analytic philosophy with close hermeneutic and phenomenological readings of cases from different fields, focusing on psychiatric and psychological treatises, self-help books, biographies, and fiction. He develops an original account of personal identity (the authorial correlate theory) and offers a provocative interpretation of multiple personality: in brief, "multiples" are right about the metaphysics but wrong about the facts.

This is the first fully annotated and comprehensive modern-spelling edition of King Henry VIII to appear for over a decade. It makes full use of current scholarship on the dating, authorship, printing, and sources of the play, as well as critical interpretations. The editor concludes that Shakespeare and his younger colleague John Fletcher worked on the script together but that Shakespeare was probably the guiding spirit.

Through lengthy interviews and observation of family relationships, this book investigates how the histories of those involved in the Holocaust (as both victims and perpetrators) impact, socially and psychologically, on the lives of the second and third generation. Five case studies of survivors' families from Germany and Israel present different experiences of persecution, and demonstrate to what extent the past defines post-War family dynamics. Two case studies of non-Jewish German families where the grandparents' generation are suspected of having perpetrated Nazi crimes show how guilt, and the myth of themselves being victims, are pressed on to the succeeding generations.

This book offers a model of profound and accessible congregational prayer. At once inspirational and practical, it will empower and equip laypeople and clergy alike to offer heartfelt, informed, and appropriate prayers on behalf of the people of God. As Samuel Wells and Abigail Kocher say, "Interceding in public worship is a duty. This book is intended

differences of long-lasting trauma Trauma and Dissociation in a Cross-Cultural Perspective examines the psychological, sociological, political, economic, and cultural aspects of trauma and its consequences on people around the world. Dispelling the myth that trauma-related dissociative disorders are a North American phenomenon, this unique book travels through more than a dozen countries to analyze the effects of long-lasting traumatization-both natural and man-made-on adults and children. Working from theoretical and clinical perspectives, the field's leading experts address trauma in situations that range from the psychological effects of "the Troubles" in Northern Ireland to the emergence of "Hikikomori," the phenomenon of social withdrawal in Japanese youth. Reactions to trauma can be both unique according to a person's culture and similar to the experiences of others around the world. Dissociation, intense grief, anger, and survivor's guilt are common responses as people split off mentally, physically, and emotionally from the source of the trauma, whether it's an act of nature (tsunami, earthquake, flood, etc.) or the trauma created by violence, physical, sexual, and emotional abuse, assault, confinement, kidnapping, and war. Trauma and Dissociation in a Cross-Cultural Perspective examines the efforts of clinicians and researchers in Europe, Asia, the Middle East, South America, Australia, and New

Life is a journey, not a destination. In this book you will find an imaginative world traversed by characters, both human and animal, who represent many aspects of my psyche. The two main characters, Turtle and Butterfly - one reclusive and prone to ponder rather than act, the other flighty, ethereal and more outgoing - have decided to take a journey that will lead them into the unknown. Their journey is one of self-discovery that encourages trusting oneself as they explore many of the truths I have come to claim as my own. Ultimately, and together with the other characters they meet along the way, both human and animal, they create a strong sense of unity, a foundation with which to continue their life adventures. In a very real sense this is a self-help book set within a story.

twenty-four distinct alter personalities to emerge over a period of several months as West began to recall memories of horrific abuse he'd repressed since childhood. Along with Davy, there was eight-year-old Clay, tense and stuttering, twelve-year-old Dusty, gentle and kind, but disappointed to find herself in a man's body, Bart, lighthearted with a sense of humor, Lief, focused and driven, who got things done, but often overwhelmed West with his intensity, and nineteen other personalities, all with distinct characteristics, mannerisms, and memories, created by West to protect his psyche from the trauma of repeated sexual abuse at the hands of family members. In the classic New York Times Bestseller, *First Person Plural*, West offers a poignant account of his efforts to understand the workings of his fragmented mind and to heal his damaged spirit as he desperately hangs on to the slender thread that connects him to his wife, Rikki, his son Kyle, and some semblance of a regular life. In addition to a spellbinding story, West provides rare and unprecedented insight into the fascinating condition known as Dissociative Identity Disorder, the working of the mind of a multiple, and his alters' coexistence with one another and with the world "outside."

Heartwrenching, humorous, and ultimately hopeful, *First Person Plural* is a story that will make you stand in awe of the power of the mind to protect itself and cheer for West as he struggles to gain control of his life.
