

George Eastman And The Camera Inventors And Their Discoveries

This volume shows in chronological order the most impressive images and the most important developments in the art of light that is photography. Display at the George Eastman House through March 12, 2000. 743 illustrations.

Overview: From the world-famous Eastman House comes a lavish, expansive guide to nearly 200 years of photographic invention and innovation. Richly visual and wonderfully informative, it showcases 500 groundbreaking cameras from the museum's collection that forever changed our perception of the world, and of ourselves. Todd Gustavson, curator of technology at the George Eastman House, organizes the cameras into genealogical categories--from detective to digital, stereo to subminiature. Alongside the 35mm, you'll see curiosities like stereoscopic cameras, postcard cameras, and spy cameras hidden in watches, buttons, and fountain pens. Essays by experts in the field--including Robert Shanebrook, Martin Scott, and Mark Osterman--trace the technological development of the camera and provide insight into the innovators behind the lens.

Describes the impact of the Eastman dry film camera and its development process on photography, especially for amateurs, and recounts the life and career of their inventor, George Eastman.

George Eastman is best known for his camera film. But what was his childhood like? What did he do before starting his company? How can we find out more about him? Read this book to find out.

Russ Redsville studies the picture trends, cameras and photography in general since graduating from the University of Iowa. Chicago is a photography town. George Eastman and Thomas Edison shook hands in the late 1920's in Chicago. Eastman Kodak had film for the Kodak camera and Edison adapted film for the motion-picture camera. Next, the 21st Century went Digital and photography transformed.

Describes how the camera was invented and how it has evolved over time.

Few inventions have had as powerful an influence as the camera, and few modes of expression have enjoyed the enduring artistic, scientific, and popular appeal of photography. We are so focused on the products of the camera, the indelible images marking our lives and times, that it's easy to forget the instrument itself has a history. Now that history has been comprehensively traced for photography buffs and amateurs alike by Todd Gustavson, Curator of Technology at George Eastman House. In this stunning volume, hundreds of new and archival images from George Eastman House bring the story to life and provide an unmatched reference source. Vast in its scope, this groundbreaking book is an in-depth visual and narrative look at the camera, and consequently photography itself, as never before seen. - Jacket.

Follows the life and career of the man who revolutionized photography by developing a camera simple enough for anyone to use.

When George Eastman decided to make photography his hobby, "simple" was hardly the word to describe the pastime. He had to lug 50 pounds of camera equipment around with him, including the fragile glass plates that would become pictures. But resourceful George wasn't one to put up with such inconvenience for long. Click! is the

Illustrates and describes the development of photographic equipment Blending the details of George Eastman's life with facts of camera production, this book covers the story of Kodak cameras from 1886 until 1950. More than 50 illustrated charts list the details of almost 300 different Kodak cameras. A supplementary section includes the history of those companies lost to governmental regulations and an addenda section that discusses several non-camera items, such as enlargers and tripods. More than 230 large scale color photographs illustrate the 10 x 10 - inch book.

This book introduces the history of the invention of cameras, including early artists' use of the camera obscura, Johan Heinrich Schulze's use of silver salts, inventing ways to make photographic images permanent, Joseph-Nicéphore Niepce and the first photograph, Louis-Jacque-Mandé Daguerre's daguerreotype, William Henry Fox Talbot's talbotype, George Eastman's roll film and portable Kodak cameras, Oskar Barnack's handheld Leica, Paul Vierkotter's camera flash, Harold Edgerton's stroboscopic flash, Edwin Herbert Land's instant camera, Steven Sasson and the first digital camera, and cell phone cameras. Other chapters delve into camera parts, from the light-tight body to lenses and viewfinders, as well as how these parts work together to make a camera work, from framing a shot to how images form on film or a charge-coupled device. Other sections cover different kinds of cameras and photography, including daguerreotypes, the Kodak box camera, the Brownie, the Polaroid Land Camera, camcorders, and digital cameras, as well as the professional photographers, teachers, salespeople, film developers, and repair specialists who work with cameras. Fun facts discuss French photographer Nadar and the first aerial photograph, Mathew Brady's coverage of the American Civil War, and Eadweard
