In the twenty-first century, mass media corporations are often seen as profit-hungry money machines. It was a different world in the early days of mass communication in America. Faith in Reading tells the remarkable story of the noncommercial religious origins of our modern media culture. In the early nineteenth century, a few visionary entrepreneurs decided the time was right to reach everyone in America through the medium of print. Though they were modern businessmen, their publishing enterprises were not commercial businesses but nonprofit societies committed to the publication of traditional religious texts. Drawing on organizational reports and archival sources, David Paul Nord shows how the managers of Bible and religious tract societies made themselves into large-scale manufacturers and distributors of print. These organizations believed it was possible to place the same printed message into the hands of every man, woman, and child in America. Employing modern printing technologies and business methods, they were remarkably successful, churning out millions of Bibles, tracts, religious books, and periodicals. They mounted massive campaigns to make books cheap and plentiful by turning them into modern, mass-produced consumer goods. Nord demonstrates how religious publishers learned to work against the flow of ordinary commerce. They believed that reading was too

important to be left to the "market revolution," so they turned the market on its head, seeking to deliver their product to everyone, regardless of ability or even desire to buy. Wedding modern technology and national organization to a traditional faith in reading, these publishing societies imagined and then invented mass media in America.

In this vital book, the famed filmmaker tells how his passion for education reform led him to learn that there are five tested, indispensable keys to transforming America's underperforming schools. Famed director M. Night Shyamalan has long had a serious interest in education. The foundation he and

his wife started once gave college scholarships to promising inner-city students, but Shyamalan realized that these scholarships did nothing to improve education for all the other students in underperforming schools. When he learned that some schools were succeeding with similar student populations, he traveled across the country to find out how they did this and whether these schools had something in common. He eventually learned that there are five keys to closing America's achievement gap. But just as we must do several things to maintain good health— eat the right foods, exercise regularly, get a good night's sleep—so too must we use all five keys to turn around our lowest-performing schools. These five keys are used by all the schools that are succeeding, and no schools are succeeding without them. Before he discovered them, Shyamalan investigated some popular reform ideas that proved to be dead ends, such as smaller class size, truculent unions, and merit pay for teachers. He found that the biggest obstacle to school reform is cognitive biases: too many would-be reformers have committed themselves to false solutions. This is a deeply personal book by an unbiased observer determined to find out what works and why so that we as a nation can fulfill our obligation to give every student an opportunity for a good education.

unemployed. They discover how people coped, what new inventions came about, and how the economics of the country affected the arts, sciences, and politics of the times. In-depth investigations of primary sources from the period allow readers to engage in further, independent study of the times. Additional materials include a glossary, a list of current reference works, and Internet resources.
