This third edition of Historical Dictionary of Malta contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture.

The author, Dari Y. Fisher has created this manual in consultation with Dr. Imre Kemecey (Master Kayak Coach and Olympic Silver Medallist); regarding coaching structure and technique for elite and emerging Flatwater and Surfski kayak athletes. Initially, the author thought about writing a book on the subject of kayaking in general, however, after much consideration, he remembered a quote he once heard: "A book about everything is a book about nothing." He is not in total agreement with this statement, nevertheless, it was determined that it would be far more beneficial to write in a precise manner regarding a small number of focused topics, as opposed to writing vaguely concerning a multitude of topics. In terms of what has been published, it has for the most part been another person

saying the same thing in a slightly different way. It is barely beneficial to hear about "rotation," or "using your large muscles in your back" for the umpteenth time! There is so much more to this sport than superficial and quite obvious biomechanical tips. Critical analysis alone cannot do this great sport justice, and will not assist our athletes to "step forward" to the next level!

Sebuah novel saga buku pertama dari biografi orang terkaya di dunia keturunan Indonesia-Amerika, Jonathan Abraham. Novel pertama karya Wike Mathilda menjelaskan bagaimana Jo, Jonathan, berlutat dengan dua 'dunia' yang sangat dicintainya: arsitektur dan hoki es. Pria muda banyak bakat ini menentang keras keinginan sang ayah, Alfred Abraham, yang tidak menginginkan Jo menjadi seorang arsitek dan pemain hoki es profesional. Jo tetap bersikeras dengan pilihan karirnya dan tetap memilih Yale University daripada MIT. Novel ini juga mengungkapkan cerita cinta segitiga antara Jo, Scottie dan Kimberly ketika pemuda itu kuliah 'dual major' di Yale: Arsitektur dan EPE

stands still for a moment? If, just like that, you are given a bit of time by sheer luck? This is exactly what happens in one of the biggest and busiest cities of the world, as a small snail crosses the street and makes traffic stop for half a day. A book about things that you always wanted to do but never had the time for.

The availability of location-tracking devices such as GPS, Cellular Networks and other devices provides the facility to log a person or device locations automatically. This creates spatio-temporal datasets of user's movement with features like latitude, longitude of a particular location on a specific day and time. With the help of these features different patterns of user movement can be collected, queried and analyzed. In this research work, we are focused on user's movement patterns and frequent movements of users on a particular place, day or time interval. To achieve this we used Association Rule mining concept based on Apriori algorithm to find interesting movement patterns. Our dataset for this experiment is from Geolife project conducted by Microsoft Research Asia [1][2][3] which consist of 18,630 trajectories, 24 million points logged every 1-5 seconds or 5-10 meters per point. First, we considered the spatial part of data; A two-dimensional space of (latitude, longitude) which ranges from minimum to maximum pair of latitude, longitude logged for all users. We distributed this space

into equal grids along both dimensions to reach a significant spatial distance range. Grids with high density points are sub-divided into further smaller grid cells. For the temporal part of data; we transform the dates into days of the week to distinguish the patterns on a particular day and 12 time intervals of 2 hours each to split a day in order to distinguish peak hours of movement. Finally we mine the data using association rules with attributes/features like user id, grid id (unique identifier for each spatial range/region of latitude and longitude), day and time. This enables us to discover patterns of user's frequent movement and similarly for a particular grid. This will give us a better recommendation based on the patterns for a set of like users, point of interests and time of day.

Craftmanship Within the History of Architecture in Indonesia. In the sixth edition of "ARCHINESIA Bookgazine" we explore what the Indonesian team of curators does in the 14th International Architecture Exhibition in Venice, Italy that is still going until November 16, 2014. In response to the biennale's title, "Fundamentals", with the theme pitched by Rem Koolhaas to all participants about "Absorbing Modernity: 1914-2014", the Indonesian team presents a historical record of the influence of craftsmanship and materials in the course of modern Indonesian architecture. This perspective was not widely discussed, although given the region's many similarities it would not be a surprise that

Literatur mengenai arsitektur Sunda masih sangat terbatas dan kurang dalam, padahal studi arsitektur vernakular tengah menjadi favorit untuk dikaji, baik bagi kalangan akademik dan praktisi. Akibatnya telaah komprehensif terhadap konsep bentuk dan makna arsitektur Sunda sangat kurang, baik teoretik, empirik, dan interpretasinya. Buku ini membahas: 1. Pentingnya pengetahuan arsitektur lokal. 2. Aliran, bentuk, dan makna arsitektur dalam konteks besar filsafat ilmu pengetahuan. 3. Urang Sunda, usaha mengenal lebih dekat orang dan budaya Sunda. 4. Arsitektur Sunda di tiga kampung; interpretasi konsep bentuk, makna, serta faktor yang mempengaruhinya, seperti formasi perkampungan, tata letak, bentuk, ornamen, material, dan konstruksi bangunan. 5. Telaah mengenai struktur dalam pola dan struktur dalam sosial. 6. Dinamika perubahan bentuk dan makna; mengungkap perubahan konsep, konsep 'pola tiga', serta kecenderungan tindakan praktis dan tindakan simbolis. Arsitektur Sunda berusaha menguraikan arsitektur Sunda dalam konteks perubahan dan masyarakat di era globalisasi, sekaligus membuka khazanah budaya Indonesia yang selama ini belum terungkap. Bku ini tentu menambah keragaman kajian yang sangat diperlukan bagi pengembangan pengetahuan arsitektur vernakular Indonesia. Buku Persembahan Penerbit Rosda
