teaching in social science” (An empirical study) has been specially designed to equip the teacher and teacher educators with as much knowledge on all aspects as per recommendations of NPE-1986, NCF-2005 and 2011. Education is one of the most important factors in achieving the developmental goals of a country. Social Science is one among those subjects which is an essential element of education. Social Science is a subject which broadens the horizon of an individual and develops various skills and provides opportunity for the professional growth of an individual. Social Science has become a greater value in the present day; Social Science has spread its net on all over the fields of life. Before the days of early printing when books were not easily available, the knowledge was imparted by the teachers from their own store by lecturing and discussion. With the advancement of educational technology and educational research the educationists evolved many teaching skills and techniques, which resulted in effective teaching. The teachers are required to teach in such a way xii that the students should learn better, understand well and also feel interested while learning. The scope of the book has been made broad-based and comprehensive and the approach is practical and functional. Practical approach followed in dealing with topics such as model approach with reference to Cooperative learning model, current trends in social science teaching-learning process like collaborative learning approach, methodology, analysis and interpretation of data and at the end findings of research along with educational implications of present study are discussed. The author,

Includes "Official program of the...meeting of the Pennsylvania State Educational Association (sometimes separately paged).

Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)

It is important to reaffirm the reality of the learning disabilities (LD) phenomenon as a condition that imposes genuine constraints on a student's ability to function, and not as some chimerical entity defined by an ever-changing political situation. Perceptual, memory, attention, linguistic, social, cognitive and neuropsychological factors are an integral part of LD. By mapping out in great detail and with much new data the acquired knowledge on learning disabilities, both empirical and theoretical, this book unravels many mysteries. This book is a landmark in learning disabilities studies, and it lays down solid foundations for future research and practical intervention in the field.
