

## Go With Office 2016 Volume 1

This three-volume set is a rich resource for readers in any discipline interested in understanding the global, regional, and domestic experiences of LGB people. This interdisciplinary set makes a vital contribution to understanding how LGB rights are progressing—and in some cases, regressing—around the globe. The three volumes look at the lived experiences of LGB people from varied perspectives and provide comprehensive coverage on a wide variety of topics ranging from LGB youth and LGB aging to the approaches to LGB people of different religions, including Islam, Judaism, and Christianity. Chapters focus on topics including the ongoing criminalization of same-sex sexual conduct and how international human rights law can be used to improve the lives of LGB people. Particular attention is paid to the rights of bisexuals, a group often ignored in works focusing on sexual orientation. Volume 1 focuses on history, politics, and culture relating to LGB people; Volume 2 focuses on the laws—domestic and international—governing LGB people; and Volume 3 provides snapshots of the current state of LGB experience in countries worldwide, presented by geographical region: Europe, the Americas, Africa, the Middle East and the Asia Pacific region. Includes contributions on the experience of LGB people in countries and regions that are extremely hostile to sexual minorities, including Russia, Iran, the Caribbean, Zimbabwe, and Uganda. Considers a multitude of factors that influence LGB people's quality of life, including, health, education, the economy, technology, religion, and the law. Offers comprehensive domestic, regional, and international accounts, serving as a one-stop source for in-depth, quality global research on LGB people. Addresses the intersectionality of discrimination based on sexuality and race, religion, and age.

Randy Nordell Microsoft® Office 2016: In Practice Topic, Instruction, Practice! Microsoft® Office 2016: In Practice offers a fresh approach to teaching today's students Microsoft® Office skills by clearly introducing skills in a logical sequence: 1) Topic 2) Instruction and 3) Practice. Nordell's T.I.P.s approach builds a foundation for success by helping students practice what they learn, and provides transferable skills that allow students to grasp critical thinking beyond the textbook assignment. In Practice seamlessly integrates with SIMnet Online, McGraw-Hill's learning and assessment solution, which has 1:1 content to help students practice and master computing concepts and Microsoft® Office skills. In Practice projects in SIMgrader allow students to practice their skills in a live Office application. Students receive immediate feedback upon completion of these auto-graded projects. The integration of In Practice with SIMnet helps to meet the diverse needs of students and accommodate individual learning styles.

International debate has recently focused on increased inequalities and the adverse effects they may have on both social and economic developments. Income inequality, now at its highest level for the past half-century, may not only undermine the sustainability of European social policy but also put at risk Europe's sustainable recovery. A common feature of recent reports on inequality (ILO, OECD, IMF, 2015–17) is their recognition that the causes emerge from mechanisms in the world of work. The purpose of this book is to investigate the possible role of industrial relations, and labour policies more generally, in reducing these inequalities.

Adsensory sign technology, which depicts the human body as both object and subject of inscriptive advertising technologies, is integral to a western capitalist insurantial financialisation of health and wellbeing. Developing further the theme of adsensory technologies of the sign, in conjunction with Daniel Bell's theory of the codification of knowledge as an axial feature of the structuring of post-industrial society, this book explores gentrification in heterotopic post-industrial urban spaces. It brings together case studies from London's Grenfell Tower, exploring perilous façadism refurbishment and London's Garden Bridge project and speculative capital regeneration. These studies illustrate, empirically, the extent to which advertising adsensory technologies have become integral to the gentrification of post-industrial urban spaces. Several of the case studies engage critically with the empirical observation that, in the post-industrial urban ecology of inner-city regeneration, adsensory technologies extend avariciously into the infrastructure of neoliberal, managerialist gentrification. In addition, the book explores the forms of capital accumulation which
