"[This book] has been honed into an elegant compendium. This outstanding work should be widely read -- it is perhaps the best example of an integrative approach to gerontology." Score: 94, 4 stars --Doody's This sixth edition of a classic multidisciplinary text for students of gerontology continues to offer practical, reader-friendly information about the physical changes and common pathologies associated with the aging process. It places special emphasis on the psychological and social implications of these changes in the lives of older adults. The book is distinguished by its thorough focus on anatomy and physiology and common health problems pertaining to each body system. This latest edition has been thoroughly updated to present new research findings that differentiate "normal" aging from actual pathology. It provides new data and guidelines on risk factors, nutrition, preventive measures, interventions, and commonly prescribed medications, and includes expanded treatment of complementary and alternative therapies. The book emphasizes the positive aspects of aging and demonstrates how the elderly population can gain greater personal control, through lifestyle changes and preventative health strategies, toward the goal of optimal aging. The book also includes an updated discussion of grief, ethical issues, and funeral options. Written for students of gerontology, social work, human services, nursing, occupational and physical therapy, counseling, and elder law, it presents information that is clearly understandable for those without an extensive background in biology or medicine. The book reinforces information with practical applications of aging data. Physical Change and Aging, Sixth Edition comes with instructor materials, including PowerPoint presentations and test banks for each chapter. An eBook format for Physical Change and Aging is also available. This sixth edition includes new information on: Genetic/DNA theories Dementia and Parkinson's Disease Immunotherapy Lifelong health disparities Pet-assisted therapy Prayer and meditation Pharmacogenetics Gerogogy (self-directed learning) health as public health issue Natural funerals (biodegradable caskets, burial urns, dying at home) This pocket-sized reference contains crucial evidence-based information that enables gerontology nurses to differentiate

between normal and abnormal findings, understand the presentation and management of common diseases of the gerontological population and integrate age-specific considerations into care planning. (Gerontology)

Client Education: Theory and Practice, Third Edition teaches nursing students the important skills of patient education and communication.

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. This innovative text is the first of its kind to have over 40 contributing authors from many different disciplines. Some of the key features of the text include chapter outlines, learning objectives, discussion questions, personal reflection boxes, case studies and more!

As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, Case Studies in Gerontological Nursing for the Advanced Practice Nurse presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized into six units covering cases related to aging, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, Case Studies in Gerontological Nursing for the Advanced Practice Nurse is a key resource for all those dedicated to improving care for older adults.

978-0-7817-8590-7 Brunner and Suddarth's Textbook of Medical-Surgical Nursing 978-1-60831-109-5 Nursing Diagnosis 978-1-60913-691-8 LPN to RN Transitions 978-1-60913-686-4 Introduction to Community Based Nursing 978-1-4511-7277-5 Gerontological Nursing Ensure the most effective wellness-oriented nursing care for older adults--in any healthcare setting. Confidently deliver wellness-oriented care for older adults across a changing healthcare environment with the latest evidence-based coverage of gerontological nursing.

Comprehensively revised and updated, Nursing for Wellness in Older Adults, Eighth Edition fosters your understanding of both the physiologic and psychosocial aspects of aging, as well as broader issues of cultural competence, legal matters, and ethical concerns. Organized around the author's proven Functional Consequences Theory for Promoting Wellness in Older Adults, this trusted text focuses on equipping you to work proactively with older adults to promote high levels of functioning and quality of life, despite the limitations associated with aging, disease, and related conditions. Technology to Promote Wellness in Older Adults boxes familiarize you with technology-based interventions for promoting wellness in older adults. Interprofessional Collaboration (IPC) coverage emphasizes strategies for working with other healthcare professionals in managing care of older patients. Global Perspective boxes illustrate proven international approaches to quality gerontological nursing. Unfolding Patient Stories authored by the National League for Nursing challenge you to apply your understanding to realistic patient scenarios. A Transitional Care Unfolding Case Study helps you manage a patient requiring care across a variety of healthcare settings. Case Studies (both multipart and standalone) encourage you to apply nursing theory to real-life situations. Quality and Safety Education in Nursing (QSEN) examples help you apply knowledge and skills to care plans for unfolding cases. Assessment, Intervention, Evidence-Based Practice, Cultural Considerations, Diversity Note, and Caregiver Wellness boxes detail helpful approaches and tools for effective wellness-oriented nursing practice. Online Learning Activities point readers to the book's companion web page to access related resources, articles, and evidence-based guidelines. -- Provided by publisher.

Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' Gerontological Nursing & Healthy Aging, 6th Edition uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. NEW! Updates reflect the NCSBN Clinical Judgment Model. NEW! Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. NEW! Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal

and ethical issues, and mental health challenges such as depression and substance abuse. NEW! Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. NEW! Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. NEW! Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.
