Fundamental or technical analysis? Tips for forex traders ... AND MORE!!! Do you want to learn the best forex trading tips and tricks? If yes, then keep reading... This guide covers basic strategies for beginners explained in simple terms. A ready-to-use guide to making money online. Build your portfolio with tactics of day swing. Forex (Foreign Exchange Market) is the biggest financial market in the world. Therefore, Forex trading refers to Currency exchange trading. As you know, it is extremely important for currencies to exist in this world. Without them, people will not be able to buy and sell goods. Now, these goods will not always be bought and sold in the local country alone and will also have to be bought from a foreign country. Now say for example your line in Germany and wish to buy a laptop from China. The German currency is Euro, and Chinese currency is Yuan. Now, when you wish to buy the laptop, the Chinese seller will most likely not accept the Euro as payment, but would accept Dollars, as up until now, Dollars is the most widely accepted currency and easy to convert into Yuan as he will want the Yuan, which is the ultimately currency he will want in his bank account in China. So, you will have to exchange your Euro for Dollars to pay the Chinese seller. Here, you have to understand that the currency will get converted to certain "Exchange rate" quoted by the market at the time the conversion occurs. This "rate" will always be a difference in the values of the currencies. This difference will always prove to be an advantage for one country and a disadvantage to another in ways that we could analyze in the future. Now say 1 Euro is valued at 20 Yuan. This means that the German trader can exchange 1 Euro for 20 Yuan and 100 Euro for 2000 Yuan. Here, the Yuan trails the Euro, which means that Germany is in a better place in terms of forex trading. On the other hand, if a trader in China were to buy wine from Germany then he would have to pay a lot more towards it due to the difference in rates between the two currencies. This is just an example, and the difference in rates can be quite different from this. It can be higher or lower in value. Now here, a buyer wanted to exchange the money because they wished to buy something from a foreign seller, but Forex is not always traded for this reason alone. It is also traded to capitalize upon the difference in values. You could be able to make big profits if you play the game right, but there are certain things that you must learn about first in order to invest in the Forex market. Through the course of this book, we will look in detail at how you can do so. In this next segment, we will look at the basic concepts of forex trading. This book gives a comprehensive guide on the following: - Making money in the forex market - Easy ways to reduce your risks - Influencers of the forex markets - Trend reversal figures - Forex strategy basics - Chart patterns to know - Trading mistakes - Trading with Fibonacci channel - Advance knowledge of risk management - Developing the perfect trading psychology - Breakout trends - Turning points and pa relevance... - AND MORE!
