

Guide To California Planning 4th Edition

Wondering what a museum director actually does? About to start your first director's job? Looking for guidance in starting up a museum or working with a museum director? Hugh Genoways and Lynne Ireland have taken the mystery out and put common sense and good guidance in. Learn about everything from budgets and strategic planning to human resources and facilities management to collections and programming. Genoways and Ireland also help you tackle legal documents, legal and ethical issues, and challenges for the modern museum. Case studies and exercises throughout help you review and practice what you are learning, and their extensive references will be a welcome resource.

The first baby boomers are approaching retirement age. They are mapping out their own future, providing for children and grandchildren, and caring for aging parents. And they all have lots of questions - about financial planning, health care, charitable gifts, nursing homes, housing and a host of issues related to aging. You also need to meet the needs of your current elderly clients by keeping abreast of this rapidly evolving area of practice. Now, thanks to California Guide to Tax, Estate & Financial Planning for the Elderly, you'll be able to answer their questions and act in their behalf, whether you specialize in elder law and estate planning or maintain a general practice. This newly published compendium from LexisNexis places the range of issues facing the elderly in the context of California law. It's your single source for in-depth discussions of such issues as: • Medi-Cal • Conservatorships • Wills and trusts • Income and estate taxes • Estate planning • Nursing homes and home health care agencies • Planning for incapacity California Guide to Tax, Estate & Financial Planning for the Elderly has been specifically designed to help increase your effectiveness and productivity. • A glossary of acronyms at the beginning of the book will help you identify state and federal agencies and initiatives. • A section of common client questions that begins each chapter will lead you directly to the information you'll use most often. • Hundreds of practice notes throughout the text provide useful tips and suggestions, while cautionary notes alert you to areas of special concern. • Checklists at the end of each chapter will help ensure that you have addressed your client's needs methodically and completely.

Impact fees are one-time charges that are applied to new residential developments by local governments that are seeking funds to pay for the construction or expansion of public facilities, such as water and sewer systems, schools, libraries, and parks and recreation facilities. In the face of taxpayer revolts against increases in property taxes, impact fees are used increasingly by local governments throughout the U.S. to finance construction or improvement of their infrastructure. Recent estimates suggest that 60 percent of all American cities with over 25,000 residents use some form of impact fees. In California, it is estimated that 90 percent of such cities impose impact fees. For more than thirty years, impact fees have been calculated based on proportionate share of the cost of the infrastructure improvements that are to be funded by the fees. However, neither laws nor courts have ensured that fees charged to new homes are themselves proportionate. For example, the impact fee may be the same for every home in a new development, even when homes vary widely in size and selling price. Data show, however, that smaller and less costly homes have fewer people living in them and thus less impact on facilities than larger homes. This use of a flat impact fee for all residential units disproportionately affects lower-income residents. The purpose of this guidebook is to help practitioners design impact fees that are equitable. It demonstrates exactly how a fair impact fee program can be designed and implemented. In addition, it includes information on the history of impact fees, discusses alternatives to impact fees, and summarizes state legislation that can influence the design of local fee programs. Case studies provide useful illustrations of successful programs. This book should be the first place that planning professionals, public officials, land use lawyers, developers, homebuilders, and citizen activists turn for help in crafting (or recrafting) proportionate-share impact fee programs.

Schoolhousing presents a theoretical and practical portrayal of how, when, and why public school districts build new schools. Based on extensive data analysis and a comprehensive review of the literature, the book specifies school district reorganization and subsequent steps necessary to implement plans. The book discusses and considers how school districts relate to state agencies on regulatory, fiscal, and support bases. It also addresses questions important to school district officials, principals, architects, contractors, and others engaged in projects which require long-term management. The work is unique in that both organizational points of view and individual roles are presented.

This extensively revised and updated fourth edition of Planning in the USA continues to provide a comprehensive introduction to the policies, theory and practice of planning. Outlining land use, urban planning, and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined, and approached. This full colour edition incorporates new planning legislation and regulations at the state and federal layers of government, updated discussion on current economic issues, and examples of local ordinances in a variety of planning areas. Key updates include: a new chapter on planning and sustainability; a new discussion on the role of foundations and giving to communities; a discussion regarding the aftermath of Katrina in New Orleans; a discussion on deindustrialization and shrinking cities; a discussion on digital billboards; a discussion on recent comprehensive planning efforts; a discussion on land banking; a discussion unfunded mandates; a discussion on community character; a companion website with multiple choice and fill the blank questions, and 'test yourself' glossary terms. This book gives a detailed account of urbanization in the United States and reveals the problematic nature and limitations of the planning process, the fallibility of experts, and the difficulties facing policy-makers in their search for solutions. Planning in the USA is an essential book for students, planners and all who are concerned with the nature of contemporary urban and environmental problems.
