This book focuses on the law of commercial contracts as constructed by the U.S. and UK legal systems. Leading scholars from both sides of the Atlantic provide works of original scholarship focusing on current debates and trends from the two

dominant common law systems. The chapters approach the subject areas from a variety of perspectives - doctrinal analysis, law and economic analysis, and social-legal studies, as well as other theoretical perspectives. The book covers the major themes that underlie the key debates relating to commercial contract law: role of consent; normative theories of contract law; contract design and good faith; implied terms and interpretation; policing contract behavior; misrepresentation, breach, and remedies; and the regional and international harmonization of contract law. Contributors provide insights on the many commonalities, but more interestingly, on the key divergences of the United States and United Kingdom's approaches to numerous areas of contract law. Such a comparative analysis provides a basis for future developments and improvements of commercial contract law in both countries, as well as other countries that are members of the common law systems. At the same time, insights gathered here should also be of interest to scholars and practitioners of the civil law tradition.

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

The law of commercial remedies raises a number of important doctrinal, theoretical and practical controversies which deserve sustained and rigorous examination. This volume explores such controversies and suggests solutions, which is essential to ensure that the law is defensible, clear and just. With contributions from twenty-three leading academic and practitioner experts, this book addresses significant issues in the law which, taken together, range across the entire remedial jurisdiction as it applies to commercial disputes. The book primarily focuses on the resolution of controversies in the English law of commercial remedies,

but recent developments elsewhere are also considered, especially in other common law jurisdictions. The result provides remarkably comprehensive coverage of the field which will be of relevance to academics, students, judges and practitioners.

Personal property security is an important subject in commercial practice, as it is the key to much of the law of banking and sale. This second edition has been fully updated and expanded to cover all important issues and changes within this highly complex area of law. It explains traditional methods of securing debts (such as mortgages, charges, and pledges) on property other than land, describing how these are created, how they must be registered (or otherwise 'perfected') if they are to be valid, the rights and duties of the parties, and how the security is enforced if the debt is not paid. The new edition includes an expanded section on priorities in which it explains how 'priority' disputes between competing interests over the same property are resolved. In addition the book covers the law governing other transactions that perform a similar economic function (such as finance leases, retention of title clauses, and sales of a company's book debts). These are not currently treated by the law as security and are therefore subject to different rules on perfection, priority, and enforcement. There is much expansion of the discussion relating to enforcement including the issue of 'right of use' following Lehman, more analysis on administration and all forms of non-possessory security and quasi-security, and a new chapter on enforcement of security addressing the right of appropriation under FC/FCAR and the Cukurova case. The conflict of laws section includes developments under the Rome I Regulation affecting assignment issues, the UNIDROIT Convention 2009 in relation to tiered holdings and the Cape Town Convention's extensions made to coverage of asset-backed security over

equipment. It also addresses the changes brought about by the abolition of Slavenburg registration. This edition contains relevant points from the Banking Act 2009 concerning its impact on security, such as the power to protect certain interests on a transfer of property, and also considers amendments regarding liquidators' expenses under the Insolvency Rules. The authors additionally deal with the role of step-in rights and why they are part of the statutory definition of project finance in the Enterprise Act. Previously published as *The Law of Personal Property Security*, this new edition brings together all of the law on this complex area, providing guidance in the context of commercial practice, especially with increased coverage of conflict of laws, priority, insolvency, and enforcement.
