The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 273 questions and answers for job interview and as a BONUS web addresses to 218 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry. Petrogav International provides courses for participants that intend to work on onshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the onshore drilling rigs and on the onshore oil and gas rigs. It is intended also for non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes logistics

personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on onshore oil and gas rigs. It is intended also for non-production personnel who work in the onshore drilling, exploration and production industry. This includes logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of production operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

The book deals with the theory of Air Breathing Engines or more precisely aircraft engines. These engines take air from the atmosphere, accelerate and produce thrust to the aircraft. Gas turbine forms the basic unit and is gas generator. The components of the gas turbines are given in detail. It is a machine based on which is developed Turbo Prop and Turbo Jet Engines. Rocket has been considered as non-breathing engine. The book will be useful for Aeronautical Engineering students. The book contains worked out examples taken from the data of leading aircraft manufacturers. The book will be suitable for Mechanical Engineering, Aerospace and Aircraft Engineering courses. The space scientist

and students working for space travel can also benefit from this book. The book will offer working knowledge of the operation of the aircraft to engineers in this area.

Major changes in gas turbine design, especially in the design and complexity of engine control systems, have led to the need for an up to date, systems-oriented treatment of gas turbine propulsion. Pulling together all of the systems and subsystems associated with gas turbine engines in aircraft and marine applications, Gas Turbine Propulsion Systems discusses the latest developments in the field. Chapters include aircraft engine systems functional overview, marine propulsion systems, fuel control and power management systems, engine lubrication and scavenging systems, nacelle and

ancillary systems, engine certification, unique engine systems and future developments in gas turbine propulsion systems. The authors also present examples of specific engines and applications. Written from a wholly practical perspective by two authors with long careers in the gas turbine & fuel systems industries, *Gas Turbine Propulsion Systems* provides an excellent resource for project and program managers in the gas turbine engine community, the aircraft OEM community, and tier 1 equipment suppliers in Europe and the United States. It also offers a useful reference for students and researchers in aerospace engineering.
