Geography does not mean description of the earth's surface. Many changes have occurred due to external and internal forces. Out of these forces many types, micro-organisms and macro-organisms play an important role of all biological elements on this earth, man is the most important creature, and he is the most intelligent of all the living beings. Man has used natural resources for his needs and welfare. All the necessities for the living things are satisfied from natural environment. He has used natural resources according to his needs, sometimes, adapted his living according to natural laws of the earth while at times he has used it by his own will, thus without submitting to the nature.
