The rapidity of change in education has intensified in recent years. With the emergence of 'co-operative schools' and a new framework focusing heavily on co-operation, a direct challenge to ways of thinking about education, at both school and university level, has developed. Co-operation, Learning and Co-operative Values addresses the urgent need to describe, analyse and assess the growth of co-operative education. The relationship between co-operation and education is a complex process and this book critically reflects on the tensions and obstacles facing this movement. It brings together the contributions of academics and practitioners from a range of backgrounds, and explores topics including: Theories and histories of co-operative values and principles Critical views of the practice of co-operative education Case studies of processes in action from both schools and higher education Co-operative education in a wider

context This book provides an essential introduction to a new and expanding area of research with chapters by many leading commentators in education. It will be of interest to researchers and educators interested in education and social policy.

A proven program for enhancing students' thinking and comprehension abilities Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy-to-implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms.
