The material in this book covers everything needed to become proficient in Excel. In writing this guide, we have been very careful to make this tutorial a generic one, not based on any particular version of Excel. The information contained in this book covers the essence of Microsoft Excel. That is, the topics taught are valid for all versions of the application. We believe that it is in the interest of our readers to learn Excel and the topics that make up the fundamentals of the application as a Spreadsheet program. Version-specific features can always be learnt while using that particular version of the application.

This comprehensive courseware book gives students a rich and accessible introduction to creating Web pages using Microsoft FrontPage 98. It covers all the skills necessary to take the Expert Microsoft Office User Specialist (MOUS) Certification Exam for FrontPage 98 via hands-on exercises and examples.* Step-by-step exercises - Supported with plenty of illustrations. Lesson steps are well defined and supported by figures detailing the desired lesson step results. * Takes students systematically through each skill. * A running HTML Web site - Created on

a project-by-project basis, with students learning and applying new skills to their own Web site. Students create an actual, evolving web site, adding the tags as they are created in the lessons. When they finish the book, they will have created, modified, and thoroughly tested a FrontPage Web site similar to a real-world situation. * Give students the opportunity to apply their skills to the real world. * The underlying HTML code - Although FrontPage creates the HTML code for the user, it is still important to learn the HTML code itself because even the best WYSIWYG editor cant cover all the HTML tags. New HTML tags are created on
