At last, here is a book that shows women how to recognize the Shadow Negotiation -- in which the unspoken attitudes, hidden assumptions, and conflicting agendas that drive the bargaining process play out -- and how to use that knowledge to their advantage. Each time people bargain over issues -- a promotion, a contract with a new client, a bigger role in decision-making -- a parallel negotiation unfolds beneath the surface of the "formal" discussion. Bargainers constantly maneuver to determine whose interests and needs will hold sway, whose opinions will matter, and how cooperative each person will be in reaching an agreement. How the issues are resolved hangs on the actions people take in the shadow negotiation, yet it is in this shadow negotiation that women most often run into trouble. The most productive negotiations take place when strong advocates can connect with each other. Good results depend equally on a bargainer's positioning her ideas for a fair hearing and on being open to the other side's point of view. But traditionally women have not fared well on either front. Often, they let negotiable moments slip by and take the first "no" as a final answer, or their efforts to be responsive to the other side's position are interpreted as accommodation. As a result, women can come away from negotiations with fewer dollars, perks, plum assignments, or less say in decision-making than men. To negotiate effectively, women must pay attention to acts of self-sabotage as well as to the moves others make in the shadow negotiation. By bargaining more strategically, women can establish the terms of their advocacy, their voice, and at the same time encourage the open communication essential to a collaborative discussion in which not only acceptable, but creative, agreements can be worked out. Written by Deborah M. Kolb and Judith Williams, two authorities in the field, *The Shadow Negotiation* shows women a whole new way to think about the negotiation process. Kolb and Williams identify the common stumbling blocks that women encounter and present a game plan for turning their particular strengths to their advantage. Based on extensive interviews with hundreds of business-women, *The Shadow Negotiation* provides women with a clear, insightful guide to the hidden machinations that are at work in every bargaining situation. Combining practitioner guidance with empirical research, this new textbook teaches negotiation as a skill that can be learned and mastered.

This fine blend of Harvard scholarship and seasoned judgment is really two books in one. The first develops a sophisticated approach to negotiation for executives, attorneys, diplomats -- indeed, for anyone who bargains or studies its challenges. The second offers a new and compelling vision of the successful manager: as a strong, often subtle negotiator, constantly shaping agreements and informal understandings throughout the complex web of relationships in an organization. Effective managers must be able to reach good formal accords such as contracts, out-of-court settlements, and joint venture agreements. Yet they also have to negotiate with others on whom they depend for results, resources, and authority. Whether getting fuller support from the marketing department, hammering out next year's budget, or winning the approval for a new line of business, managers must be adept at advantageously working out and modifying understandings, resolving disputes, and finding mutual gains where interests and perceptions conflict. In such situations, *The Manager as Negotiator* shows how to creatively further the totality of one's interests, including important relationships -- in a way that Richard Walton, Harvard Business School Professor of Organizational Behavior, describes as "sensitive to the nuances of negotiating in organizations" and "relentless and skillful in making systematic sense of the process." This book differs fundamentally from the recent spate of negotiation handbooks that tend to espouse one of two approaches: the competitive ("Get yours and most of theirs, too") or the cooperative ("Everyone can always win"). Transcending such cynical and naive views, the authors develop a comprehensive approach, based on strategies and tactics for productively managing the tension between the cooperation and competition that are both inherent in bargaining. Based on the authors' extensive experience with hundreds of cases, and peppered with a number of wide-ranging examples, *The Manager as Negotiator* will be invaluable to novice and experienced negotiators, public and private managers, academics, and anyone who needs to know the state of the art in this important field.

This book focuses on the tactics and strategies used in business-to-business contract negotiations. In addition to outlining general negotiation concepts, techniques and tools, it provides insight into relevant framework conditions, underlying mechanisms and also presents generally occurring terms and problems. Moreover, different negotiating styles are illustrated using an exemplary presentation of negotiation peculiarities in China, the USA and Germany. The presented tactics and strategies combine interdisciplinary psychological and economic knowledge as well as findings from the field of communication science. The application scope of these tactics and strategies covers business-to-business negotiations as well as company-internal negotiations. The fact that this book does not necessarily stipulate any prior knowledge of the subject of negotiations also makes it highly suitable for nonprofessionals with a pronounced interest in negotiations. Nonetheless, it provides proficient negotiators with a deeper understanding for situations experienced in negotiations. This masterly book substantially extends Howard Raiffa's earlier classic, *The Art and Science of Negotiation*. It does so by incorporating three additional supporting strands of inquiry: individual decision analysis, judgmental decision making, and game theory. Each strand is introduced and used in analyzing negotiations. The book starts by considering how analytically minded parties can generate joint gains and distribute them equitably by negotiating with full, open, truthful exchanges. The book then examines models that disengage step by step from that ideal. It also shows how a neutral outsider (intervenor) can help all negotiators by providing joint, neutral analysis of their problem. Although analytical in its approach—building from simple hypothetical examples—the book can be understood by those with only a high school background in mathematics. It therefore will have a broad relevance for both the theory and practice of negotiation analysis as it is applied to disputes that range from those between family members, business partners, and business competitors to those involving labor and management,
