In this penetrating study of how knowledge-based services and technology are revolutionizing the economy and every corporate strategy, James Brian Quinn argues that the successful companies of the 90's -- whether in manufacturing or services -- will derive their competitive edge not from ephemerally superior products but from a deep understanding of a few highly developed knowledge and service based "core competencies." Rarely will owning the largest raw materials resource, manufacturing plants, equipment bases, or integrated facilities provide a maintainable competitive edge for major companies. Such physical properties are too easily cloned or bypassed. From now on, Quinn documents, intelligent enterprises will derive sustainable advantage from knowledge and service based activities that leverage intellectual assets. They will increase value through technological sophistication, better knowledge bases, more creative customer responsiveness, and the unsurpassed management of human and intellectual capital that competitors cannot reproduce. Quinn analyzes the technological and economic forces that make such strategies essential. He shows in detail how to create and leverage knowledge and service based core competencies for maximum focus and

effectiveness. Managers, Quinn asserts, must define each value-creating activity as a knowledge based service and determine whether or not they can perform that service -- be it research, design, inventory control, accounting, distribution, or advertising -- better than anyone else in the world. Using examples from companies such as Merck, Honda, Apple, Boeing, and Wal-Mart, Quinn describes how forward-looking companies can best perform needed analyses and implement strategies around selected core competencies. By eliminating or "outsourcing" less important functions to superior outside vendors, firms become more responsive, decentralized, and lean. They become the "intelligent enterprises" of the 1990s, leveraging human and capital resources much more than other firms. They may also take on radically new organizational forms, become "starburst," "inverted," "infinitely flat," or "spiders' web" configurations. By designing and benchmarking their knowledge and service based activities to be "best in world," managers can obliterate overhead costs, smash bureaucracies, motivate personnel, and create greater value for customers and shareholders alike.

SMS 2003 Networking Recipes provides hundreds of quick-reference solutions for the Windows administrator. The book addresses a wide range of problems that all levels of SMS administrators have reported to our authors in the course of their real-world jobs. Some are simple, beginning implementation solutions, while others address high-end automation techniques. The recipes in this book were not selected whimsically, nor on the basis of what the authors found cool or interesting, but rather on the frequency and importance of complaints experienced by the authors in practical business environments.

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

In the Shadow of the Towers compiles nearly twenty works of speculative fiction responding to and inspired by the events of 9/11, from writers seeking to confront, rebuild, and carry on, even in the face of overwhelming emotion. Writer and editor Douglas Lain presents a thought-provoking anthology featuring a variety of award-winning and best-selling authors, from Jeff VanderMeer (Annihilation) and Cory Doctorow (Little Brother) to Susan Palwick (Flying in Place) and James Morrow (Towing Jehovah). Touching on themes as wide-ranging as politics, morality, and even heartfelt nostalgia, today's speculative fiction writers prove that the rubric of the fantastic offers an incomparable view into how we respond to tragedy. Each contributor, in his or her own way, contemplates the same question: How can we continue dreaming in the shadow of the towers?

Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and
