"Behind Photographs began as the personal quest of photographer Tim Mantoani to document and preserve noted photographers together with their images. "We have come to a point in history where we are losing both photographic recording mediums and iconic photographers," Mantoani comments. "While many people are familiar with iconic photographs, the general public has no idea of who created them. This book became a means to do that, the photographer and their photograph in one image."--Publisher's website, <https://www.channelphotographics.com/behindphotographs.php>, viewed February 6, 2012.

The transition from stage to screen was not only a shift in popular entertainment, but a challenge for those working in the industry as well. This book looks at all the attempts to organize film actors into a union, starting in 1912 when the Actors' Equity Association seemed the best platform for such an effort, to the establishment of the Screen Actors Guild (SAG) in 1933 as the best vehicle to represent film actors; another four years passed before SAG was formally recognized by film producers and the first contract was signed.

'Don't give up. Don't let them kill your spirit. Things will change. You need to be strong. You need to be ready. And you will need courage.' Juno is young; she has no authority, no power, and to question the ways of Taris is discouraged. She knows what it's like when the community withdraws from her - turning their backs and not speaking to her until she complies. The Taris Project was the brainchild of a desperate twenty-first-century world, a community designed to survive even if the rest of humanity perished. An isolated, storm-buffed island in the Southern Ocean was given a protective dome and its own balmy climate. And now Juno is one of 500 people who live there - but what has happened to the outside world in the years since Taris was established? The island has not been in contact with Outside since the early years of its existence. Juno yearns to know about life Outside, just as she yearns to be allowed to grow her hair. It is a rule on Taris that all must have their heads shaved bare. But is it a rule that could be broken? Danger awaits any who suggest it.

Presented for the first time in English, this volume brings together twelve notable interviews and conversations with Henri Cartier-Bresson carried out between 1951 and 1998. While many of us are acquainted with his images, there are so few texts available by Cartier-Bresson on his photographic process. These verbal, primary accounts capture the spirit of the master photographer and serve as a lasting document of his life and work, which has inspired generations of photographers and artists. Here, Cartier-Bresson speaks passionately, with metaphors and similes, about the world and photography. A man of principles shaped by the evolving eras of the twentieth century, his major influences included Surrealism, European politics of the 1930s and '40s, the Second World War, and his experiences with Magnum as cofounder and reporter. This book illuminates his thoughts, personality, and reflections on a seminal career. In his own words: [Photography] is a way of questioning the world and questioning yourself at the same time. . . . It entails a discipline. For me, freedom is a basic frame of reference, and inside that frame are all the possible variations. Everything, everything, everything. But it is within a frame. The important thing is the sense of limit. And visually, it is the sense of form. Form is important. The structure of things. The space.
