From childhood through to adulthood, retirement and finally death, *The Economic Psychology of Everyday Life* uniquely explores the economic problems all individuals have to solve across the course of their lives. Webley, Burgoyne, Lea and Young begin by introducing the concept of economic behaviour and its study. They then examine the main economic issues faced at each life stage, including: * the impact of advertising on children * buying a first house and setting up home * changing family roles and gender-linked inequality * redundancy and unemployment * coping on a pension * obituaries, wills and inheritance. Finally they draw together the commonalities of economic problems across the lifespan, discuss generational and cultural changes in economic behaviour, and examine the significance of other, non-economic constraints, upon individuals. *The Economic Psychology of Everyday Life* provides a much-needed comprehensive and accessible guide to economic psychology which will be of great interest to researchers and students.

First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte di mangiar bene* has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor – humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

Stereotypical representations of the Mezzogiorno are a persistent feature of Italian culture at all levels. John Dickie analyzes these stereotypes in the post Unification

period, when the Mezzogiorno was widely seen as barbaric, violent or irrational, an "Africa" on the European continent.

Hailed by Terry Eagleton in "The Guardian" as "definitive," this is the only complete and authoritative edition of Antonio Gramsci's deeply personal and vivid prison letters.

This text provides an important overview of the contributions of edible insects to ecological sustainability, livelihoods, nutrition and health, food culture and food systems around the world. While insect farming for both food and feed is rapidly increasing in popularity around the world, the role that wild insect species have played in the lives and societies of millions of people worldwide cannot be ignored. In order to represent this diversity, this work draws upon research conducted in a wide range of geographical locations and features a variety of different insect species. *Edible Insects in Sustainable Food Systems* comprehensively covers the basic principles of entomology and population dynamics; edible insects and culture; nutrition and health; gastronomy; insects as animal feed; factors influencing preferences and acceptability of insects; environmental impacts and conservation; considerations for insect farming and policy and legislation. The book contains practical information for researchers, NGOs and international organizations, decision-makers, entrepreneurs and students.

The Individual in the Economy presents interesting analyses of important human behaviours. Revisits the idea of a 'Feudal Revolution' in Europe between 800 and 1100, examining the causes of profound socio-economic change.

This volume examines a variety of utopian writing for children from the 18th century to the present day, defining and exploring this new genre in the field of children's literature. The original essays discuss thematic conventions and present detailed case studies of individual works. All address the pedagogical implications of work that challenges children to grapple with questions of perfect or wildly imperfect social organizations and their own autonomy. The book includes interviews with creative writers and the first bibliography of utopian fiction for children. Massimo Montanari draws readers into the far-flung story of how local and global influences came to flavor Italian identity. The fusion of ancient Roman cuisine—which consisted of bread, wine, and olives—with the barbarian diet—rooted in bread, milk, and meat—first formed the basics of modern eating across Europe. From there, Montanari highlights the importance of the Italian city in the development of gastronomic taste in the Middle Ages, the role of Arab traders in positioning the country as the supreme producers of pasta, and the nation's healthful contribution of vegetables to the fifteenth-century European diet. Italy became a receiving country with the discovery of the New World, absorbing corn, potatoes, and tomatoes into its national cuisine. As disaster dispersed Italians in the nineteenth century, new immigrant stereotypes portraying Italians as "macaroni eaters" spread. However, two world wars and globalization renewed the perception of Italy and its culture as unique in the world, and the production of food constitutes an important part of that uniqueness.

Explores the premise that everything having to do with food - its capture, cultivation, preparation, and consumption - represents a cultural act. Provides insights into many patterns of culinary behavior and tradition.

What is the role of the survivor testimony in Holocaust remembrance? In this book, a concise, rigorously argued, and provocative work of cultural and intellectual history, the author seeks to answer this surpassingly complex question.

Eric Gill's opinionated manifesto on typography argues that 'a good piece of lettering is as beautiful a thing to see as any sculpture or painted picture'. This essay explores the place of typography in culture and is also a moral treatise celebrating the role of craftsmanship in an industrial age. Gill, a sculptor, engraver, printmaker and creator of many classic typefaces that can be seen around us today, fused art, history and polemic in a visionary work which has been hugely influential on modern graphic design. 'Written with clarity, humility and a touch of humour . . . timeless and absorbing' Paul Rand, The New York Times 'His lettering was clear, confident and hugely influential on the development of modern type design. The world has now caught up with Gill' Guardian How do we see the world around us? This is one of a number of pivotal works by creative thinkers like John Berger and Susan Sontag whose writings on art, design and the media have changed our vision for ever.
