skills for memos, proposals, and reports, and the scholarly writing that occurs in journals and books. He has suggestions for getting the "turgid" out of turgid academic prose and offers suggestions on how to best structure various forms of documents for effective communication. Written in Berger's friendly, personal style, he shows by example that academics can write good, readable prose in a variety of genres.

Information and Meaning is the third book in a trilogy exploring the nature of information, intelligence and meaning. It begins by providing an overview of the first two works of the trilogy, then goes on to consider the meaning of meaning. This exploration leads to a theory of how the brain works. This book differs from others in the field, in that it is written from the perspective of a theoretical biologist looking at the evolution of information systems as a basis for studying the phenomena of information, intelligence and meaning. It describes how neurons create a brain which understands information inputs and then is able to operate on such information.

Hualien, on the Pacific coast of eastern Taiwan, and its mountains, especially Mount Qilai, were deeply inspirational for the young poet Yang Mu. A place of immense natural beauty and cultural heterogeneity, the city was also a site of extensive social, political, and cultural change in the twentieth century, from the Japanese occupation and the American bombings of

World War II to the Chinese civil war, the White Terror, and the Cold War. Taken as a whole, these evocative and allusive autobiographical essays provide a personal response to history as Taiwan transitioned from a Japanese colony to the Republic of China. Yang Mu recounts his childhood experiences under the Japanese, life in the mountains in proximity to indigenous people as his family took refuge from the American bombings, his initial encounters and cultural conflicts with Nationalist soldiers recently arrived from mainland China, the subsequent activities of the Nationalist government to consolidate power, and the island's burgeoning new manufacturing society. Nevertheless, throughout those early years, Yang Mu remained anchored by a sense of place on Taiwan's eastern coast and amid its coastal mountains, over which stands Mount Qilai like a guardian spirit. This was the formative milieu of the young poet. Yang Mu seized on verse to develop a distinct persona and draw meaning from the currents of change reshuffling his world. These eloquent essays create an exciting, subjective realm meant to transcend the personal and historical limitations of the individual and the end of culture, "plundered and polluted by politics and industry long ago."

At age eight, Ramona Treviño climbed to the top of a roof and begged God to let her know he was real. After receiving a sign, she made a pact with herself to follow him always. But family difficulties and growing pains made it hard for her to continue on that path. Pregnant at 16, she dropped out of high school and entered an abusive marriage, which ended in divorce. Wanting to make a difference and to help girls in similar tough situations, she accepted a job as the manager of a Planned Parenthood facility in Sherman, Texas. Over time, however, Ramona began to grapple with whether she was doing women more harm than good, setting her on a path to seek the truth, no matter where it might lead. Realizing she could no longer refer women for abortions or provide them with false assurances of risk-free sex, Ramona took a leap of faith and left the financial security of her job. Her ultimate conversion involved a full return to the Catholic faith of her childhood and a new role as a pro-life advocate and speaker. This compelling story tells of Ramona's struggle to reconcile her identity as a daughter of God with a world that sends conflicting messages concerning the source of our dignity and happiness. It is the honest and heartfelt account of a woman who, with the help of grace, strove to overcome the wounds of her own past while becoming an agent of healing for others.

When Ethan Sutherland was in high school, he'd go to any lengths to hide his secret, including betraying the one girl who tried to help him. Now he's back in town and hoping Cassidy Wells finds it in her heart to forgive him.

Human Rights and the Body is a response to the crisis in human rights, to the very real concern that without a secure foundation for the concept of human rights, their very existence is threatened. While there has been consideration of the discourses of human rights and the way in which the body is written upon, research in linguistics has not yet been fully brought to bear on either human rights or the body. Drawing on legal concepts and aspects of the law of human rights, Mooney aims to provide a universally defensible set of human rights and a foundation, or rather a frame, for them. She argues that the proper frames for human rights are firstly the human body, seen as an index reliant on the natural world, secondly the globe and finally, language. These three frames generate rights to food, water, sleep and shelter, environmental protection and a right against dehumanization. This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law.

