Voltaire's comment - 'I disapprove of what you say, but I will defend to the death your right to say it' - is frequently quoted by defenders of free speech. Yet it is rare to find someone prepared to defend all freedom of speech, especially if the views expressed are obnoxious or obviously false. So where do the limits lie? How important really is our right to freedom of speech? Here, Nigel Warburton offers a concise guide to the important questions facing modern society about free speech: Should a civilized society set limits on the freedom of speech? How can we square free speech with the sensitivities of religious and minority groups? Does copyright law clash with our right to free speech? And how have new technologies such as the Internet changed the debate? This Very Short Introduction is a thought-provoking, accessible, and up-to-date examination of the liberal assumption that free speech is worth preserving at any cost.

Tracking the relationship between the theory of press control and the realities of practicing daily press censorship prior to publication, this volume on the suppression of dissent in early modern Europe tackles a topic with many elusive and under-researched characteristics. Pre-publication censorship was common in absolutist regimes in Catholic and Protestant countries alike, but how effective it was in practice remains open to debate. The Netherlands and England, where critical content segued into outright lampoonery, were unusual for hard-wired press freedoms that arose, respectively, from a highly competitive publishing industry and highly decentralized political institutions. These nations remained extraordinary exceptions to a rule that, for example in France, did not end until the revolution of 1789. Here, the author's European perspective provides a survey of the varying censorship regulations in European nations, as well as the shifting meanings of

'freedom of the press'. The analysis opens up fascinating insights, afforded by careful reading of primary archival sources, into the reactions of censors confronted with manuscripts by authors seeking permission to publish. Tortarolo sets the opinions on censorship of well-known writers, including Voltaire and Montesquieu, alongside the commentary of anonymous censors, allowing us to revisit some common views of eighteenth-century history. How far did these writers, their reasoning stiffened by Enlightenment values, promote dissident views of absolutist monarchies in Europe, and what insights did governments gain from censors' reports into the social tensions brewing under their rule? These questions will excite dedicated researchers, graduate students, and discerning lay readers alike.

analyzes their educational implications; Part II examines Ideology, Nationalism, Liberalism, Conservatism, and Marxism and analyzes their educational implications; Part III deals with theory, Essentialism, Progressivism, Social Reconstructionism, Critical Theory, and Globalization in terms of their meaning for education. In drawing out the educational implications of these philosophies, ideologies, and theories, the author places them in the context of education, schooling, curriculum, and instruction. Pedagogical aspects include discussion questions, topics for reflection and research, websites, and suggested readings.

Following on from *Writers at Work: The Paragraph* and *Writers at Work: the Short Composition*, *Writers at Work: The Essay* will teach the basics of academic essay writing to intermediate-level students. In *Writers at Work: The Essay*, college and university students use the process approach to write different genres of essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.

The Other Iraq challenges the notion that Iraq has always been a totalitarian, artificial state, torn by sectarian violence. Chronicling the rise of the Iraqi public sphere from 1921 to 1958, this enlightening work reveals that the Iraqi intellectual field was always more democratic and pluralistic than historians have tended to believe. Orit Bashkin demonstrates how Sunni, Shi'i, and Kurdish intellectuals effectively created hyphenated Iraqi identities, connoting pride in their individual heritages while simultaneously appropriating and integrating ideas and narratives of Arab and Iraqi nationalism. Illustrating three developmental stages of Iraqi intellectual history, she follows Iraqi intellectuals' changing roles, from agents of democracy, to specialists who analyze the population, to deeply entrenched members of society committed to change. Based on previously unexplored material, this eye-opening work has significant contemporary implications.

Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture, by surveying the prolific effects of architectural encounter, and the spaces that figure in them. For Deleuze and his Lacanian collaborator Félix Guattari, subjectivity does not refer to a person, but to the potential for and event of matter becoming subject, and the myriad ways for this to take place. By extension, this book theorizes architecture as a self-actuating or creative agency for the liberation of purely "impersonal effects."

Imagine a chemical reaction, a riot in the banlieues, indeed a walk through a city. Simone Brott declares that the architectural object does not merely take part in the production of subjectivity, but that it constitutes its own. This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms. Through a screening of modern and postmodern, American and European works, this provocative volume draws

The authors and audiences for twentieth century Chinese literature, especially fiction, are examined in this book. While modern Chinese fictions are imaginary in that they do not constitute reliable portraits of Chinese life, they can reveal fascinating insights into the writers themselves and their implied audiences. The book also includes substantial reference to poetry, drama, film, and the visual arts as well as to the political and social context in which they appear.

The editors and contributors to this collection explore what it means to adopt an “academic literacies” approach in policy and pedagogy. Transformative practice is illustrated through case studies and critical commentaries from teacher-researchers working in a range of higher education contexts—from undergraduate to postgraduate levels, across disciplines, and spanning geopolitical regions including Australia, Brazil, Canada, Cataluña, Finland, France, Ireland, Portugal, South Africa, the United Kingdom, and the United States.
