

Flight Dispatcher Training Manual

The new edition of an essential reference book for everyone who works in aviation. Since its first flight on 15 December 2009, the Boeing 787 'Dreamliner' has been the most sophisticated airliner in the world. It uses many advanced new technologies to offer unprecedented levels of performance with minimal impact on the environment. Flying the Boeing 787 gives a pilot's eye view of what it is like to fly this remarkable machine. It takes the reader on a trip from Tokyo to Los Angeles as the flight crew see it, from pre-flight planning, through all the phases of the flight to shut-down at the parking stand many thousands of miles from the departure point. Lavishly illustrated with specially taken photographs of the B787's controls and instruments, this book will be of interest not just to commercial pilots, but to all aviation enthusiasts: it gives an insight into a world normally hidden for the flying public, at the technical and operational cutting edge of commercial flying. Gives a pilot's eye view of flying this remarkable machine - the Boeing 787 'Dreamliner'. Also an insight into a world normally hidden from the flying public, at the technical and operational cutting edge of commercial flying. Lavishly illustrated with 176 specially-taken colour photographs of the B787's controls and instruments.

Canadian Aviation Regulations Translated

All the information you need to operate in U.S. airspace.

On February 12, 2009, about 2217 eastern standard time, Colgan Air, Flight 3407, a Bombardier DHC-8-400, on approach to Buffalo-Niagara International Airport, crashed into a residence in Clarence Center, New York, 5 nautical miles northeast of the airport. The 2 pilots, 2 flight attendants, and 45 passengers aboard the airplane were killed, one person on the ground was killed, and the airplane was destroyed. The National Transportation Safety Board determined that the probable cause of this accident was a pilot's error.

On January 31, 2000, Alaska Airlines, Flight 261, a McDonnell Douglas MD-83, was on its way from Puerto Vallarta, Mexico, to Seattle, Washington, when suddenly the horizontal stabilizer of the plane jammed. While passengers were praying for their life, Captain Thompson and First officer Tansky tried to make an emergency landing in Los Angeles. They did not make it, the plane suddenly crashed into the Pacific Ocean, killing all 93 people aboard. The NTSB concluded that the failure of the horizontal stabilizer was caused by insufficient maintenance. In other words the crash of Alaska Airlines Flight 261 could have been avoided.

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

FAA-S-8081-10C. The Aircraft Dispatcher Practical Test Standards book has been published by the Federal Aviation Administration (FAA) to establish the standards for the aircraft dispatcher certification practical test. Qualified FAA inspectors and designated dispatcher examiners conduct practical tests in compliance with these standards. Sold in packages of 5
