

## Frank Wood Business Accounting

Business Accounting is the world's best-selling textbook on bookkeeping and accounting. Now in its eleventh edition, it has become the standard introductory text for accounting students and professionals alike. The book is used on a wide variety of courses in accounting and business, both at secondary and tertiary level and for those studying for professional qualifications. It builds on Business Accounting 1 to cover advanced aspects of financial accounting. It also covers introductory aspects of management accounting suitable for use at all levels up to and including professional foundation level courses and first-year degree courses.

'An excellent book, well written with each chapter building logically on the last, allowing students to build their knowledge in manageable steps.' Stephen McNamee, University of Ulster

The world's best-selling textbook on book-keeping and accounting, Business Accounting Volume 1 continues to provide an indispensable introduction for students and professionals across the globe. It is renowned for its clarity, with easy-to-understand language and a plethora of examples to aid your understanding. In the 13th edition, which is fully compliant with International Financial Reporting Standards (IFRS), all topics have been fully updated, including areas such as computerised accounting, banking, and accounting concepts and assumptions. With a brand new Chapter 2 on double entry, and more than 100 new review questions and activities, this edition

on theories of accounting choice Over 120 new questions to test your understanding Updated to be fully compliant with International Financial Reporting Standards (IFRS). Key Features: Over 350 review questions, including past examination board questions Easy-to-follow explanations of contemporary accounting practice Activities designed to reinforce the understanding of key concepts Clear and logical progression through topics

"This edition marks a major change in focus that reflects the consolidation of the previous two volumes into one. The emphasis is now exclusively on financial accounting. This change, and the resulting increased focus on company accounting and International GAAP within the text, were made in response to the comments of reviewers of the previous edition, who felt this was what we should be focusing on. This textbook has been written to provide a very thorough introduction to accounting. Anyone seeking to obtain a good grounding in financial accounting will find this book suitable to their needs. This includes those studying accounting on courses at school, college or university; or studying for qualifications from the LCCI, Association of Accounting Technicians, the Institute of Secretaries and Administrators; or for qualifications of any of the six UK and Irish Chartered Accountancy bodies. The financial accounting requirements for National Vocational Qualifications and Scottish Vocational Qualifications are also fully covered"--

Frank Wood's Business Accounting volumes are the world's best-selling

textbooks on bookkeeping and accounting. Now, for the first time, the authors have produced a textbook specifically for users of UK GAAP practice and terminology. This is the leading introductory text for accounting students and professionals alike.

This volume completes the financial accounting coverage of syllabuses of the various examining bodies. It has been brought up to date with all the current accounting standards in as much detail as is required at this level.

This edition of Frank Wood's A-level Accounting has been restructured to match closely the AQA A-level syllabus, now covered in the first fifteen chapters. In particular coverage of partnership accounts, now in one chapter; all company accounting is covered in one chapter; and standard costing and variance is covered in a single chapter. The book builds on a first course in accounting and includes coverage of the more advanced aspects of financial and management accounting. As well as providing instruction and practice in the preparation of accounting information, the text stresses the need for students to understand the business reasons behind accounting techniques. A continuing strength of the book is the large amount of question material. Recent past questions from the main examining bodies are included as well as a useful guide to examination techniques at A-level.