Rethinking Thought takes readers into the minds of

30 creative thinkers to show how greatly the experience of thought can vary. It is dedicated to anyone who has ever been told, "You're not thinking!", because his or her way of thinking differs so much from a spouse's, employer's, or teacher's. The book focuses on individual experiences with visual mental images and verbal language that are used in planning, problem-solving, reflecting, remembering, and forging new ideas. It approaches the question of what thinking is by analyzing variations in the way thinking feels. Written by neuroscientist-turned-literary scholar Laura Otis, *Rethinking Thought* juxtaposes creative thinkers' insights with recent neuroscientific discoveries about visual mental imagery, verbal language, and thought. Presenting the results of new, interview-based research, it offers verbal portraits of novelist Salman Rushdie, engineer Temple Grandin, American Poet Laureate Natasha Trethewey, and Nobel prize-winning biologist Elizabeth Blackburn. It also depicts the unique mental worlds of two award-winning painters, a flamenco dancer, a game designer, a cartoonist, a lawyer-novelist, a theoretical physicist, and a creator of multi-agent software. Treating scientists and artists with equal respect, it creates a dialogue in which neuroscientific findings and the introspections of creative thinkers engage each other as equal partners. The interviews presented in this book indicate that many creative people enter fields

requiring skills that don't come naturally. Instead, they choose professions that demand the hardest work and the greatest mental growth. Instead of classifying people as "visual" or "verbal," educators and managers need to consider how thinkers combine visual and verbal skills and how those abilities can be further developed. By showing how greatly individual experiences of thought can vary, this book aims to help readers in all professions better understand and respect the diverse people with whom they work.

Widely assigned and taught in senior capstone and social theory courses, *Sociology After the Crisis* offers the first systematic theory of social differences built on the sociological traditions by embracing to Durkheim, Weber and other familiar figures. The first edition was acclaimed for its nuanced and original rereading of Durkheim in relation to the theoretical reasons he and his contemporaries neglected race and gender. This new edition features two chapters of new material written in the summer of 2003, as the new social structures of the 21st century became increasingly clear. The new Chapter Ten draws upon 9-11, the "new world order" of two Bush presidencies, and globalization to show how individuals' lives and sociologies must be thought about in new ways. These events also highlight how American society and sociology have responded and sometimes failed in the struggle over the crisis of modernism. Reviews for the First Edition: "[This] expansive reimagining of the historical roots of sociological imagination - especially as it embraces voices and visions long lost to our most important national debates - is balm to the fractured soul of American society. Lemert's elegant and passionate volume will aid immeasurably in our nation's search for sane solutions to the crises of purpose and perspective he so skillfully explores." Michael Eric Dyson, author of *Making Malcolm* and *Between God and Gangsta' Rap* "Elegantly crafted." Steven Seidman, State University of New York at Albany

With the government chasing her every footstep, she must find her father before they do if she ever hopes to survive this wild ride and earn the right to live. She discovers that everything she's ever experienced is because of her father and as she begins to put the pieces together she wonders if there is more to this story than anyone else knows.

From the very first moment that we gaze upon our own face in a mirror, we are mesmerized. At first we don't even recognize that the image peering back at us is our own. Eventually we come to realize that the person in the mirror is indeed one with us, a part of us, and from that moment on, everything changes. Our reflection becomes an integral part of our life. Without it, life as we know it would be almost impossible. It is here, in front of that mirror, that we finally see, that which is very important, who we really are. So imagine for a moment what would happen if one day our image had suddenly, tragically, disappeared. Identical twin brothers Marco and Luca Luna share everything. Growing up in a small town, they are an integral part of a loving family. They participate in sports, enjoy music, and are active in their local church. The brothers do everything together, perhaps because they are so much alike-and yet so different. Then one moment, and one event, changes everything-and nothing will ever be the same again.
