Ultimate Guide for Polymer Clay Craft: Complete and simple step-by-step Guide for making amazing art with polymer clay. Polymer clay is a type of modeling clay with a polymer polyvinyl chloride (PVC). It doesn't actually have clay minerals in it, but it's just as pliable and easy to work with (if not, more so!). Once you mold it into your desired shape, you can pop it in the oven to cure it. It doesn't shrink when you cure the clay, just hardens it. This also allows polymer clay to be a great activity to enjoy with the kids as well as adults can take care of the curing process. It's just as fun as Play-Doh but way better in my opinion, since you actually get to solidify your object into something you can keep. You've probably seen polymer clay at your local crafting stores in rows and rows of colorful blocks
