The Sexual History of the Global South explores the gap between sexuality studies and post-colonial cultural critique. Featuring twelve case studies, based on original historical and ethnographic research from countries in Africa, Asia, and Latin America, the book examines the sexual investments underlying the colonial project and the construction of modern nation-states. Covering issues of heteronormativity, post-colonial amnesia regarding non-normative sexualities, women's sexual agency, the policing of the boundaries between the public and the private realm, sexual citizenship, the connections between LGBTQ activism and processes of state formation, and the emergence of sexuality studies in the global South, this collection is of great geographical, historical, and topical significance.

All over India the process of uprooting indigenous people from their rich culture is on – the disruption of a way of life, fundamental to which is the belief that it is not the earth which belongs to man, but man who belongs to the earth.
